## Industrial Outlook Survey: Q2: 2013-14 (Round 63)<sup>1</sup>

The Industrial Outlook Survey conducted during August-September 2013, provides qualitative assessment of business situation of companies in the Indian manufacturing sector for Q2:2013-14 and their expectations for the ensuing quarter Q3:2013-14. The survey elicited response from 1,207 manufacturing companies.

## Highlights:

- i. The assessment of major demand side parameters, as measured by net responses of the companies indicates that while the sentiments on <u>production</u> remained broadly unchanged, the sentiments on <u>order books</u>, <u>capacity utilisation</u>, <u>exports</u> and <u>imports</u> moderated substantially in Q2:2013-14. The demand condition outlook for Q3:2013-14 shows lower optimism.
- ii. The perceptions on <u>overall financial situation</u> dropped substantially for Q2:2013-14. The outlook for Q3: 2013-14 also shows similar sentiments.
- iii. The sentiments on Availability of Finance from all the three sources *viz.*, from internal accruals, from banks & other financial institutions and from overseas, fell for Q2:2013-14. The sentiments are further moderated for Q3:2013-14.
- iv. <u>Cost of external finance</u> is perceived to rise, and the percentage of respondents expecting this rise has increased for the first time since Q4:2011-12.
- v. Majority of the respondents reported no change in the levels of raw material and finished goods <u>inventories</u> in both the assessment and expectation quarters.
- vi. The <u>cost of raw material</u> is expected to rise significantly during Q3:2013-14, and companies expect to pass on a portion of the higher cost to their customers, as reflected in the increase in their expectations on selling price.
- vii. The perception on **profit margin** continues to remain in the negative terrain and is expected to deteriorate further for Q3: 2013-14.
- viii. A question on expectation on movements in <u>salary/other remuneration to employees</u> was introduced in the 63<sup>rd</sup> round of the survey. Majority of the respondents (75 per cent) expect no change in the salary and less than three per cent expect the salary to decrease for Q3: 2013-14.
- ix. The <u>Business Expectation Index</u> (BEI), a measure that gives a single snapshot of the industrial outlook, dropped significantly by 3.9 points for Q2: 2013-14, and at 97.3 it was

<sup>&</sup>lt;sup>1</sup> The 62<sup>st</sup> round (Q1:2013-14) survey results were released on July 29, 2013 with the publication "Macroeconomic and Monetary Developments: First Quarter Review 2013-14" on the RBI Website. The survey results are those of the respondents and are not necessarily shared by the Reserve Bank of India.

below the threshold level of 100 which separates expansion from contraction. For Q3: 2013-14, BEI fell by 2.8 points and at 109.9 remained above the threshold level.
