Quarterly Industrial Outlook Survey: July-September 2011 (55th Round)¹

This article presents the survey findings of Industrial Outlook Survey conducted for July-September 2011 quarter, the 55th round in the series. It gives an assessment of business situation of companies in manufacturing sector, for the quarter July-September 2011, and their expectations for the ensuing quarter October-December 2011. The survey results signal further weakened business conditions in the Indian manufacturing sector for assessment quarter as well as expectation quarter. The Business Expectation Index, a measure that gives a single snapshot of the industrial outlook in each study quarter, dropped to 109.4 from 116.3 for assessment quarter and to 118.8 from 121.5 for expectation quarter; however, it still remains well above 100, the threshold that separates contraction from expansion.

Highlights

The demand conditions based on Production, Order books, Capacity Utilisation, Imports and • Exports showed signs of further moderation during the assessment quarter as well as expectation quarter as compared to the previous round of the survey as well as the corresponding quarter of previous year. This is reflected in decline in net response² in favour of higher Production, Order books, Capacity Utilisation, Imports and Exports.

Moderation in demand conditions anticipated by manufacturing sector during expectation quarter of the previous survey round is well reflected in assessment quarter of the current survey round.

Financial condition showed lower optimism in both the assessment and expectation quarters. Net responses for availability of finance further declined. The cost of external finance is perceived to rise further. The pressure from cost of raw materials which mounted in the last few quarters continued, as majority of respondents expected cost of raw material to rise. Net responses on selling price and profit margin further declined in both the quarters under review which indicates decline in pricing power of the manufacturing sector.

Industry-wise analysis shows that majority of the industry groups especially Cement and Textiles reported lower optimism on demand conditions. Cement and Textiles industries also expressed lowest optimism in Overall Financial situation.

Size-wise analysis shows that demand conditions turned less optimistic across all size classes which was more pronounced in case of smaller size companies' (Production <₹ 100cr). Similar trend was observed for financial conditions.

About half of the respondents expressed Production Constraints for attaining normal production level during July-September 2011.

¹ Prepared in the Division of Enterprise Surveys of Department of Statistics and Information Management. The previous article on the subject based on the 54th survey round (April-June 2011) was published in August 2011 Bulletin. ² Net Response is the difference of percentage of the respondents reporting an increase and that of reporting decrease.

I. Introduction:

The Reserve Bank of India has been conducting the Industrial Outlook Survey (IOS) on a quarterly basis since 1998. The Survey gives insight into the perception of the public and private limited companies engaged in manufacturing activities about their own performance and prospects. The assessment of business sentiments for the current quarter and expectations for the ensuing quarter are based on qualitative responses on 20 major parameters covering overall business situation, financial situation, demand indicators, price, profit margins and employment situation. The survey provides useful forward-looking inputs for policymakers, analysts and business alike.

II. Data Coverage and Methodology³

II.1 Sample Size

The sample covers a panel of about 2,000 public and private limited companies, mostly with paid-up capital above ₹ 50 lakh in the manufacturing sector. The fieldwork for the survey was carried out by an agency during the three-month period ending September 2011. The panel of respondents is kept uniform to the extent possible with periodic updating in the case of addition of new companies or exclusion of closed/merged companies. The sample is chosen so as to get a good representation of size and industry.

II.2 Response to the Survey

The survey elicited response from 1528 (response rate 76%) manufacturing companies.

II.3 Survey Schedule

The survey schedule consists of qualitative questions containing five blocks (Annex) and the target respondents are senior management personnel or finance heads of the companies.

III. Survey Findings

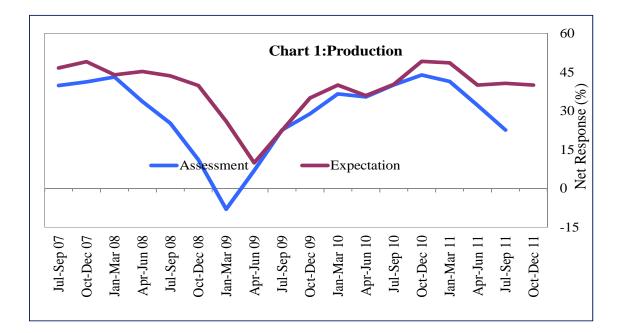

III.1 Demand conditions

The survey collects perceptions of the Indian manufacturers about prominent demand-related parameters, namely, Production, Order Books, Capacity Utilisation, Inventory, Exports and Imports .

III.1.1 Production

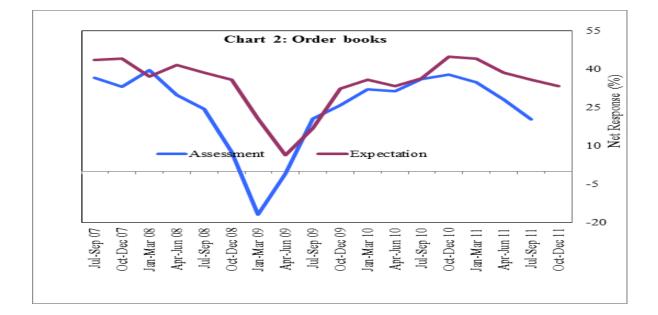

The net response favouring higher production registered a decline from 32.1 per cent to 22.6 per cent for the assessment quarter and from 40.6 per cent to 39.9 per cent for the expectation quarter (Table 1 and Chart 1).

³ The methodology used for the analysis has been provided in the article Quarterly Industrial Outlook Surveys: Trends since 2001 in October 2009 bulletin.

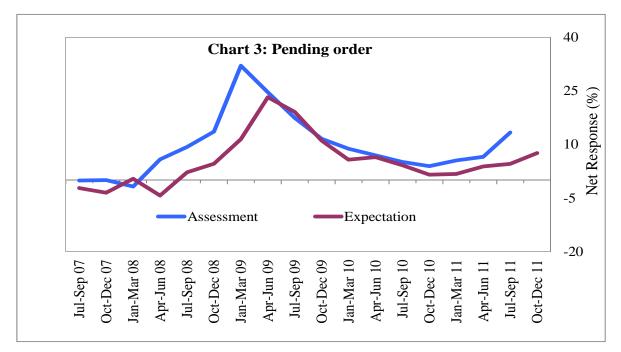

III.1.2 Order Books

The order books position of the manufacturing companies has also shown similar trend with moderation of the net responses for the assessment and expectation quarter. (Table 2 and Chart 2).

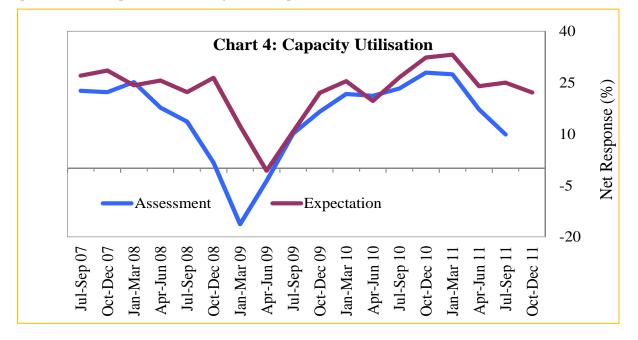

III.1.3 Pending order

The pending order position has improved for both the quarters under review, as some companies shifted their responses from 'above normal'/'normal' to 'below normal' category. (<u>Table 3</u> and Chart 3).

III.1.4 Capacity Utilisation

The survey collects views of manufacturing companies on change in capacity utilisation level (increase/decrease / no change) for the main product, level of capacity utilisation compared to the average in the last four quarters (above normal/ below normal/ normal); and assessment of production capacity with regard to expected demand in the next six months (more than adequate/less than adequate/ adequate). While 57 per cent of the respondents reported no change in the capacity utilisation of their main product, there is a moderation in capacity utilisation level over previous quarter on net response basis during both the quarters under review (Table 4 and Chart 4).

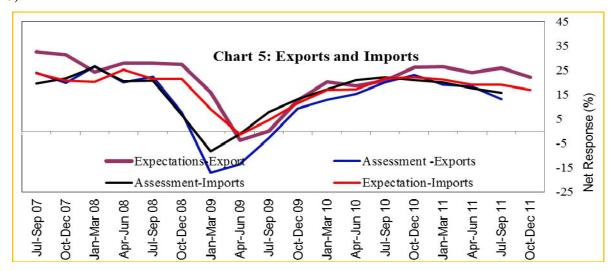

III.1.5 Inventory of Raw Materials & Finished Goods

Majority of the respondents (80-84 per cent) reported to have maintained the average level of inventory of raw materials for the assessment as well as expectation quarters. Similar trend is observed for the inventory of finished goods (<u>Table 5</u>). Around 14 per cent of the respondents assessed their raw material inventory levels to be above average during the assessment quarter. This proportion is marginally lower in the expectation quarter.

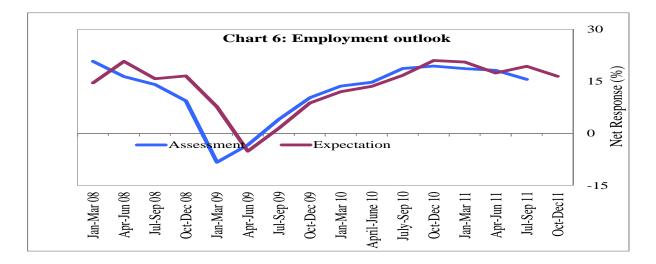

III.1.6 Exports and Imports

The survey reveals lower optimism of the manufacturing sector in terms of growth in exports and imports. The net response for exports declined from 18.2 per cent to 13.1 per cent whereas, for imports it declined from 17.6 per cent to 15.7 per cent in the assessment quarter. Similar decline in net response for exports and imports was observed for the expectation quarter(<u>Table 6</u>, <u>Table 7</u> and Chart 5).

III.1.7 Employment Situation

About 70 per cent of the respondents reported 'no change' in their labour force. Net response for expectation quarter declined to 16.5 per cent from 19.4 per cent. (<u>Table 8</u> and Chart 6).

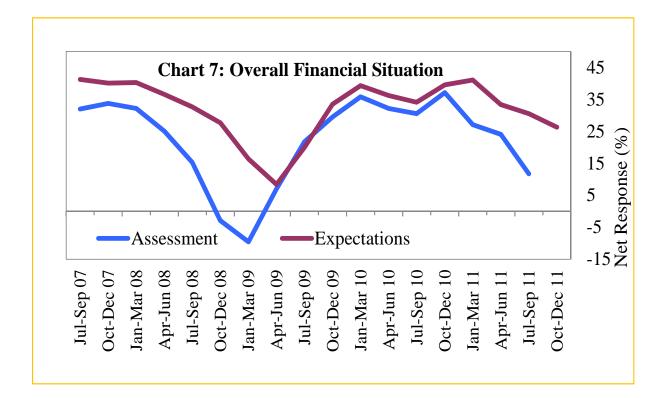

III.2 Financial Parameters

The survey assesses sentiments about financial conditions based on the parameters, viz., overall financial situation, working capital finance requirement (excluding internal sources of funds), availability of finance (both internal and external sources), cost of external finance, cost of raw material, selling price and profit margin.

III.2.1 Overall Financial Situation

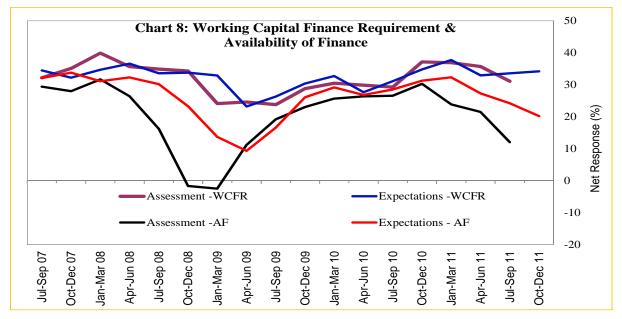

Overall financial situation has shown a further decline in optimism in the assessment quarter. The net response for better financial situation in assessment quarter decreased to 11.7 per cent from 24.1 per cent. The manufacturers also foresee decline in overall financial situation for the expectation quarter as the net response declined to 26.3 per cent from 30.6 per cent a quarter ago (Table 9, Chart: 7).

III. 2.2 Working Capital Finance requirement and Availability of Finance

The sentiment for **working capital finance requirement** (excluding internal source of funds) in the assessment quarter has moderated with net response declining from 35.7 per cent to 31.1 per cent. However, marginal improvement is anticipated for the expectation quarter (<u>Table 10</u>).

The survey shows that lower percentage of respondents assesses/expects Availability of Finance to improve in the current/ensuing quarter. This is reflected in the lower net response for both the quarters under review (Table 11, Chart 8).

III. 2.3 Cost of External Finance

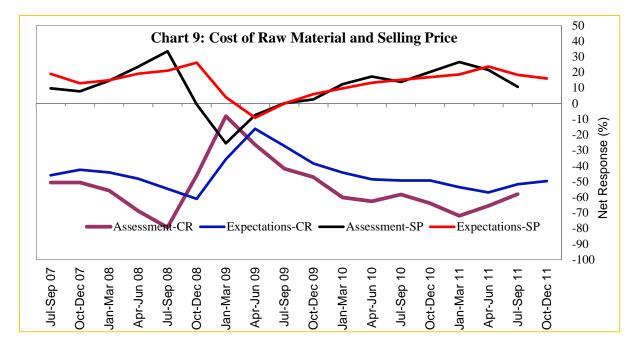

Increasingly a larger number of respondents perceived rise in the cost of funds in recent rounds of the survey. 53.7 per cent of the respondents feel that the cost of external funds have raised further during July-September2011 (Table 12). One quarter ahead outlook also signals similar sentiment.

III.2.4 Cost of Raw Material

63.3 per cent of respondents have reported a further increase in cost of raw material in the assessment quarter, though the pessimism *(increase in cost of raw material)* has marginally declined from the previous round. A similar scenario is reported in the expectation quarter (Table 13, Chart 9).

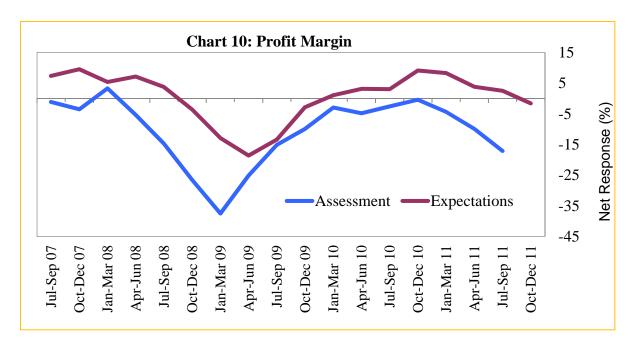

III.2.5 Selling price

The survey seeks responses on change in selling prices (ex-factory unit prices) of the manufactured products on aggregate basis. Net response for selling price has dropped in both the quarters under review, indicating the marginal softening of output prices (<u>Table 14</u>, Chart 9).

III.2.6 Profit margin

The survey seeks opinion of manufacturing companies on change in profit margin (gross profits as percentage to net sales). While more than half of the respondents perceive no change in the profit margin, net response on profit margin declined in both the quarters under review (<u>Table 15</u> and Chart 10) indicating a fall in pricing power in the manufacturing sector.

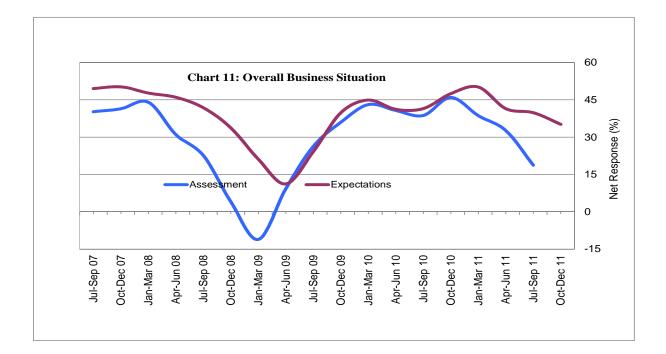

III.3 Overall Business Situation

III.3.1 Overall Business Situation

The **overall business situation** is a parameter that captures the overall confidence of manufacturing companies. The net response of the overall business situation for assessment quarter shows marked

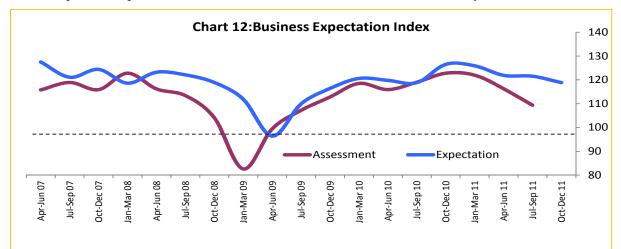

decline to 18.7 per cent from 32.6 per cent in the previous quarter. The net response for expectation quarter has also shown similar trend (Table 16, Chart 11).

III.3.2 Business Expectation Index (BEI)

The Business Expectation Index gives a single snapshot of the industrial outlook in each quarter. This index is computed as the weighted average of net responses from all the industries on nine select performance parameters where the weights are the industry's share in Gross Value Added (GVA). The selected parameters are Overall Business Situation, Production, Order Books, Inventory of Raw Materials, Inventory of Finished Goods, Profit Margin, Employment, Exports and Capacity Utilisation. The methodology for compilation of the BEI is given in the article *Quarterly Industrial Outlook Surveys: Trends since 2001* published in October 2009 Bulletin.

BEI has declined considerably to 109.3 from 116.3 for assessment quarter and to 118.8 from 121.5 for the expectation quarter which indicates continued slowdown of the economy (Table17 Chart 12).

III.3.3 Industry-wise and Size-wise Analysis

The **industry-wise** analysis shows that majority of the industry groups, more visibly 'Cement' and' Textiles' are less optimistic on demand conditions. These industries also expressed lowest optimism in overall financial situation. On cost of finance, pessimism was observed in all the industries and more visibly in 'Cement' and 'Basic metals' industries.

On Size-wise analysis, demand conditions were less optimistic across all size classes (Table18), which was more pronounced for smaller companies (Annual Production $< \mathbf{E}$ 100 cr). Similar trend was observed for financial conditions as well. However, some optimism was expressed by bigger companies (Annual Production of ' \mathbf{E} 100 Crore and above') in availability of finance.

III.3.5 Constraints for attaining the normal production level

About 50 per cent of companies reported **Production Constraints** for attaining the normal production level during the quarter **July-September 2011.** Major constraints reported are *lack of domestic demand, Shortage of power, shortage of raw material, shortage of working capital finance and lack of export demand.* Industry-wise break-up reveals that companies in the industry groups, *viz,* Textiles, Basic metals, Cement, Fertilisers and Transport equipment reported more production constraints (Table 19).

III.3.6 Survey Results and Official Statistics

Chart 13 show the movements of annual growth rates of quarterly GDP-Manufacturing, IIP-Manufacturing (Base 2004-05) and the BEI based on assessment and expectations. It is observed that BEI has captured most of the turning points of the official statistics.

Block 2: Product Details			
	• • • • • • • •		

(Please write the main and two major products (in the order of sales) manufactured by the company) Code Products Code Name 201 Main Product 202 Other Major Product 1 Other Major Product 2 203 **Broad Industry Group** 204

Block 3: Paid-up capital, Annual Production and Current level of Capacity Utilisation

Please tick($\sqrt{}$))the appropriate size-class in which your company currently falls:

		Up to	Rs. 1 Crore to Rs.	Rs. 10 Crore to	Rs. 25 Crore to Rs.	Rs. 50 Crore to	Above
	Paid-up Capital	Rs. 1 Crore	10 Crore	Rs. 25 Crore	50 Crore	Rs. 100 Crore	Rs. 100 Crore
301							
	Annual Production	Up to	Rs. 100 Crore to	Rs. 250 Crore to	Rs. 500 Crore to	Rs. 750 Crore to	Above
302	(All products)	Rs. 100 Crore	Rs.250 Crore	Rs. 500 Crore	Rs. 750 Crore	Rs. 1000 Crore	Rs. 1000 Crore
303	Current level of Capacity	Up to 50%	50% - 60%	60% - 70%	70% - 80%	80% - 90%	Above 90%
505	Utilisation *						

* Compared to installed capacity

Block 4: Is your company's normal production level expected to face any constraints during the Current Quarter (July-September 2011) (Please tick ($\sqrt{}$) the relevant column)

400	Yes	No

If 'Yes' to item 400 indicate the possible reasons thereof (please tick ($\sqrt{}$) the relevant column for each reason)

			Current Quarter (July-S	September 2011)	
Code	Reasons	Most	Moderately Important	Less Important	Not
		Important		-	Important
		(1)	(2)	(3)	(4)
401	Technology constraints				
402	Shortage of Raw Materials				
403	Shortage of Power				
404	Equipment / Machinery not working				
405	Industrial Relations / Labour Problems				
406	Inadequate transport facilities				
407	Shortage of Working Capital Finance				
408	Lack of Domestic Demand				
409	Lack of Export Demand				
410	Competitive Imports				
411	Uncertainty of economic environment				
412	Any others (Please specify):			•	•

Block 5. <u>Assessment for the current quarter (July-September 2011) and Expectations for the next quarter (October -December 2011)</u>

	Parameter	Current Quarter July-September 2011 Please tick ($$ changes over April-June 2011 quarter			Next QuarterOctober-December 2011Please tick ($$ changes overJuly-September 2011 quarter		
Code							
		(1)	(2)	(3)	(4)	(5)	(6)
501	Overall business situation	Better	No change	Worsen	Better	No change	Worsen
502	Financial situation (overall)	Better	No change	Worsen	Better	No change	Worsen
503	Working Capital Finance Requirement (excluding internal sources of funds)	Increase	No change	Decrease	Increase	No change	Decrease
504	Availability of Finance (both internal and external sources)	Improve	No change	Worsen	Improve	No change	Worsen
505	Cost of external finance	Increase	No change	Decrease	Increase	No change	Decrease
506	Production (in quantity terms) (All products)	Increase	No change	Decrease	Increase	No change	Decrease
507	Order Books (in quantity terms), if applicable	Increase	No change	Decrease	Increase	No change	Decrease
508	Pending Orders, if applicable	Above normal	Normal	Below Normal	Above normal	Normal	Below Normal
509	Cost of raw materials	Increase	No change	Decrease	Increase	No change	Decrease
510	Inventory of raw materials (in quantity terms) @	Above average	Average	Below Average	Above average	Average	Below Average
511	Inventory of Finished Goods (in quantity terms) @	Above average	Average	Below Average	Above average	Average	Below Average
512	Capacity utilisation (main product)	Increase	No change	Decrease	Increase	No change	Decrease
513	Level of capacity utilisation (compared to the average in preceding four quarters)	Above normal	Normal	Below Normal	Above normal	Normal	Below Normal
514	Assessment of the production capacity with regard to expected demand in next six months	More than adequate	Adequate	Less than Adequate	More than adequate	Adequate	Less than Adequate
515	Employment in the company (All cadres including part-time/full-time/casual labour)	Increase	No change	Decrease	Increase	No change	Decrease
516	Exports, if applicable	Increase	No change	Decrease	Increase	No change	Decrease
517	Imports, if any	Increase	No change	Decrease	Increase	No change	Decrease
518	Selling prices (<i>ex</i> -factory unit prices) are expected to @@	Increase	No change	Decrease	Increase	No change	Decrease
519	If increase expected in selling prices, rate of such increase	Increase at higher rate	Increase at about same rate	Increase at lower rate	Increase at higher rate	Increase at about same rate	Increase at lower rate
520	Profit Margin (Gross profits as percentage of net sales) @@@	Increase	No change	Decrease	Increase	No change	Decrease

Notes to Block 5: ^(*): Average level may be obtained as the average of level at the end of four quarters during the corresponding preceding year. ^(*): In the case of multi product companies, the average of the price changes may be taken into account. ^(*): Gross profits are defined as total income minus manufacturing expenses, salaries and wages, other expenses and depreciation and other provisions (except tax provision). In other words, profits are gross of interest and tax provision (PBIT). 'Net Sales' are sales net of 'rebates and discounts' and 'excise duty and cess'.
