BASIC STATISTICAL RETURNS-1 AND 2 OF SCHEDULED COMMERCIAL BANKS IN INDIA

INTRODUCTION

This Volume, thirty fifth in the series, presents comprehensive data on deposits and credit of scheduled commercial banks and the information on number of employees of these banks, as on 31st March 2006. The data are collected through the annual statistical surveys, Basic Statistical Returns (BSR)-1 & 2, from the offices of scheduled commercial banks in India including Regional Rural Banks. The earlier title of the publication, i.e. '*Banking Statistics*' has been changed to 'Basic Statistical Returns of Scheduled Commercial Banks in India' from Volume 29 issue relating to March 2000. This has been done with a view to highlight the source and the nature of the data published in the Volume and also to indicate the basic distinction between the banking statistics presented in another publication of the Bank, viz., '*Statistical Tables Relating to Banks in India*', which is based on data collected through various statutory returns and other statistical returns. Information on other publications of the Bank on Banking Statistics is given in the **Appendix**.

2. The BSR-1 & 2 returns have been revised with effect from March 2002 Survey in line with policy changes, developments in the banking sector and also with a view to have uniform coding system for occupation/activity classification as per the National Industrial Classification (NIC), 1998. The significant features of the revision are:

- (i) A new BSR coding system in respect of activity/occupation classification of borrowal accounts based on NIC 1998 classification have been incorporated in BSR system.
- (ii) The loans extended through credit cards are included in 'Demand Loans'.
- (iii) 'Inland Bills' include both, trade bills & other bills.

(iv) 'Artisans and Village & Tiny Industries' comprise Artisans/Craftsman, Village/Cottage Industries and Tiny Industries. These are classified as Small Scale Industries.

(v) Consequent upon the changes in the Activity/Occupation Codes, there are modifications/changes in the description/details of some Occupation Codes. Accordingly, 'Rubber & Rubber Products' under Industry at II.7 has been changed as 'Rubber & Plastic Products'.

(vi) All borrowal accounts with the credit limit of Rs. 2 lakh or less of all scheduled commercial banks including Regional Rural Banks, are classified as '*small borrowal accounts*', from March 1999 onwards.

As a result of these changes, the data presented in some of the tables in this Volume are not strictly comparable with those of the years prior to 2002.

3. BSR-1 relates to gross bank credit and comprises term loans, cash credit, overdrafts, bills purchased and discounted, bills re-discounted under the New Bill Market Scheme and also dues from banks, whereas, the bank credit data, based on returns under Section 42(2) of the RBI Act, 1934, is exclusive of dues from banks and bills re-discounted under the New Bill Market Scheme. The BSR-1 return is divided into two parts - Part A and Part B (termed as BSR-1A and BSR-1B). Till 1998, the BSR-1A return covered accounts with individual credit limit of over Rs. 25,000. Consequent upon the revision in the cut-off credit limit from March 1999 survey, BSR-1A return for scheduled commercial banks other than Regional Rural Banks, covered accounts with individual credit limit of over Rs. 2 lakh. In the case of Regional Rural Banks, the

cut off limit then was Rs. 25,000. The revision of cut off limit for classifying accounts in BSR-1A has been made as Rs. 2 lakh for Regional Rural Banks also from March 2002 onwards. In BSR-1A, information in respect of each of the borrowal accounts is collected on various characteristics, such as place (district and population group) of utilisation of credit, type of account, type of organisation, occupational category, nature of borrowal account, rate of interest, credit limit and amount outstanding. In BSR-1B, information in respect of accounts with individual credit limit upto Rs. 2 lakh is obtained in consolidated form for broad occupational categories. The BSR-1B Return has two separate credit limit size groups, i.e., 'up to Rs. 25,000' and 'over Rs. 25,000 to Rs. 2 lakh'. The information on small borrowal accounts are obtained in BSR-1B return from all scheduled commercial banks (including regional rural banks).

4. In BSR-2, each bank office submits information on deposits with their break-up into current, savings and term deposits. Information on deposit accounts of *females* is given separately. Information of term deposits according to different maturity periods is also furnished in this return. In addition, BSR-2 provides information on staff strength, classified according to gender and category (i.e. officers, clerical and subordinates), in individual bank offices as on the reference date of the returns. Deposits exclude inter-bank deposits. Current deposits comprise (i) deposits subject to withdrawal on demand (other than savings deposits) or on notice of less than 14 days, or term deposits with a maturity period of less than 7 days (ii) call deposits withdrawable not later than 14 days; (iii) unclaimed deposits; (iv) overdue fixed deposits; (v) credit balance in cash credit and overdraft accounts and (vi) contingency unadjusted account if in the nature of deposits. Savings deposits are deposits accepted by banks under their savings bank deposit rules. Term deposits are deposits with a fixed maturity of not less than 7 days and above or subject to notice of not less than 14 days. These would also include (a) deposits payable after 14 days notice; (b) cash certificates; (c)

cumulative or recurring deposits; (d) Kuri & Chit deposits and (e) special deposits in the nature of term deposits. Conceptually, the deposits data in BSR-2 and the aggregate deposits in Section 42(2) return are the same. In BSR-2, bank branches also give classification of term deposits according to broad interest rate ranges as well as size of deposits. Based on these data, tables giving percentage distribution of term deposits according to interest rate range and size of deposits are presented in the Volume. The data on residual maturity of term deposits, introduced in March 2003, are collected through Part-V of this return in respect of computerised branches of scheduled commercial banks, except regional rural banks; and their percentage distribution are presented in the Volume.

5. Out of the 70,776 offices of scheduled commercial banks functioning as on the last day of March 2006, BSR-1 return was received from 64,400 offices. BSR-2 return was received from 64,442 offices. In the case of non-reporting offices the data have been estimated based on the previous round of the survey and from the available information in the Quarterly Return on Aggregate Deposits and Gross Bank Credit (BSR-7) as of 31st March 2006.

Outline of the Volume

6. This Volume is divided into five Sections disseminating the data on deposits and credit of scheduled commercial banks with reference to various classificatory characteristics. Section 1 presents general information on commercial banking and also the summary data on deposits and credit at the All-India level and state level. Section 2 gives State / District-wise distribution of deposits and outstanding credit classified according to population groups and bank groups. Data on distribution of deposits by type of deposits are presented in Section 3. Classification of outstanding credit according to different characteristics such as size of credit limit, rate of interest, type of organisation, type of account, bank group, state and population group, etc., are given in Section 4. In Section 5,

these data are further classified according to occupation of the borrower. District and occupation-wise distribution of outstanding credit is also given in Section 5.

7. BSR-1A return provides the identification of the district and population group of the place where the credit is utilised. However, in BSR-1B return, such information is not being collected. It is presumed that in respect of these accounts, the credit is utilised in the same place where it has been sanctioned. State and population group-wise data on credit given in Sections 4 and 5 are based on place of utilisation of credit, whereas in Section 2, these are based on place of sanction of credit. In Section 1, data on credit when presented with deposits (Tables 1.3, 1.4 and 1.5) are as per place of sanction and when presented separately (Tables 1.10 and 1.11) they are based on place of utilisation. Tables 1.6 to 1.8 present the data on credit according to both the place of sanction and the place of utilisation so as to facilitate comparison. A listing of tables on credit, which are based on place on sanction/ utilisation, is also given in the '*Notes on Tables*'.

Explanatory Notes

8. Brief explanatory notes on some of the tables presented in various Sections of this Volume are given below:

In Section 1, Table 1.1 presents the progress of commercial banking at a glance, based on data collected from different sources as per details given in the '*Notes on Tables*'. Table 1.9 presents classification of outstanding credit according to detailed occupations. Tables 1.13, 1.14 and 1.15 provide truncated distributions of outstanding credit of scheduled commercial banks according to interest rate range, type of account and organisation, respectively, for accounts having individual credit limit above Rs.2 lakh. Table 1.16 gives percentage distribution of small borrowal accounts according to broad category of borrowers into 'individuals' & 'others' and gender-wise classification of individual borrowers. Table 1.17 gives population group and occupation-wise

classification of small borrowal accounts each with credit limit of Rs. 2 lakh and less. Tables 1.21 to 1.23 give the information on deposits of scheduled commercial banks according to broad ownership category. Tables 1.24 to 1.26 give (original) maturity pattern of term deposits according to broad ownership category, population group and bank group, respectively. Table 1.27 presents the percentage distribution of the term deposits of scheduled commercial banks, except regional rural banks, as per the residual maturity period. Table 1.28 gives interest rate range-wise percentage distribution of term deposits. Table 1.29 presents the percentage distribution of the term deposits of scheduled commercial banks as per the size of deposits. Tables 3.4 to 3.5 give (original) maturity pattern of term deposits according to broad ownership category with population group and state. Tables 4.1 to 4.6 in Section 4 and Tables 5.1 to 5.3 in Section 5 provide truncated distribution according to different characteristics of outstanding credit of scheduled commercial banks, for accounts having individual credit limit above Rs. 2 lakh. Table 5.8 provides information on small borrowal accounts having individual credit limit of Rs. 2 lakh and less.

9. Population groups of the banked centres presented in this Volume are based on the 2001 census. As such, the population group-wise data presented in the tables in this Volume are not strictly comparable with those of published in earlier volumes. The population groups are defined as follows:

- (i) 'Rural' group includes all centres with population of less than 10,000
- (ii) 'Semi-urban' group includes centres with population of 10,000 and above but less than 1 lakh
- (iii) 'Urban' group includes centres with population of 1 lakh and above but less than 10 lakh
- (iv) 'Metropolitan' group includes centres with population of 10 lakh and more.

10. Banks have been grouped as under:

- (i) State Bank of India and its Associates
- (ii) Nationalised banks
- (iii) Foreign banks
- (iv) Regional rural banks
- (v) Other scheduled commercial banks.

11. The bank group, 'Nationalised Banks', also includes the data of IDBI Ltd.

12. Significant features relating to credit and deposits of Scheduled Commercial Banks based on information in various tables in this volume are covered in the Highlights.

13. The totals given in the tables may not exactly tally with the sum of the constituent items on account of rounding off of the figures. The unit

one lakh is equal to 1,00,000. The symbol ' - ' indicates 'nil' or 'negligible' throughout this Volume. Figures in brackets indicate percentages to respective total. Notes on tables as appropriate to each table are given at the end of the Volume.

HIGHLIGHTS

1. The Basic Statistical Returns of Scheduled Commercial Banks in India, Volume 35, is based on data collected through BSR 1 and 2 surveys as on March 31, 2006, which covered 70,776 offices of scheduled commercial banks including regional rural banks. These returns are collected from each branch/office of a scheduled commercial bank in India. The salient features are set out below:

Impact of updation of population of centres as per Census 2001

2. Population group-wise distribution of credit & deposits

- On account of updation of population group classification as per 2001 census in March 2006 survey, there had been changes in the composition of branches/offices of bank across population groups. This was mainly due to upgradation of population group of banked centres from lower population group to higher population group consequent upon growth in the population of centres as per 2001 census compared to that based on 1991 census. Population group wise data pertaining to March 31, 2006 are, therefore, not exactly comparable with corresponding data pertaining to earlier years. The comparative position of 31st March 2006 with 31st March 2005 taking into account population classified based on 1991 census and also based on 2001 census is given in the table below:-

Aggregate Deposits and Gross Bank Credit 2005 and 2006

NOTES ON TABLES

Table No. 1.1

Classification of bank offices according to population groups for the year 1969 is based on 1961 census. For the years 1998 to 2005, it is based on 1991 census. For the year 2006, it is based on 2001 census. As such, the population group-wise classification of bank offices is not strictly comparable for all the years. The number of bank offices of scheduled commercial banks excludes the administrative offices. Population per office and per capita deposits and credit are based on estimated mid-year population figures supplied by the Office of the Registrar General, Government of India.

Deposits and credit of scheduled commercial banks in India are as per returns under Section 42(2) of the Reserve Bank of India Act, 1934 and relate to the last Friday of the reference period. Deposits are net of inter-bank deposits and credit is exclusive of dues from banks and bills rediscounted under the New Bill Market Scheme. Aggregate deposits for the years 1999 to 2003; include the proceeds of Resurgent India Bonds amounting to Rs. 17,945 crore. For the years 2001 to 2005, the proceeds of India Millennium Deposits amounting to Rs. 25,662 crore are included in aggregate deposits. The ratio of bank deposits to National Income for the years 1998 to 2006 is based on the new series of National Income with 1993-94 as the base year. For the year 1969, the base year is 1970-71.

Due to change in the definition of the Priority Sectors from time to time, the data are not strictly comparable for the entire time span. Investments for the purpose of calculation of Investment-Deposit ratio pertain to investments in Government and Other Approved Securities.
