

CONTENTS

Sr. No.	Page No.
Chapter I : The Climate Strikes Back	1-32
1. Introduction.....	1
2. Global Manifestation of Climate Change	3
3. Climate Policy Action	9
4. India's Involvement in Global Climate Change and Action	16
5. Climate Change and the Reserve Bank of India	23
6. Concluding Observations	26
Chapter II : Macroeconomic Effects of Climate Change In India	33-74
1. Introduction.....	33
2. India's Exposure to Climate Shocks	35
3. Manifestation of Climate Change in India.....	39
4. Macroeconomic Impact of Climate Change in India	45
5. India's Transition Towards Net Zero	51
6. Sectoral Green Transition Challenges	61
7. Concluding Observations	68
Chapter III : Climate Change and Financial Sector	75-104
1. Introduction.....	75
2. Financial Risks due to Climate Change.....	77
3. Modelling the Macro-Financial Transmission of Climate Risk.....	82
4. Stakeholders' Survey on Financial Risks.....	84
5. Climate Stress Test for Indian Banks.....	85
6. Green Financing Requirement	89
7. Mitigation of Financial Risks	90
8. Concluding Observations	97

Sr. No.	Page No.
Chapter IV : Policy Options to Mitigate Climate Risks	105-167
1. Introduction.....	105
2. Fiscal Policy Initiatives.....	107
3. Innovation and Technology Adoption.....	117
4. Trade Policy	128
5. Regulatory Measures	134
6. Market-based Solutions.....	141
7. Monetary Policy	149
8. Nudging Behavioural Change.....	152
9. Impact of Policy Interventions on Reducing Carbon Emissions: A Scenario Analysis	153
10. Concluding Observations	154

LIST OF BOXES

Sr. No.		Page No.
I.1	Decoupling of Global Growth and GHG Emissions	11
I.2	International Climate Equity and Justice: Some Analytical Insights	13
I.3	Implications of Climate Risk Factors for Indian Agriculture	19
I.4	Energy Transition Scenarios for India	22
II.1	Economic Impact of Cyclone Amphan on the Coastal Districts of West Bengal and Odisha	50
II.2	Economic Growth, Energy Consumption and Emissions: The Trade-offs.....	56
II.3	Climate Change Impact on GDP – A Comparative Assessment.....	60
III.1	Measuring Indian Banks’ Transition Risk using an Energy Intensity Metric.....	77
III.2	Role of NBFCs in Propagating Climate Change Impact.....	80
III.3	Climate Risk Impact Assessment in a DSGE Model for India	82
III.4	Performance of ESG Indices <i>vis-à-vis</i> Broad Market Indices	93
IV.1	Emerging Market (EM) Green Bonds: The Significance of Greenium	116
IV.2	Innovation for Sustainable Energy Transition.....	125
IV.3	Green PLI – Exploring India’s Export Potential in Climate Friendly Goods (CFGs)	131
IV.4	Carbon Emissions Embedded in International Trade – India’s Perspective	132
IV.5	Do Indian Companies Walk the Talk on ESG?	142

LIST OF TABLES

Sr. No.		Page No.
I.1	Bai-Perron Structural Breaks in GCCI	8
I.2	Cumulative CO ₂ Emissions: India <i>vis-à-vis</i> World.....	18
I.3	India's Action Related to Climate Change	20
II.1	Sector-wise Share in GVA and CO ₂ Emission Intensity (2018-19) In India.....	38
II.2	Onset and Withdrawal of Monsoon in India	42
II.3	Difference-in-Difference Panel Data Results	49
II.4	Scenario Assumptions.....	53
II.5	Energy Transition and GHG Emissions Towards Net Zero by 2070 <i>vis-à-vis</i> 2021-22.....	54
II.6	Electricity Tariff in India in 2021-22.....	62
II.7	Plant-level Levelised Cost of Electricity (LCOE) Calculation	63
II.8	Transport Sector - Energy Consumption and Emission (2019)	63
II.9	Manufacturing Firms in India: Energy Intensity, Output and Emissions	65
II.10	Share of Fuels in Indian Manufacturing Sector	66
II.11	Fuel Usage in Indian Manufacturing Sector (2019-20).....	66
III.1	Projected Estimates of Green Finance Requirements	89
IV.1	Step-wise Considerations for Implementing a Carbon Tax.....	113
IV.2	Carbon Tax and ETS: Advantages and Disadvantages.....	114
IV.3	Carbon Pricing Mechanism in Emerging Market Economies	114
IV.4	Emissions Trading Model in Surat	115
IV.5	Machine Learning and its Deployment for Climate Change Solutions .	124
IV.6	Digital Tools Used for Promoting Energy Efficiency.....	126
IV.7	Environmental Provisions in Most of the Global PTAs.....	130
IV.8	Composition of State Energy and Climate Index (SECI)	141

LIST OF CHARTS

Sr. No.		Page No.
I.1	Estimated Global Temperature Over Past 500 Million Years.....	3
I.2	Causes of Recent Global Warming	4
I.3	Historical GHG Emissions	5
I.4	Global Mean Surface Temperature Anomaly	5
I.5	Ocean Heat Content and Sea Level Rise.....	6
I.6	Global Ocean Acidification	6
I.7	Ice and Glacier Balance	7
I.8	Global Precipitation Anomaly	7
I.9	Evolution of Climate Change	8
I.10	Global Climate Change and Disaster Events	8
I.11	Target Year of Commitment for Countries.....	9
I.12	Number of Net Zero Pledges and Share of Global CO ₂ Emissions Covered.....	10
I.13	Number of Reported Deaths Due to Weather-Related Calamities	10
I.14	Change in Global CO ₂ Emissions and GDP.....	11
I.15	Global Carbon Emission Paths.....	14
I.16	Global Temperature Rise over Pre-Industrial Average.....	15
I.17	Mobilisation of Climate Finance from Developed to Developing Countries	15
I.18	Use of Climate Finance	15
I.19	Reported Economic Losses from Weather, Climate and Water Hazards.....	15
I.20	Global Carbon Tax Coverage.....	16
I.21	Global ETS Coverage.....	16
I.22	Annual Surface Temperature Anomaly (Compared to baseline 1950 to 1980).....	17

Sr. No.		Page No.
I.23	Change in Surface Air Temperature over the Indian Region	17
I.24	Climate Change-Related Disaster Frequency (Number of Events)	18
I.25	Per Capita CO ₂ Emissions.....	18
I.26	Energy Intensity of GDP	18
I.27	Climate Change Performance Index, Select Countries	22
I.28	Share of Electricity Production from Fossil Fuels	22
I.29	Impact of Climate Risk on Monetary Transmission.....	24
I.30	Average Carbon Footprint of Bank Loans in Select Countries	25
II.1	Risks Emanating from Climate Change across Geographical Regions in India.....	36
II.2	Sectoral Composition in GVA and CO2 Emissions in India	37
II.3	Share of Fossil Fuel and Non-Fossil Fuel based Energy Sources in India's Energy Consumption.....	37
II.4	India's Energy-Mix at A Disaggregated Level.....	39
II.5	Average Annual Temperature in India.....	39
II.6	Minimum and Maximum Temperature in India	39
II.7	Global and Indian Temperature Anomaly	40
II.8	Mean Temperature and Anomaly from Normal Temperature.....	40
II.9	Total Rainfall and Rainfall Departure from LPA	42
II.10	Frequency of Unseasonal Rains and Heatwaves in India	43
II.11	Frequency and Intensity of Cyclonic Storms in India during 1901-2022	43
II.12	Spatial Distribution and Frequency of Severe Cyclones.....	44
II.13	Frequency of Drought/Flood Years in the Indian Coastal States during 1951-2021	44
II.14	Number of Natural Disasters in India.....	45
II.15	Total Foodgrains Production in India	47

Sr. No.		Page No.
II.16	Contribution of TOP to Headline and Food Inflation Volatility	48
II.17	Existing Path of the Kaya Factors	52
II.18	Estimated GHG Emissions - Scenarios	55
II.19	GHG Emissions Modelled Pathways for India as per the Climate Action Tracker	55
II.20	Impact on India's GDP	58
II.21	Combined Impact of Physical and Transition Risks on India's GDP	58
II.22	Impact on India's Inflation	59
II.23	Combined Impact of Physical and Transition Risks on India's Inflation ...	60
II.24	CO ₂ Intensity of Electricity Grids (2019)	62
II.25	Passenger and Freight Movements by Modes of Transport	64
II.26	EV Registrations in India	64
II.27	Decomposition of Energy Use Transition	65
III.1	Physical and Transition Risk Indicators	76
III.2	Bank Credit to Green <i>vis-à-vis</i> Brown Industries	79
III.3	GNPAs of Green <i>vis-à-vis</i> Brown Industries	79
III.4	Sectoral Distribution of NBFC Credit	80
III.5	Respondents' Affiliation	84
III.6	Source of Climate Threat	84
III.7	Sectoral Exposure to Climate Risk	85
III.8	Comparison of Climate and Non-Climate Stress Test Methodologies	86
III.9	Studies on Climate Stress Tests for Physical Risks	87
III.10	Studies on Climate Stress Tests for Transition Risks	87
III.11	Climate Beta	88
III.12	Climate Stress Test: PSBs <i>vis-à-vis</i> PVBs	89
III.13	Bank Credit to Non-Conventional Energy Sector	91

Sr. No.		Page No.
III.14	Spatial Distribution of Bank Credit to Non-conventional Energy.....	92
III.15	Taxonomy as a policy instrument to achieve high-level sustainability goals	92
III.16	Corporate and Government Green Bonds by Country	94
III.17	Issuer-wise Break up of Green Bonds Issued in India (per cent)	95
III.18	Non-life Insurance in India <i>vis-à-vis</i> World.....	95
IV.1	Summary Map of Carbon Pricing Initiatives	109
IV.2	Tax Revenues from Non-Renewable Energy.....	110
IV.3	Countries with Highest Subsidies on Non-renewable Energy	110
IV.4	CO ₂ Emissions and Carbon Tax	111
IV.5	Sovereign Green Bond Issuances	116
IV.6	Cost and Use Trends of Various Energy Sources.....	118
IV.7	Net Electricity Production by Source (TWh)	119
IV.8	Mineral Intensity of Selected Clean and Fossil Energy Technologies.....	121
IV.9	Geographic Concentration of Selected Clean Energy Technologies by Supply Chain Stage and Country/Region, 2021	122
IV.10	Digitalization's Potential Impact on Energy Demand Sectors.....	126
IV.11	Trade Imbalances in GHG Emissions.....	128
IV.12	Sector-Wise CSR Expenditure	138
IV.13	CSR Expenditure by Companies.....	139
IV.14	States Ranking and Score in SECI.....	141
IV.15	Sectoral Average ESG Score	144
IV.16	Relationship between Market Capitalisation and ESG Score.....	144
IV.17	ESG Funds in India	147
IV.18	Private Capital Assets Management	148
IV.19	Scenario Analysis for CO ₂ Emission Reduction	155

ANNEX

Sr. No.		Page No.
I.1	Major Global Interventions for Climate Change.....	30
I.2	Climate Policies Being Implemented in Select Countries.....	32
II.1	The NIGEM Model – Key Features.....	74
III.1	Methodology and Underlying Assumptions for Measurement of Green Finance Requirements	104
