## Industrial Outlook Survey: Q4: 2012-13 (Round 61)

The $61^{\text {st }}$ round of Industrial Outlook Survey conducted during February-March 2013, gives assessment of business situation of companies in the manufacturing sector for Q4:2012-13 and their expectations for the ensuing quarter Q1:2013-14. The survey elicited response from 1,301 manufacturing companies (about 65 per cent response rate).

## Highlights:

i. The assessment of major demand side parameters, as measured by net responses of the companies, for Q4:2012-13 indicates that while the optimism on production and imports remained around the previous quarter's level, order books, capacity utilisation and exports shows improved optimism. On the other hand, the outlook of demand conditions for Q1:2013-14 shows moderation.
ii. Majority of the respondents reported no change in the levels of raw material and finished goods inventories in both the assessment and expectation quarters.
iii. The optimism on overall financial situation showed some moderation for both the quarters.
iv. Cost of external finance is perceived to rise, though by a lower proportion of respondents as compared to a quarter and a year ago.
v. Cost of raw materials is expected to rise whereas growth in selling prices is expected to drop marginally.
vi. The net response ${ }^{1}$ on profit margin continued to remain in the negative terrain and showed further deterioration.
vii. The Business Expectation Index (BEI), a measure that gives a single snapshot of the industrial outlook, signals marginal improvement by 1.1 points (105.6 from 104.5) for Q4:2012-13. However, the index dropped by 4.0 points (111.6 from 115.6) for Q1: 201314.
viii. The BEI for both the assessment and the expectation quarters have persisted in the growth terrain (i.e., above 100, which is the threshold separating contraction from expansion).

[^0]:    ${ }^{1}$ Net response is the percentage difference between the optimistic (positive) and pessimistic (negative) responses; responses indicating status quo (no change) are not reckoned.

[^1]:    Pending orders 'Below Normal' is optimistic.

[^2]:    'Improvement' in availability of finance is optimistic.
    *: These questions are newly added by bifurcating the question on Availability of Finance (both internal and external sources) in the $61^{\text {st }}$ Round (Jan-March 2013).
