

## Industrial Outlook Survey- Q2:2015-16 (Round 71)<sup>1</sup>

The Industrial Outlook Survey conducted during July-September 2015, provides qualitative **assessment** of business situation of companies in the Indian manufacturing sector for **Q2:2015-16** and their **expectation** for the ensuing quarter **Q3:2015-16**. The survey elicited response from 1,304 manufacturing companies.

<sup>1</sup>The 70<sup>th</sup> round (Q1:2015-16) survey results were released on [August 4, 2015](#) on the RBI website. The survey results are those of the respondents and are not necessarily shared by the Reserve Bank of India.

<sup>2</sup> Net Response (NR) is the difference of percentage of the respondents reporting optimism and that reporting pessimism. The range is -100 to 100. Any value greater than zero indicates expansion/optimism and any value less than zero indicates contraction/pessimism i.e.,  $NR = (I - D)$ ; where, I is the percentage response of 'Optimism', and D is the percentage response of 'Pessimism' and E is the percentage response as 'no change/equal';  $I+D+E=100$ . For example, increase in production is optimism whereas decrease in cost of raw material is optimism (details are indicated in the relevant tables).

<sup>3</sup> The Business Expectation Index (BEI) is a composite indicator calculated as weighted (share of GVA of different industry group) net response of nine business indicators. The nine indicators considered for computation of BEI are: (1) overall business situation, (2) production, (3) order books, (4) inventory of raw material, (5) inventory of finished goods, (6) profit margin, (7) employment, (8) exports and (9) capacity utilisation. It gives a single snapshot of business outlook in every quarter. BEI lies between 0 to 200, and 100 is the threshold separating expansion from contraction.

### **Assessment Quarter (Q2:2015-16)**

- Lower level of optimism is observed in the major indicators such as selling price, exports, imports, profit margin, production, order books, capacity utilisation, employment, financial situation, availability of finance during the assessment quarter.
- As a result, the business sentiments of the Indian manufacturing sector, as inferred from movements in Business Expectation Index (BEI), decreased in the assessment quarter (104.8 to 102.4).

### **Expectation Quarter (Q3:2015-16)**

- The outlook on business sentiments remained range bound in the third quarter of 2015-16.
- This could be attributed to the reduced pessimism in inventory of raw material, inventory of finished goods along with the reduced optimism in exports. Also reduced pessimism is observed in cost of finance and cost of raw material.

Q3:2015-16						40.5	11.3	48.2	29.2

'Increase' in production is optimistic.

<sup>@</sup>: Due to rounding off percentage may not add up to 100. This is applicable for all the tables from 1 to 17.

#: Net Response (NR) is the difference of percentage of the respondents reporting optimism and that reporting pessimism. The range is -100 to 100. Any value greater than zero indicates expansion and any value less than zero indicates contraction.
