## FOREWORD

The Reserve Bank's annual publication 'State Finances: A Study of Budgets' provides data and analysis of the fiscal position of the State governments in India. This year's Report analyses the underlying dynamics of the combined budget estimates (BE) of all States/Union Territories for 2021-22 *vis-à-vis* actual and revised (or provisional accounts) outcomes for 2019-20 and 2020-21, respectively, against the backdrop of the COVID-19 pandemic and its impact on the sub-national fiscal positions.

The salient features that emerge from the analysis in the Report are:

- For 2021-22, States have budgeted their consolidated gross fiscal deficit (GFD) to gross domestic product (GDP) ratio at 3.7 per cent, a marked improvement from the level of 4.7 per cent in the revised estimates for 2020-21, the year of the first wave of the pandemic. This consolidation is sought to be achieved through higher revenue receipts in an environment of expanding vaccination coverage, waning of the second wave and removal of localised restrictions on mobility and activity.
- With the third-tier governments in India playing a frontline role in combating the pandemic by implementing containment strategies, healthcare, quarantining and testing facilities, organising vaccination camps and maintaining the supply of essential goods and services, their finances have come under severe strain, forcing them to cut down expenditures and mobilise funding from various sources.
- Going forward, increasing the functional autonomy of the civic bodies, strengthening their governance structure and empowering them financially *via* higher resource availability, including through own resource generation and transfers, are critical for their effective interventions at the grass-root level.

This Report has been prepared in the Division of State Finances (DSF) of the Department of Economic and Policy Research (DEPR) under the supervision of Dr. Mridul Saggur, Executive Director. The Report was prepared under the overall guidance of Dr. Deba Prasad Rath, Officer-in-Charge (DEPR). The DSF team led by Dr. Atri Mukherjee, Director, included Dr. Somnath Sharma and Shri Bichitrananda Seth, Assistant Advisers and Shri Rahul Agarwal, Shri Rachit Solanki and Ms. Arushi Gupta, Managers. Officers from the Division of Central Finances (DCF), Dr. Samir Ranjan Behera, Director, Shri Anoop K Suresh, Assistant Adviser and Shri Saksham Sood and Smt. Ipsita Padhi, Managers made valuable contributions to the Report. Technical inputs from Shri Khaijamanj Mate, Assistant Adviser, Dr. Paritosh Jha, Consultant and Shri Saurabh Sharma, Manager and the contributions and support provided by Dr. Sangita Misra, Director, Dr. Ramesh Golait, Assistant Adviser, Shri Kovuri Akash Yadav, Manager, and Shri Nirmal Kumar, Assistant Manager are gratefully acknowledged.

Officers from DEPR Regional Offices, Smt. Deepa S. Raj, Shri Raj Rajesh, Shri Seenuvasan M, Shri B.S. Choudhary, Smt. Rakhe Balachandran, Shri T. P. Meitei, Ms. Alice Sebastian, Smt. Upasana Sharma, Shri Kapil Dev Manhas, Shri Kunal Rahar, Smt. Pallavi Bhankhor, Shri Rasmi Ranjan Behera,

Smt. Anchal Agarwal Jain, Shri Neeraj Kumar, Shri Prabal Bilantu, Smt. Kirti Gupta and Ms. Sarita Sharma provided noteworthy support in drafting useful parts of the Report as well as in collection and compilation of data.

Support provided by the Internal Debt Management Department (IDMD), Finance Departments of State Governments and Union Territories, the Ministry of Finance, Government of India, the Office of the Comptroller and Auditor General (CAG) of India and Municipal Corporations of different States is also highly appreciated.

This Report is available on the Reserve Bank's website ([www.rbi.org.in](http://www.rbi.org.in)). Feedback/comments are solicited to help improve the analytical and informational content of the Report. They may be sent to the Director, Division of State Finances, Department of Economic and Policy Research, Amar Building (6<sup>th</sup> Floor), Reserve Bank of India, Shahid Bhagat Singh Road, Mumbai- 400 001 or through email ([deprfad@rbi.org.in](mailto:deprfad@rbi.org.in)).

# I

## Overview

1.1 Since the release of the Report titled ‘State Finances: A Study of Budgets of 2020-21’ in October last year - with the spatial dimensions of the COVID-19 pandemic as its theme - the world has suffered from the emergence of newer variants of the virus, renewed waves of the pandemic and further lockdowns/ containment measures. In India, the second wave of the pandemic resulted in a sharp rise in infections and mortalities within a very short period of time. Localised and regional restrictions imposed by State and local governments (LGs) slowed down economic activity *albeit* to a lesser extent than during the nation-wide lockdown at the time of the first wave. As the second wave ebbs and normalcy is gradually restored, the speed and scale of vaccination will shape the path of economic recovery (RBI, 2021)<sup>1</sup>.

1.2 While all tiers of governments joined hands in the fight against COVID-19, the LGs took up additional responsibilities, *viz.*, setting up make-shift hospitals and quarantine centres; contact-tracing; ramping up testing facilities; distribution of free food to the poor; information dissemination; implementing travel restrictions; fostering COVID-appropriate behaviour among the public; maintaining the supply of essential goods and services; and organising vaccination camps while simultaneously addressing vaccine hesitancy issues. Accordingly, this year’s report on State finances is dedicated to that effort and chooses the theme “Coping with the Pandemic: A

Third-Tier Dimension.” It explores the role played by LGs, especially, municipal corporations (MCs) across various States in India in response to the pandemic.

1.3 The choice of the theme is motivated by three factors. First, LGs are by design suited to undertake effective and timely intervention as they are better informed about local needs, can mobilise local people and monitor progress at the grass-root level (Agarwal, 2009). They can also perform certain functions effectively, like encouraging cooperation with public health recommendations, especially during a pandemic-like crisis (Faguet, 2014; Quinn *et al.*, 2013). LGs have also been found to be more successful than other tiers of the government in ensuring compliance with regulations, encouraging community-wide participation, and responding to the immediate needs of the public (Manor, 1999; Dutta and Fischer, 2020). The responsibilities assigned by the Constitution of India to the local governments, *viz.*, public health, sanitation, registration of births and deaths, and maintenance of burial grounds and cremations<sup>2</sup> became the focus of the response to the COVID-19 crisis.

1.4 Second, as densely populated cities and districts again emerged as ‘hotspots’ in the second wave, local governments and district administration authorities were at the forefront, enforcing localised restrictions and other measures which helped minimise the loss of output and livelihood relative to the first wave.

<sup>1</sup> RBI Bulletin, State of the Economy, June 2021.

<sup>2</sup> This is in accordance with the principle of subsidiarity that the level of government closest to the community should be entrusted with all public functions it can handle (Conlan, 2006).

1.5 Third, coping with the pandemic necessitated not only emergency policy responses but also recovery and restoration measures all of which became dependent on the level of preparedness, fiscal strength, quality of crisis management as well as accessibility of health care facilities and essential equipment that varied across local governments. Several success stories of effective and innovative interventions at the grass-root level about containment, treatment and vaccination have created opportunities for peer learning and exchanging knowledge and experience (RBI, 2021a).

1.6 Historically, pandemics have been the portals of structural and even societal change. The second wave has shed light on India's third tier of government, the weakest link in India's federal structure. Strengthening local governments in terms of resources, health infrastructure and capacity building can enable them to build resilience to future shocks and support the rapid pace of urbanisation and social change in a sustainable manner. The 15<sup>th</sup> Finance Commission's recommendation of higher transfers to local bodies (₹4.36 lakh crore for the period 2021-26) is a step in this direction.

1.7 As per tradition, Chapter II of this Report undertakes an in-depth analysis of the fiscal position of States in terms of actual outcomes for 2019-20, revised estimates and provisional accounts for 2020-21, and budget estimates for 2021-22. The chapter also discusses recovery

plans of State governments in 2021-22 as reflected in their budget documents. Additionally, in view of the 15<sup>th</sup> Finance Commission's report submitted to the Parliament in February 2021, the chapter examines the evolving role of finance commission transfers in shaping State finances. It also assesses the indebtedness of State governments in terms of their market borrowings and outstanding liabilities.

1.8 In line with this year's theme, Chapter III delves into the local dimensions of the pandemic and the role played by the third-tier governments in coping with the crisis. The chapter analyses the severity and the spread of the second wave *vis-à-vis* the first wave across localities and the efforts of third tier governments in containment, treatment and vaccination. The challenges faced by India's third-tier governments in terms of resource constraints and infrastructure bottlenecks as well as post-pandemic strategies to build resilience are also addressed in this Chapter.

1.9 Chapter IV concludes by envisaging the way forward for State finances, keeping in view the positive impact of increased pace of vaccination coverage, the strengthening economic recovery and the likely consequences of a possible third wave of COVID-19.

1.10 Data on various budgetary components and fiscal indicators of all the States and Union Territories with legislature are presented in appendices and statements.

# II

## Fiscal Position of the State Governments

### 1. Introduction

2.1 This chapter reviews the fiscal performance of States in 2019-20 and 2020-21 as a backdrop to an evaluation of their budget estimates for 2021-22. As most of the States had released their budgets for 2020-21 before the outbreak of the first wave of COVID-19, there were large deviations between budget estimates (BE) for the year and the revised estimates (RE) as well as provisional accounts (PA). In 2021-22 too, most States have presented their budgets before the spread of the second wave; however, deviations from BE are expected to be smaller than in 2020-21 because of less stringent and State-specific restrictions than the nationwide lockdown imposed a year ago.

2.2 The rest of this chapter is divided into nine sections. Section 2 highlights some of the key fiscal indicators of the State governments. Sections 3, 4 and 5 analyse actual budgetary outcomes for 2019-20, RE for 2020-21 and BE for 2021-22, respectively. The expenditure plans of the States, as envisaged in their budget documents, are analysed in Section 6. The evolving role of central transfers in shaping State government finances is discussed in Section 7 against the backdrop of the 15<sup>th</sup> Finance Commission's recommendations. While Section 8 describes financing patterns, Section 9 provides an estimate of outstanding liabilities, including contingent liabilities of the States. Section 10 sets out some concluding observations.

### 2. Key Fiscal Indicators

2.3 States had maintained their combined gross fiscal deficit (GFD) below the FRL<sup>1</sup>

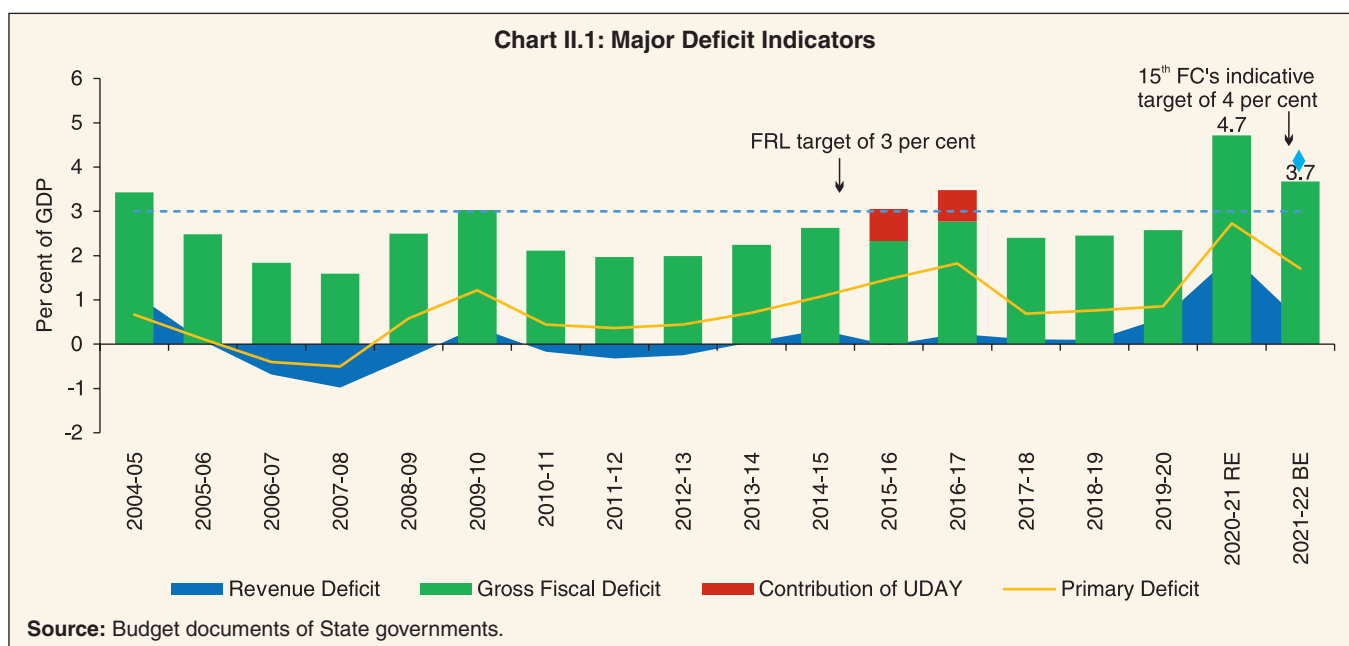

threshold of 3 per cent of gross domestic product (GDP) since 2005-06, except for the years 2009-10, 2015-16 and 2016-17. The overshooting of GFD-GDP ratio in 2009-10 was due to the response to the global financial crisis, whereas the implementation of *Ujwal* DISCOM Assurance Yojana (UDAY) was responsible for higher GFD-GDP ratios in 2015-16 and 2016-17 (Chart II.1). In 2020-21, the GFD breached 3 per cent of GDP again under the impact of the pandemic, with spillovers expected in 2021-22 as well. Notably, the revenue deficit (RD) of the States, which was contained at 0.1 per cent of GDP in 2018-19, reached 2.0 per cent of GDP in 2020-21. Commensurately, the primary deficit (PD) of States also deteriorated during the last two years. While both RD and PD are budgeted to decline in 2021-22, the actual outcome will depend on the future course of the pandemic.

### 3. Fiscal Performance in 2019-20 (Accounts)

2.4 The consolidated GFD of the State governments deteriorated marginally in 2019-20 from its level a year ago (Table II.1). This was caused by a decline in revenue receipts due to a slowdown in economic activity, though its effects were partially offset by rationalisation of expenditure.

2.5 The consolidated RD of the States widened sizably in 2019-20, mainly because of a decline in revenue receipts from 13.9 per cent of GDP in 2018-19 to 13.1 per cent in 2019-20. Underlying the decline in revenue receipts was a sharp fall in the States' own tax revenue due to lower mobilisation under sales tax and

<sup>1</sup> Fiscal Responsibility Legislation.

State goods and services tax (SGST) as well as a decline in tax devolution from the Centre (Chart II.2).

2.6 States' non-tax revenue continued to increase for the second consecutive year in 2019-20, led by general services, which primarily include unclaimed deposits, sale of land and property, guarantee fees and the like. Grants from the Centre also increased during the year due to higher statutory grants (Finance Commission

grants) and the GST compensation cess. Under capital receipts, recovery of loans and advances posted a rise (Table II.2).

2.7 In the face of dwindling revenue receipts, States took recourse to expenditure compression to adhere to the FRL target (Chart II.3). As a consequence, developmental expenditure on crop husbandry, water supply and sanitation, social security and welfare, housing and rural development was squeezed while capex

#### 4. Developments in 2020-21 (Revised Estimates and Provisional Accounts)

2.8 State governments budgeted a higher GFD<sup>2</sup> for 2020-21 in view of the onset of COVID-19 in India at the time of presentation of their budgets (Table II.3). The impact of the pandemic on the State finances, however, turned out to be more severe than anticipated. Revenue collections were hit hard by the nationwide lockdown introduced in March 2020.

2.9 With the easing of lockdown restrictions towards the second half of the year, the focus shifted to fiscal consolidation with a recovery in revenue collection, certainty on GST compensation cess and rationalisation of expenditure. For the year as a whole, the consolidated GFD of the States surged to a historical high<sup>2</sup>, with revenue receipts falling short of the budgeted amounts by more than 2.7

**Table II.3: Fiscal Position of States**

(₹ lakh crore)

Item	2020-21 (BE)	2020-21 (PA)
1	2	3
I. Revenue Receipts	33.31 (16.9)	26.25 (13.3)
a) Tax Revenue	23.16 (11.7)	18.12 (9.2)
b) Non-Tax Revenue	2.72 (1.4)	1.73 (0.9)
c) Grants-in-Aid	7.43 (3.8)	6.39 (3.2)
II. Capital Receipts	0.20 (0.1)	0.14 (0.1)
a) Recovery of Loans and Advances	0.16 (0.1)	0.14 (0.1)
b) Other Receipts	0.04 (0.0)	0.00 (0.0)
III. Revenue Expenditure	33.27 (16.9)	29.70 (15.0)
Of which: Interest payments	3.89 (2.0)	3.62 (1.8)
IV. Capital Expenditure	6.46 (3.3)	5.02 (2.5)
(a) Capital Outlay	5.98 (3.0)	4.59 (2.3)
(b) Loans and Advances Disbursed	0.47 (0.2)	0.43 (0.2)
V. Gross Fiscal Deficit	6.22 (3.2)	8.32 (4.2)
VI. Revenue Deficit	-0.04 (0.0)	3.45 (1.7)
VII. Primary Deficit	2.34 (1.2)	4.70 (2.4)

**Note:** (1) Figures in parentheses are per cent of GDP.

(2) Data for 2020-21 Provisional Accounts (PA) are accounts figures of 26 States available with CAG, and for the remaining 5 States/UTs 2020-21 Budget Estimates (BE) figures are used to arrive at all States and UTs.

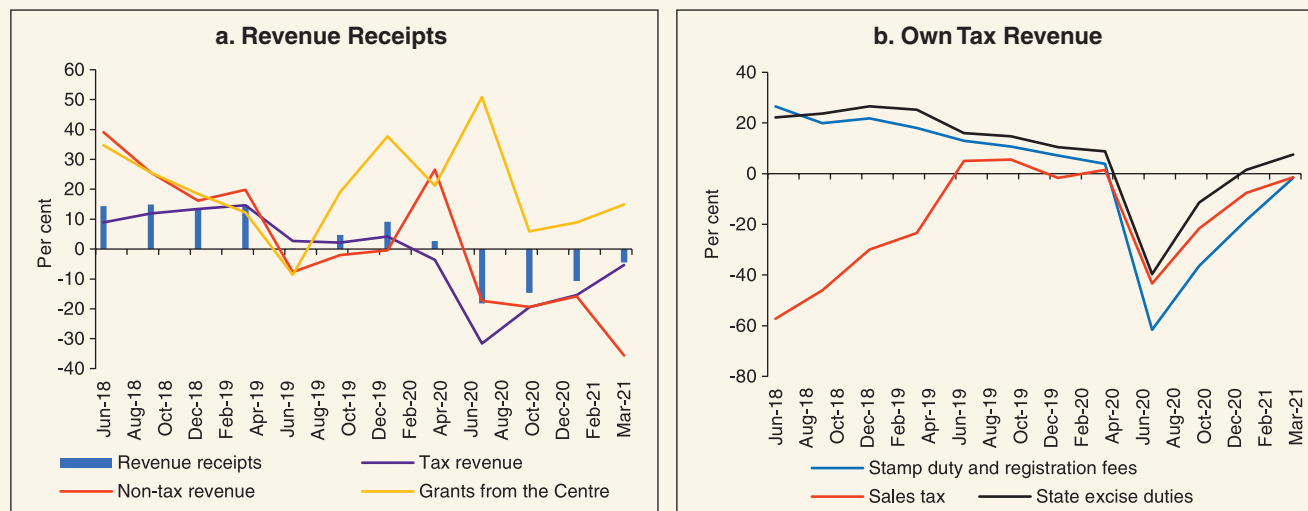

**Sources:** Budget documents of State governments; and CAG.

per cent of GDP. The provisional data on 26 States from the Comptroller and Auditor General of India (CAG) and budget estimates of the remaining five States and UTs indicate that the GFD-GDP ratio was closer to the RE than to the BE (Table II.3).

<sup>2</sup> State governments that presented their budgets after the COVID-19 lockdowns budgeted for GFD at 4.6 per cent of their combined GSDP in 2020-21.

<sup>3</sup> In last year's Report titled 'State Finances: A Study of Budgets 2020-21', the GFD-GDP ratio was projected at 4 per cent with a bias tilted to the upside.

Chart II.4: Revenue Collection Growth\*

\*The growth rates are on y-o-y basis and are calculated on cumulative revenue figures.

Source: CAG.

2.10 All categories of taxes started recovering from the second half of the year as economic activity resumed. Consequently, contractions in own tax revenue and other revenue receipts started becoming smaller, with the former returning to positive terrain in Q4:2020-21. Own non-tax revenues, with a small share in total revenue receipts relative to own tax revenue, continued

to lag behind (Chart II.4). Additionally, 22 States/UTs hiked their duties on petrol and diesel and 25 States/UTs hiked duties on alcohol to offset some of the revenue loss. Thus, the total compensation funds which flowed to States amounted to ₹2.01 lakh crore (₹1.10 lakh crore back-to-back loans and ₹0.91 lakh crore compensation cess) (Box II.1).

**Box II.1:**

**GST Compensation Cess in 2020-21 – Accounting Practices among States**

At the time of its introduction, States' revenue subsumed under GST was legislatively<sup>4</sup> protected for the transition period of five years (2017-18 to 2021-22) with the assumption of a constant growth of 14 per cent per annum over the 2015-16 revenue base. Any shortfall was to be funded through additional taxation (compensation cess) on sin/luxury goods. The compensation cess collections were sufficient for the Centre to cover the shortfall in GST collections of State governments in 2017-18 and 2018-19. However, there was a shortfall in cess collection due to the slowdown in economic activity in 2019-20, which increased

further in 2020-21 due to the crippling effect of the pandemic on government finances (Chart 1).

GST compensation for the financial years 2017-18, 2018-19 and 2019-20 has already been paid to the States which recorded these amounts under revenue receipts as grants from the Centre. During 2020-21, the impact of the pandemic warranted higher compensation due to lower GST collections. Further, GST compensation cess collections were lower, widening the gap with the requirement for compensation. In October 2020, the Union

(Contd...)

<sup>4</sup> GST (Compensation to States) Act, 2017 and GST (Compensation to States) Amendment Act, 2018.

Government decided to borrow ₹1.10 lakh crore from the market in tranches during the second half of 2020-21 and provide them as back-to-back loans to States *in lieu of* compensation cess for shortfall in their revenue in 2020-21. Apart from ₹1.10 lakh crore compensation, the Centre had also provided ₹0.91 lakh crore to States out of the GST compensation fund in 2020-21 (Table 1).

Subsequent to deliberations in the 43<sup>rd</sup> GST Council meeting, it has been decided that the Centre will borrow ₹1.59 lakh crore from the market through a special window in the current financial year and pass it on to the States/ UTs as a back-to-back loan in appropriate tranches as was done last year. As per this decision ₹1.59 lakh crore has been released to States/ UTs by October 28, 2021. Besides, the Centre has already released compensation cess of ₹60,000 crore for 2021-22. Also, the GST council voted to extend the levy of compensation cess till March 2026 to enable the Centre to repay loans taken to compensate States for the GST collection shortfall.

So, the Centre has given GST compensation cess to States in 2020-21 in two forms: (1) as grants under revenue receipts, as in previous years; and (2) as back to back loans to State governments. The accounting treatment of the loans raised can have an impact on the GFD and liabilities of States. If the entire amount of cess would have been given in the form of grants, it would have improved the revenue receipts position of States to that order. Given that

**Table 1: GST Compensation Cess Released**

	(₹ crore)	
	2020-21	2021-22
Compensation through back to back loan through special window	1,10,208	1,59,000
Compensation cess released from Fund	91,000	60,000
<b>Total</b>	<b>2,01,208</b>	<b>2,19,000</b>

Source: Press Information Bureau.

part of it is provided as loans, a corresponding reduction in receipts has increased the States' GFD in 2020-21 (RE) to that extent. Given that neither principal nor interest will be paid by States on these loans, they do not have to bear any associated costs. Concomitantly, while the increment in GFD will be added to outstanding liabilities (debt) of States, there is no servicing involved. So, strictly speaking, it should not add to the liabilities of the States.

An analysis of State budgets for 2021-22 reveals that the 26 States/UTs which have availed this facility have followed differential accounting practices (Table 2). The majority have accounted this amount under loans from the Centre. The balance have either accounted this amount under grants from the Centre, which reduces the fiscal deficit, or have not accounted for it at all. It would be useful for the Comptroller and Auditor General of India (CAG) to provide guideline on appropriate and homogeneous treatment in this regard. In this Report, States' fiscal accounts have been compiled on the basis of the varying accounting practices that they have adopted as described above.

**Table 2: Back to Back Loans to States/UTs in 2020-21 (RE)**

State/UT	(₹ crore)	Share (per cent)

## Fiscal Position of State Governments

2.11 States' revenue expenditure increased sharply during April 2020, reflecting the measures taken by them to support life and livelihood, viz., insurance cover for doctors and nurses; purchase of medical equipment and tools; hospital arrangements with sufficient number of beds for COVID-19 patients; providing food free of cost; cash transfer to those who did not avail of any government schemes; cash transfer to registered construction workers; remitting a fixed sum for those residents trapped in other States; and advance salary and pension payments (Chart II.5 and Table II.4). Some States also adopted revenue expenditure rationalisation measures like dearness allowance freeze, deferment of part or full salaries and wages, and deduction from salaries to create fiscal space for accommodating higher expenditure on medical and social services.

2.12 After a dip in April 2020, capex growth recovered swiftly in the second half of the year,

which augers well for the economy in the medium-term. To boost capital expenditure by the States, the Centre announced the scheme of “Special

Assistance to States for Capital Expenditure” on October 12, 2020 as part of the *Aatma Nirbhar Bharat* package. Capital expenditure proposals of ₹11,912 crore for 27 States were approved under this scheme by the Centre to fund projects in sectors like health, rural development, water supply, irrigation, power, transport, education and urban development.

## 5. Budget Estimates for 2021-22

2.13 For 2021-22, States have budgeted the GFD-GDP ratio at 3.7 per cent, with most of them breaching the 3.0 per cent threshold (Table II.5 and Chart II.6). The improvement over 2020-21 is expected to be achieved through higher revenue receipts. States have also budgeted a revenue deficit, departing from the recent practice

**Table II.5: Deficit Indicators of State Governments: State-wise**

of budgeting a revenue surplus. Most of the States have presented their budget before the onset of the second wave of COVID-19.

### Receipts

2.14 States expect higher revenue receipts in 2021-22, primarily driven by their own tax revenue from SGST, States' excise duty and sales tax collections (Table II.2). Tax devolution from the Centre is also budgeted to increase on the expectation of higher revenue collection by the Centre from different heads. In addition, ₹1.59 lakh crore has already been given to the States by the Centre for GST compensation in the form of back-to-back loans and ₹0.60 lakh crore from GST compensation fund, as explained in Box II.1.

### Expenditure

2.15 States' total expenditure is budgeted to increase moderately in 2021-22. This expenditure growth is expected to be driven by capex, while revenue spending (as a per cent of GDP) will be compressed (Table II.4). Expenditure on social

services, which recorded a sharp increase during 2020-21(RE) due to higher spending on medical and health services, is budgeted to increase further in 2021-22 (Chart II.7). Within social services, the share of water supply and sanitation, housing, urban development, and social security is expected to get a boost

RE: Revised Estimates.

BE: Budget Estimates.

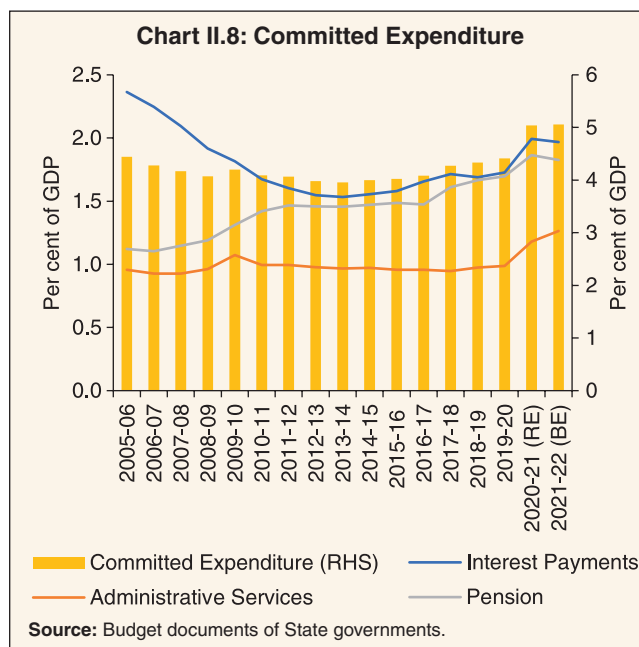

Source : Budget documents of State governments.

(Table II.6). States have budgeted a marginal increase in committed expenditure in 2021-22, led primarily by administrative expenditure (Chart II.8).

2.16 They have also budgeted a higher capital outlay in 2021-22 (BE) *vis-à-vis* 2020-21(RE), mainly in social services. As a result of the need to upscale health infrastructure in the face of the multi-year nature of pandemic, higher spending is budgeted in medical and public health. Capex outlays have also been increased for urban development, water supply and sanitation, irrigation and transport (Chart II.9).

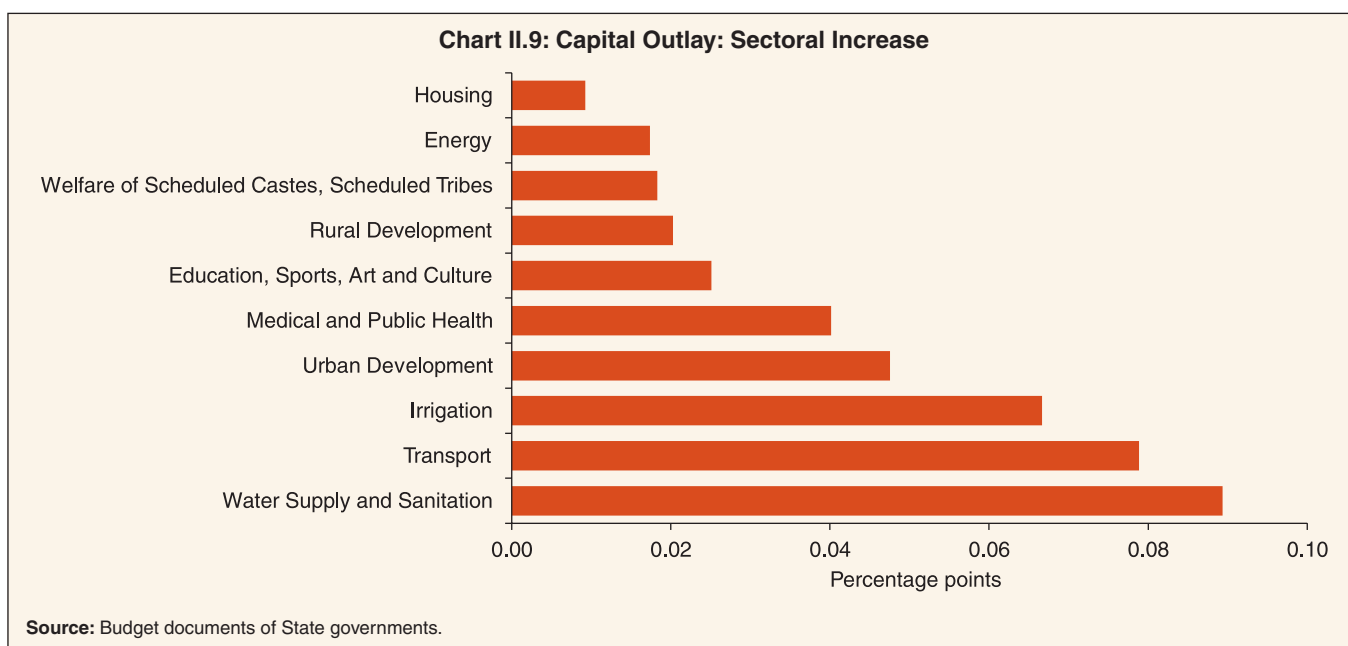

#### Actual Outcome in 2021-22 So Far

2.17 Monthly data from the CAG indicate that States' revenue receipts increased sharply on a y-o-y basis in H1:2021-22. States' revenue receipts are running higher than in H1:2019-20 (pre-COVID year) as well, despite the adverse

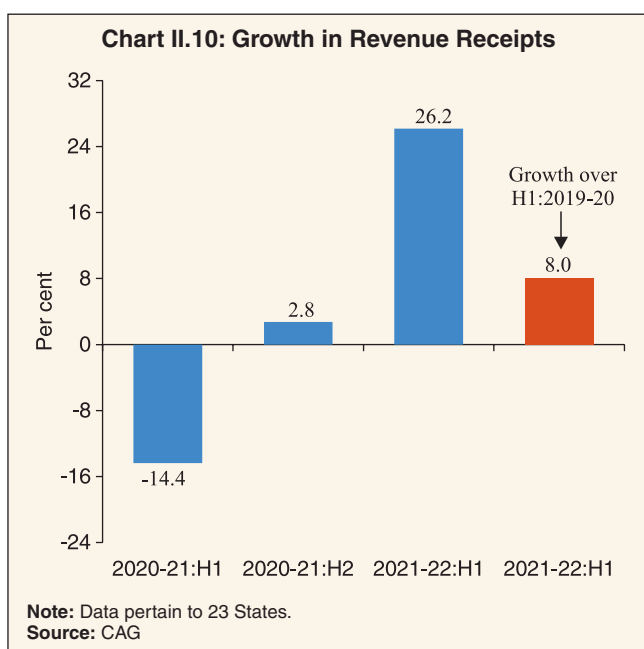

impact of localised restrictions imposed in the wake of the second wave (Chart II.10).

## Fiscal Position of State Governments

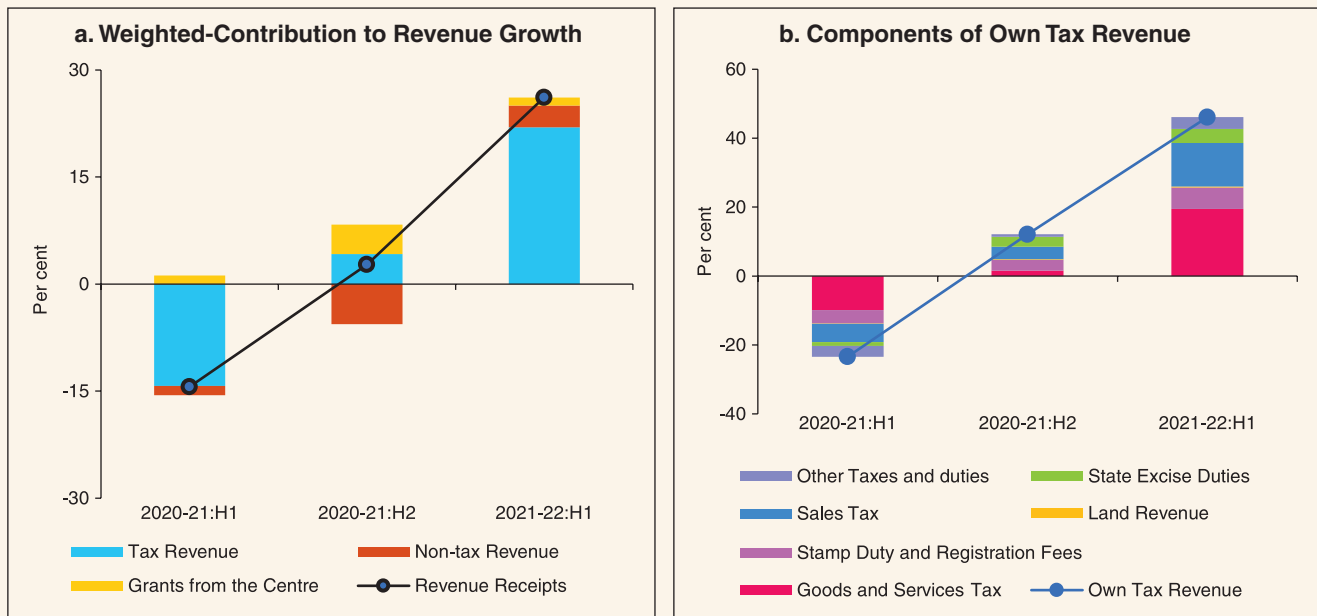

2.18 At a disaggregated level, revenue receipts were largely driven by own tax revenue and non-tax revenue in H1:2021-22 (Chart II.11a). Among own tax revenue sources, States' GST and sales tax collections performed relatively better during this period (Chart II.11b). Following the Centre's move to reduce excise duty on petrol and diesel

by ₹5 and ₹10 per litre, respectively, on November 3, 2021, 21 States and UTs (with legislature) have also reduced their value added tax (VAT) in the range of ₹1.8 to ₹10.0 per litre for petrol and ₹2.0 to ₹7.0 per litre for diesel. The revenue loss to States due to reduction in VAT is estimated at 0.08 per cent of GDP. This, however, is expected to generate counter-cyclical policy response and translate into a positive impact on GDP, especially, if States abstain from spending cuts to compensate their revenue loss.

2.19 The second wave forced States to provide financial support to different sections of society during the first few months of the year. For instance, three States, viz., Odisha, Kerala and Karnataka, have explicitly announced relief packages amounting to around ₹22,000 crore (0.1 per cent of GDP). Other States have also made additional COVID related spending. The government of Tamil Nadu incurred additional expenditure of ₹17,618.8 crore on COVID related relief, including cash support and additional food subsidies. Consequently, the revenue expenditure

Chart II.11: Weighted-Contribution to Revenue Growth

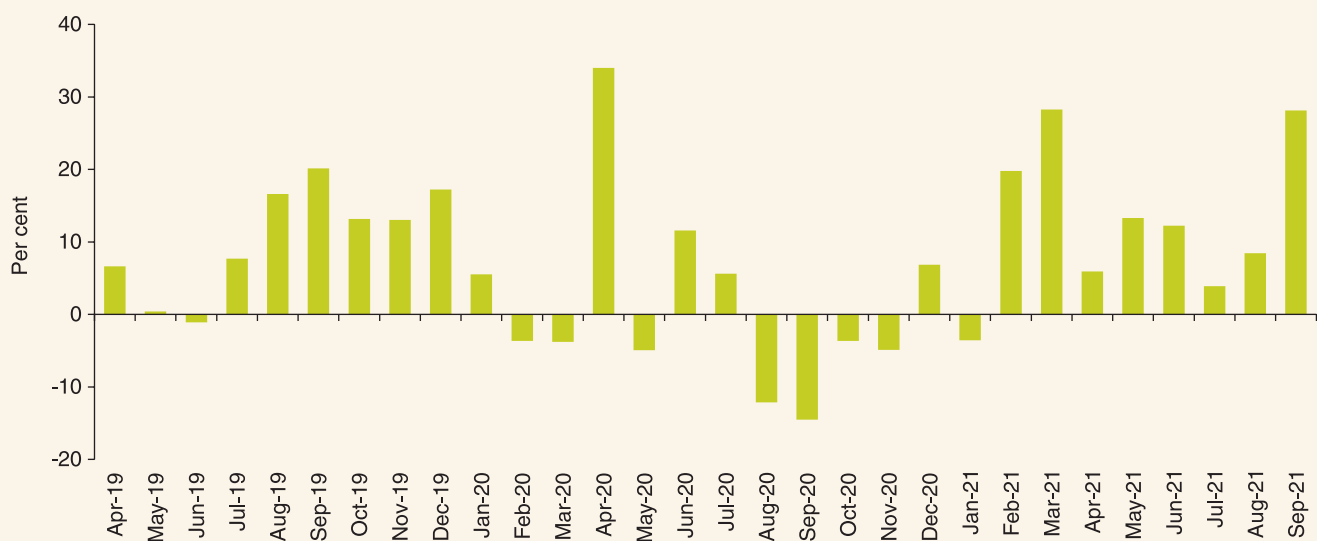

Note: Data pertain to 23 States.  
Source: CAG

of the State governments increased sharply in May 2021 before subsiding by July (Chart II.12). In September, revenue spending increased sharply in line with robust revenue receipt growth. Chhattisgarh, Kerala, Madhya Pradesh,

Meghalaya, Punjab, Rajasthan and Telangana received permission to borrow an additional amount of ₹16,691 crore as an incentive on achieving the capital expenditure target set by the Ministry of Finance for H1:2021-22.

## 6. Expenditure Plans by States in 2021-22

2.20 The twin impact of a contraction in economic activity and increase in the fiscal deficit to accommodate the fiscal stimulus has resulted in a worsening of debt to GDP ratios of States. Even as the sharp expenditure cutback by the Centre is expected to bring about a deceleration in the growth of primary expenditure of the general government in 2021-22 (BE), the budget estimates of the States

reveal a continuation of robust expenditure growth (Chart II.13a and b).

2.21 In terms of the composition of States' spending, enhancing social protection, improving human capital (healthcare and education) and building physical infrastructure have assumed critical importance during the pandemic. It is also necessary to improve expenditure on research and development to optimise benefits from the above three expenditure categories (Box II.2).

Chart II.13: Primary Expenditure Growth of Centre and States

\* Centre's primary expenditure is net of grants to States.

### Box II.2: Research and Development Related Expenditure by States

One of the six themes around which the Union Budget of India 2021-22 is organized is 'Innovation and R&D.' This theme underpins the modalities of the National Research Foundation, which was announced in 2019. The Union Budget aims to spend ₹5,000 crores on this head over the next five years. According to the Report on R&D Statistics and Indicators 2019-20 of the Ministry of Science and Technology (India)<sup>5</sup>, the gross expenditure on research and development (GERD) in India was 0.7 per cent of GDP in 2017-18, which is lower than other BRICS countries – GERD was 1.3 per cent of GDP in Brazil; 1.1 per cent in Russian Federation; 2.1 per cent in China; and 0.8 per cent in South Africa. Most of the OECD countries spend more than 2 per cent of their GDP on R&D.

In this box:

- in the first step, expenditure under two major heads *i.e.*, (i) Agricultural Research and Education; and (ii) Science, Technology and Environment are collected from the annual financial statements (AFS) of each State.
- Given the possibilities that there may be some additional expenditures on R&D made by the State governments which are not covered under the two major heads of the AFS, the book-wise<sup>6</sup> budget documents of each State are examined for the keyword 'Research' (or 'अनुसंधान' if the budget is published in Hindi) and aggregated.

- In the third step, the detailed demand book data (department-wise) for research instead of the data given in the AFS are taken in case of discrepancies *vis-à-vis* the latter.
- In the fourth step, the R&D expenditures are classified into few broad categories *viz.*, Medical; Health; Family Welfare and Sanitation; Education; Labour Research; and Infrastructure Research.

Based on this compilation method, the consolidated R&D related expenditure of the State governments works out to a meagre 0.2 per cent GDP for both 2018-19 and 2019-20. There is, however, a considerable variation in the R&D related expenditure across States (Chart 1).

The detailed classification reveals that a significant portion of the R&D related expenditure was incurred on medical, health, family welfare, and sanitation (63.4 per cent in 2018-19 and 66.2 per cent in 2019-20 RE) (Chart 2). The share of agriculture research in total R&D expenditure stood at 27.4 per cent in 2018-19 and 23.5 per cent in 2019-20. The share of R&D expenditure on environment research has increased from 0.5 per cent in 2018-19 to 2.1 per cent in 2019-20, whereas the share of R&D related expenditure on education has remained unchanged at 1.3 per cent. In a pilot study for a few States, it was found that

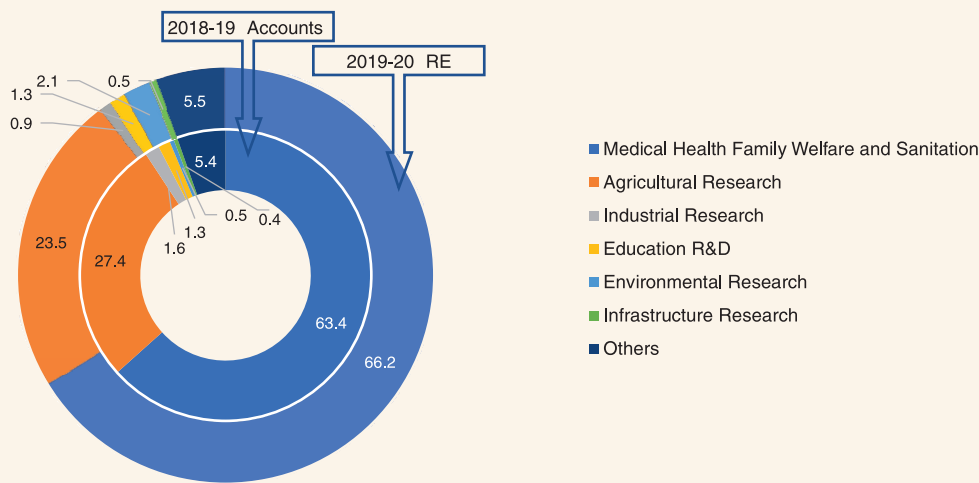

(Contd...)

<sup>5</sup> Based on a survey of more than 6800 Science and Technology Institutions spread across varied sectors like central government, State governments, higher education, public sector industry, and private sector industry in the country. According to the Ministry of Science and Technology response rate of more than 90 per cent was achieved in the survey.

<sup>6</sup> department-wise.

Chart 2: Sectoral Shares in R&D Related Expenditure by States (per cent)

the bulk of R&D expenditures was administrative in nature, whereas the programme expenditure component was low.

OECD (2011), Special Feature: Governments' role in promoting R&D, Public Finance and Economics, Government at a Glance 2011, OECD Publishing, Paris.

2.22 The expenditure of States on social safety nets<sup>7</sup> saw a sharp upturn in 2020-21(RE) across all sub-categories. In 2021-22 (BE), deceleration in expenditure on nutrition programme and contraction in expenditure on natural calamities is budgeted (Chart II.14a). Despite a sharp increase compared to pre-COVID years, expenditure on healthcare at 6.6 per cent of primary expenditure in 2021-22 is significantly lower than the 8 per cent target set by the National Health Policy 2017 (Chart II.14b). Expenditure on education

moderated in 2020-21 (RE) but is budgeted to recover in 2021-22 (Chart II.14c). States have budgeted significantly higher capital expenditure in 2021-22 than in preceding years (Chart II.14d).

2.23 The fifteenth Finance Commission (FC-XV) has recommended sector-specific grants from the Union Government to protect vulnerable communities. It has also recommended relaxed borrowing limit for State governments to create fiscal space for accommodating priority expenditure.

<sup>7</sup> include expenditure on social security and welfare, labour and labour welfare, nutrition and relief on account of natural calamities.

Chart II.14: Composition of States' Expenditure: Key Components

**Notes:** Expenditure on social safety nets includes 'social security and welfare', 'labour and labour welfare', 'nutrition' and 'relief on account of natural calamities'.

**Sources:** States' budget documents.

## 7. Role of Finance Commission Transfers

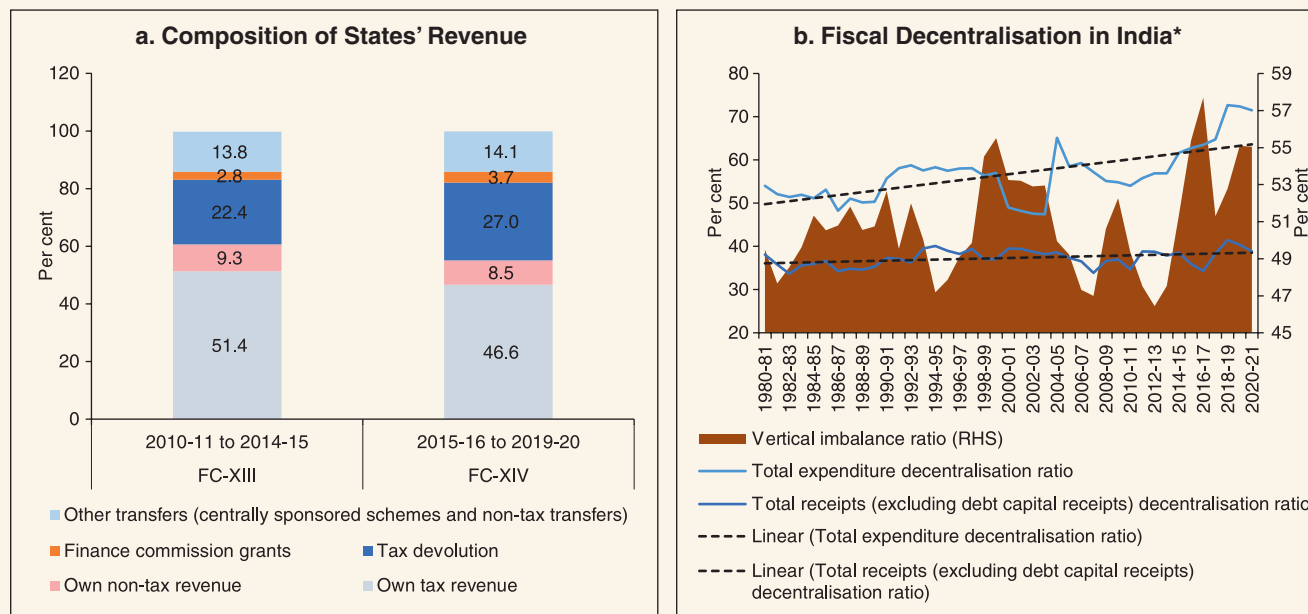

2.24 The Finance Commission (FC), appointed by the President of India under Article 280 of the constitution is the most important institution governing the transfer of resources from the Union Government to States. It recommends the share of taxes collected by the Centre to be devolved to States and its *inter-se* distribution among different States (Article 270). In addition, FCs recommend revenue grants to States for various purposes (Article 275). Although the composition of these

grants has varied over time, grants for bridging the post-devolution revenue deficit of States have been the mainstay, and grants to local bodies have accounted for an increasing share (RBI, 2021b).

2.25 In the period between 2015-16 to 2019-20, corresponding to the tenure of the Fourteenth Finance Commission (FC-XIV), FC transfers averaged 30.9 per cent of States' revenues. The overall reliance of States on central transfers increased in this period compared to the five years prior (corresponding to the tenure of the Thirteenth

Chart II.15: Central Transfers: Stylised Evidence

\*: Vertical imbalance ratio is defined as the share of States expenditure that is not funded by its own resources; *i.e.*,  $1 - \text{States' own receipts} / \text{States' expenditure}$ . Total expenditure decentralisation ratio =  $\text{States expenditure} / \text{general government expenditure}$ . Total receipts (excluding debt capital receipts) decentralisation ratio =  $\text{States own receipts (excluding debt capital receipts)} / \text{general government receipts (excluding debt capital receipts)}$ .

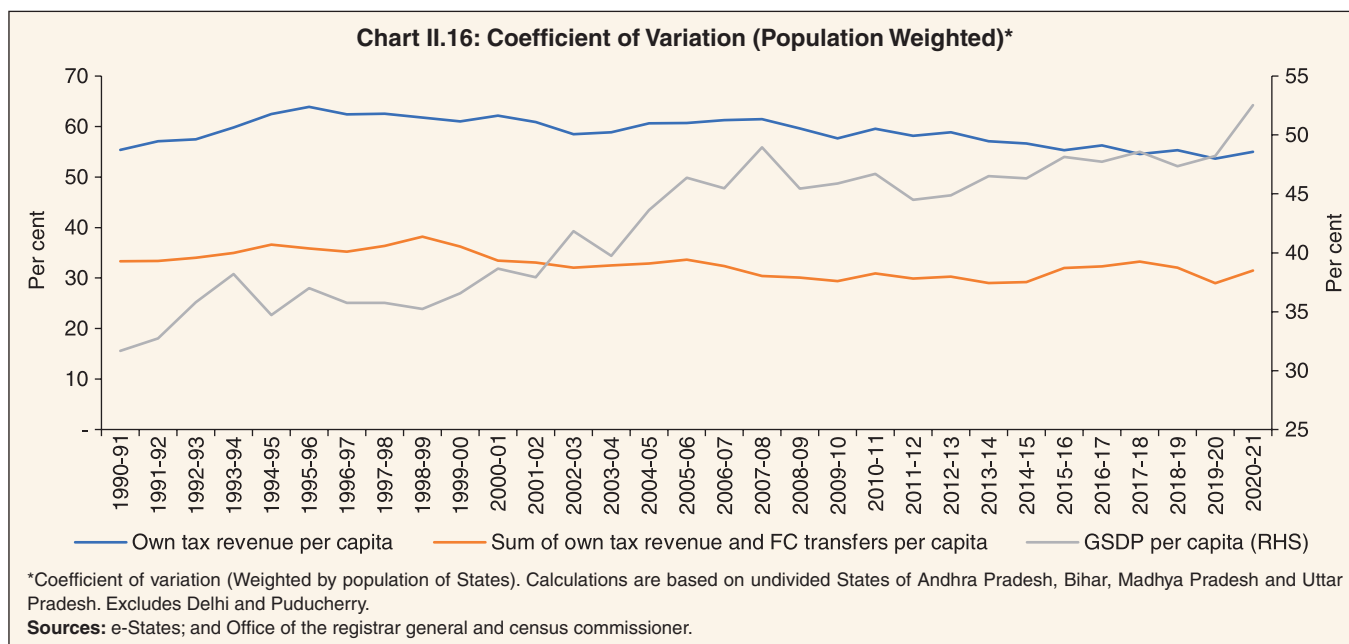

Sources: e-States; and Union budget documents.

Finance Commission) (Chart II.15a). The increase in transfers has helped offset the increase in asymmetry (vertical imbalance) between the decentralisation of receipts and expenditure (Chart II.15b).

2.26 Regarding the share of individual States in tax devolution and grants, FCs have traditionally been guided by considerations of need, equity and efficiency. The distribution of Finance Commission transfers (tax devolution and grants) has a progressive element, aimed at mitigating the inherent fiscal disabilities of poorer States and enabling them to provide basic services and incur development expenditure. On a standardised measure of variability – the coefficient of variation (CoV) – Finance Commission transfers are found to reduce this inherent variability in States' own tax revenue, thus ensuring fiscal convergence (Chart II.16).

2.27 Under the FC-XV's recommendation presented to the Parliament on February 1, 2021 relating to resource transfers to States during 2020-21 to 2025-26, *status quo* (after adjusting for the share of Jammu and Kashmir) is proposed on the tax devolution ratio at 41 per cent but changes are envisaged in the ratio of allocation to individual States.

2.28 On revenue grants, the FC-XV has made a departure *vis-à-vis* earlier commissions. In addition to grants for bridging the revenue deficit, funding local governments and augmenting disaster relief funds, FC-XV has given a thrust to social sector grants with a particular focus on health and education. In addition, the commission has recommended sectoral grants for agriculture, rural roads, aspirational districts, judiciary and statistics. The Union Government has, however, not accepted the commission's recommendations

except for health sector grants. As regards grants for local government, the commission has attached entry-level conditions for access.

2.29 Considering the extraordinary fiscal stress from the pandemic on State finances and the potential need for stimulus for recovery in the years ahead, FC-XV has proposed relaxations in the borrowing limits for States. The normal limit of net borrowing has been fixed at 4 per cent of GSDP for 2021-22, 3.5 per cent for 2022-23 and 3 per cent for 2023-24 to 2025-26. An additional conditional borrowing of 0.5 per cent of GSDP has been proposed for the years 2021-22 to 2024-25, predicated on reforms in the power distribution sector.

## 8. Financing of GFD and Market Borrowings by State Governments

### Financing of GFD

2.30 The dependence of States on market borrowings for the financing of GFD has been secularly increasing from less than 15 per cent in 1994-95 to 94.8 per cent in 2019-20. Following

the recommendation of the FC-XIV to exclude States (barring Delhi, Madhya Pradesh, Kerala and Arunachal Pradesh) from the National Small Savings Fund (NSSF) financing facility, the share of market borrowing in financing the GFD of States jumped to an all-time high in 2019-20. While the share of market borrowing declined in 2020-21 (RE), it is budgeted to increase in 2021-22 (BE) (Table II.7).

### Market Borrowing

2.31 The gross market borrowing of States/UTs picked up to ₹7.99 lakh crore in 2020-21 – a growth of 25.9 per cent – from ₹6.35 lakh crore a year ago. The higher borrowings reflect pandemic-related uncertainty around revenue collections and higher government expenditure (Chart II.17). During H1:2021-22, the gross market borrowing was 12.6 per cent lower than the corresponding period of last year.

2.32 Net market borrowing grew by 33.7 per cent to ₹6.52 lakh crore in 2020-21 and contracted by 21.2 per cent during H1:2021-22 relative to the corresponding period a year ago. The increase

in net market borrowing was concentrated in a few States like Assam, Bihar, Himachal Pradesh, Jammu and Kashmir, Jharkhand, Nagaland, Sikkim, Uttar Pradesh and West Bengal

(Chart II.18). As per the recently released indicative calendar, States are expected to avail ₹2.02 lakh crore of market borrowing during October-December 2021.

State Finances : A Study of Budgets of 2021-22

2.33 During 2020-21, the States undertook 742 issuances (of which 56 were re-issuances) as against 636 issuances in 2019-20 (of which 114 were re-issuances). Following the policy of passive consolidation, States such as Madhya Pradesh, Maharashtra, Punjab and Tamil Nadu undertook re-issuances in 2020-21. Passive consolidation of States continued during H1:2021-22 as out of

262 issuances undertaken by States, 21 were re-issuances (Table II.8).

2.34 The standard plain vanilla issuances amounted to 36.3 per cent of the total amount of issuances in 2020-21. The rest (64.7 per cent) was spread across non-standard maturities. Twenty-six States and the UT of Puducherry issued securities of non-standard maturities, ranging between 1.5

Source: Reserve Bank records.

2.35 At the beginning of Q1:2020-21, the SDL yields traded with a softening bias (Chart II.19b). From end-June 2020, various developments, viz., a downgrade of India's sovereign credit rating outlook by Fitch Ratings coupled with higher supply kept SDL yields firm till September. Thereafter, yields softened as the Reserve Bank increased the limit of SLR securities kept under the held to maturity (HTM) category by 2.5 per cent of NDTL – from 19.5 per cent to 22 per cent. During February 2021, SDL yields were additionally impacted by international factors, viz., rise in US yields and crude oil prices. Overall, the weighted average (cut-off) yield (WAY) of SDLs issued during 2020-21 stood at 6.55 per cent, compared with 7.24 per cent a year ago. The weighted average spread of SDL issuances over corresponding tenor of Union Government G-Sec stood at 52.72 basis points (bps) in 2020-21 as compared with 55.02 bps in the previous year. The average inter-State spread during 2020-21 stood at 10 bps as against 6 bps a year ago; by mid-July 2021, it declined to around 5 bps. During 2021-22 so far (up to September 30, 2021), the WAY of SDLs stood at 6.88 per cent, while the weighted average spread of SDL issuances over corresponding tenor of Union Government G-Sec stood at 47.74 bps. The average inter-State spread on securities of 10-year tenor (fresh issuances) was 4 bps in H1:2021-22 as compared with 9 bps in H1:2020-21.

#### *Status of Additional Market Borrowing*

2.36 Given the additional expenditure requirements in order to cope with the pandemic, the Centre allowed States additional borrowing of up to 2 per cent of GSDP for the year 2020-21 on May 17, 2020. Within this additional borrowing limit, 0.5 per cent was kept unconditional; 1 per cent was linked to four citizen-centric areas of reforms: (i) implementation of One Nation One

Chart II.19: SDLs - Maturity and Yield Spread

Ration Card System, (ii) ease of doing business reform, (iii) urban local body/ utility reforms and (iv) power sector reforms; and the remaining 0.5 per cent was linked to the completion of at least 3 reforms mentioned above.

2.37 One Nation One Ration Card system ensures the availability of rations to beneficiaries under the National Food Security Act (NFSA) and other welfare schemes, especially migrant workers and their families at any electronic point of sale (e-PoS) enabled Fair Price Shop (FPSs) of their choice anywhere in the country. It also enables States to target beneficiaries better and eliminate bogus/duplicate/ineligible card-holders. An additional borrowing limit of 0.25 per cent of GSDP is allowed to States only on completion of both of the following actions: (i) *Aadhar* Seeding of

all the ration cards and beneficiaries in the State; and (ii) Automation of all the FPSs in the State. During 2020-21, 17 States could comply with this reform and received permission to raise ₹37,600 crore from the Centre.

2.38 For ease of doing business, the recommended reforms include: (i) completion of the first assessment of 'District Level Business Reform Action Plan'<sup>8</sup>; (ii) elimination of the requirements of renewal of registration certificates/approvals/licences obtained by businesses under various Acts; and (iii) implementation of a computerised central random inspection system. During 2020-21, 20 States could complete the reform and accordingly, the Centre granted permission to raise additional financial resources of ₹39,521 crore through market borrowings.

<sup>8</sup> A comprehensive 218-point District Reform Plan has been prepared and shared with the State Governments with a request to implement the same in the districts. The Action Plan is spread across 8 areas: Starting a Business for Construction, Urban Local Body Services, Paying Taxes, Land Reform Enabler, Land Administration and Property Registration Enablers, Obtaining Approval, Miscellaneous and Grievance Redressal/ Paperless Courts and Law & Order.

2.39 Urban utility reforms aim to financially strengthen urban local bodies (ULBs) and enable them to provide better public health and sanitation services to citizens. The set of reforms stipulated by the Centre to achieve these objectives are: (i) the State will notify: (a) floor rates of property tax in ULBs which are in consonance with the prevailing circle rates (*i.e.* guideline rates for property transactions), and (b) floor rates of user charges in respect of the provision of water supply, drainage and sewerage which reflect current costs/past inflation; (ii) the State will put in place a system of periodic increase in floor rates of property tax/user charges in line with price increases. Eleven States successfully undertook this reform and were granted additional open market borrowing permission of ₹15,957 crore in 2020-21.

2.40 Under power sector reform, States can get an additional borrowing of 0.25 per cent of GSDP if they can: (i) meet the target set for the reduction in aggregate technical and commercial (AT&C) losses (0.05 per cent of GSDP); (ii) achieve the targeted reduction in the gap

between average cost of supply and average revenue realisation (ACS-ARR) (0.05 per cent of GSDP); and (iii) implement direct benefit transfer (DBT) of electricity subsidy to farmers (0.15 per cent of GSDP). As many as 13 States successfully met the target of either (i) or (ii), while six States undertook the third reform in the power sector. These States were granted additional borrowing permission of ₹13,201 crore.

2.41 The final instalment of 0.5 per cent was linked to carrying out at least three out of four reforms stipulated by the Government of India. However, the conditionality was waived later, and all the States were granted permission for this additional borrowing. The relaxation of borrowing limits and deviations from the FRL target during the pandemic calls for a revised fiscal roadmap aimed towards fiscal consolidation in the medium term (Box II.3).

#### *Financial Accommodation to States*

2.42 The Report of the Advisory Committee on Ways and Means Advances to State

### **Box II.3:**

#### **Revised Fiscal Roadmap for States - An Analysis**

After restraining the consolidated GFD-GDP ratio within 2.6 per cent during 2017-18 to 2019-20, State finances deteriorated in 2020-21 due to the adverse impact of the COVID-19 pandemic. The GFD widened to 4.7 per cent of GDP in 2020-21 (RE), which is the highest since 2003-04<sup>9</sup>. The RD, which was eliminated in 2018-19, widened to 2.0 per cent of GDP in 2020-21 (RE) caused by shortfall in revenue receipts and higher revenue expenditure on healthcare and other social services. The primary deficit, which was contained at 0.7 per cent of GDP during 2017-18 to 2019-20, also increased to 2.7 per cent of GDP in 2020-21 (RE).

In view of States' fiscal stress, the Centre allowed additional borrowing limit in 2020-21, as explained earlier, with clauses to ensure effective utilisation as well as to account for off-

budget borrowings. While the States have been sanctioned borrowing limit of only 3.5 per cent of GSDP for 2021-22 upfront, the balance 0.5 per cent has been earmarked for incremental capital expenditure, which will be reviewed by the Centre thrice during the year. Also, the borrowing limit gets adjusted in accordance with States' failure to take over the DISCOM losses as per UDAY guidelines - 50 per cent of the States' unreimbursed losses of DISCOMS for the year 2020-21 will be deducted from the borrowing ceiling of 2021-22.

After considering the relaxations extended to the States in terms of borrowing limits, the FC-XV has provided a revised fiscal roadmap which aims at phasing out the incentive-

(Contd...)

<sup>9</sup> The cyclically adjusted (HP filter) gross fiscal deficit for States amounted to 3.4 per cent of GDP in 2020-21.

**Table 1: Net Borrowing Limits recommended as Fiscal Consolidation Roadmap for States (FC-XV)**

(Per cent of GDP)					
Item	2021-22	2022-23	2023-24	2024-25	2025-26
Revised limit proposed by FC-XV	4.0	3.5	3.0	3.0	3.0
Incentive-based extra borrowing	0.5	0.5	0.5	0.5	
Upper net borrowing limit	4.5	4.0	3.5	3.5	3.0
Lower net borrowing limit	3.0	3.0	3.0	3.0	3.0

**Source:** Report of FC-XV.

based additional borrowing limit by 2025-26 (Table 1). During the first two years, the relaxed fiscal limits are aimed at ensuring no sudden drop in resource availability for States, with a return to the pre-pandemic fiscal target of 3 per cent by 2023-24.

These estimates, however, are subject to the assumptions made by the FC-XV at the time of making projections and may deviate from the actual outcome with changes in economic conditions. For instance, the budget estimates of States for 2021-22 indicates a GFD-GDP ratio of 3.7 per cent, 30 basis points lower than the FC-XV projection (4 per cent). Second, the FC-XV did not anticipate the arrival of the second wave in the first half of 2021-22, and accordingly,

**Table 2: States' Rolling Target of GFD**

State	2021-22	2022-23	2023-24
Arunachal Pradesh	2.2	2.3	2.4
Assam	4.0	3.2	3.0

**Source:** States' FRBM statement.

its assumptions on States' revenue, expenditure and GDP may vary from actual outcomes. So far, the States' rolling targets indicate their consolidation intention, as evident from the heat map (Table 2).

Governments (Chairman: Shri Sumit Bose) that was constituted in 2015 reviewed the Ways and Means Advances (WMA) limits of the States and retained the limit at ₹32,225 crores for all States/UTs together. The WMA limit of States/UTs was increased by 60 per cent on April 17, 2020 (to ₹51,560 crore) over the level of ₹32,225 crore prevailing on March 31, 2020. In order to provide greater flexibility to State governments to tide over their cash-flow mismatches, the overdraft (OD) scheme for State governments was relaxed on April 7, 2020, whereby the number of days a State can continue to be in OD was increased from 14 to 21 consecutive working days and from 36 to 50 working days in

a quarter. These interim measures were initially valid until September 30, 2020 and were later extended till March 31, 2021. Subsequently, the Advisory Committee on Ways and Means Advances to State Governments (Chairman: Shri Sudhir Shrivastava) reviewed the WMA limits (Box II.4). Considering the uncertainties related to the ongoing pandemic, the Reserve Bank decided to continue with the enhanced WMA limits up to March 31, 2022. During 2020-21, 18 States/UTs have availed the special drawing facility (SDF), 15 States/UTs resorted to WMA, and 8 States/UTs availed OD. During 2021-22:H1, 14 States/UTs have availed SDF, 14 States/UTs resorted to WMA and 6 States/UTs availed OD.

**Box II.4:**

**Advisory Committee on Ways and Means Advances to State Governments - Key Recommendations**

Ways and means advances (WMA) to States are periodically reviewed. Following the decision taken in the 31<sup>st</sup> Conference of State Finance Secretaries held on March 18, 2019, the Reserve Bank set up the Advisory Committee on WMA in August 2019 (Chair: Shri Sudhir Shrivastava) which made the following recommendations:

- The Committee calculated WMA limits on the basis of the total expenditure of State governments so as to correspond to the fiscal size of States. The formula-based revised limit works out to ₹47,010 crore. As the formula-based WMA limit was lower than the interim limit, the Committee was of the view that the interim WMA limit of ₹51,560 crore may continue for 6 months *i.e.*, up to September 30, 2021. Thereafter, depending on the course of the pandemic and its impact on the economy, the Reserve Bank may review the limit, either based on the methodology suggested by the Committee or as may be necessary, after assessing the requirement of States. The Committee also recommended that the prevailing interest rate on SDF/ WMA/ OD may be retained.
- The OD Regulations may continue and the interim relaxations on OD may cease to exist by March 31, 2021. The Committee recommended that the operating limit of SDF should continue to be calculated against the collateral of investments in G-sec/ ATBs and the annual incremental investments in the consolidated sinking fund (CSF) and guarantee redemption fund (GRF) without any upper limit, and the usual haircut margin of 5 per cent shall be applied.
- The limitation on availing SDF against investment in 91-day Treasury Bills (T-bills) may be removed and States may be allowed to invest in 91-day T-bills without the restriction of 90 days, provided the SDF/ WMA availed prior to such investment is fully repaid. Likewise, permitting States to invest their cash surplus in Auction Treasury Bills (ATBs) only when they have not availed WMA in the immediately preceding period of 90 consecutive days may also be removed. However, States may not avail SDF after investing their cash balances in 91-day T-bills.
- The CSF and GRF are reserve funds, constituted voluntarily by States for a specific purpose, and need to be built up. Hence, the Committee urged the remaining States to join CSF/ GRF schemes, which would facilitate withdrawals to repay liabilities in times of need, and to avail SDF for managing temporary cash flow mismatches. The Committee recommended that a minimum corpus of at least 5 per cent of the total liabilities/ guarantees outstanding at the end of the previous financial year may be built in CSF and GRF within the next 5 years, which may be maintained on a rolling basis thereafter.
- Withdrawals from the CSF may be allowed after a lock-in period of 2 years from constituting the Fund in place of the prevailing lock-in period of 5 years. The limit on the quantum of withdrawal from the CSF to the amount of redemption due for that year towards market borrowing may be removed. States may be allowed to use the total quantum of interest accrued and accumulated in the Fund (up to the end of previous financial year) for repayment of outstanding liabilities. On building the minimum corpus, States may be allowed to withdraw from CSF any sum in excess of the minimum corpus for repayment of outstanding liabilities.
- The provision in CSF/ GRF schemes which necessitate consultation with State governments for selection of securities in case of premature disinvestment from CSF/ GRF may be removed for operational convenience. The Reserve Bank may be allowed to decide on the securities to be liquidated, provided the securities chosen for disinvestment are in profit at the time of sale. States may, accordingly, amend their CSF and GRF schemes and notify the same in their Official Gazettes.

*Cash Management of State Governments*

2.43 In recent years, States/UTs have been accumulating sizeable cash surpluses in intermediate treasury bills (ITBs) and auction treasury bills (ATBs). Although positive cash balances indicate low intra-year fiscal pressure, they involve a negative carry on interest rates,

warranting improvement in cash management practices. The outstanding investments of States in ITBs as at end-March 2021 stood at ₹2,05,230 crore as against ₹1,54,757 crore in the previous year, while outstanding investments of States in ATBs stood at ₹41,293 crore at end-March 2021 as against ₹33,504 crore at end-March

**Table II.10: Investment of Surplus Cash Balance of State Governments/UT (Outstanding as on March 31)**

(₹ crore)					
Item	2017-18	2018-19	2019-20	2020-21	2021-22*
1	2	3	4	5	6
14-Day (ITBs)	1,50,871	1,22,084	1,54,757	2,05,230	1,20,777
ATBs	62,108	73,927	33,504	41,293	96,510
<b>Total</b>	<b>2,12,979</b>	<b>1,96,011</b>	<b>1,88,261</b>	<b>2,46,523</b>	<b>2,17,287</b>

#: As on September 30, 2021.

Source: Reserve Bank of India.

2020 (Table II.10). During 2021-22 so far (as on September 30, 2021) outstanding investments of States in ITBs stood at ₹1,20,777 crore, while outstanding investments of States/UTs in ATBs stood at ₹96,510 crore.

#### States' Reserve Funds

2.44 Given the increasing borrowing requirements of States and mounting contingent liabilities, it is desirable to keep adequate buffers to minimise the fiscal stress arising from redemption pressures and unforeseen liabilities. State governments maintain the Consolidated Sinking Fund (CSF) and the Guarantee Redemption Fund (GRF) with the Reserve Bank as a buffer for repayment of their future liabilities. States can also avail a special drawing facility (SDF) at a discounted rate from the Reserve Bank against incremental funds invested in CSF and GRF. Currently, 24 States and one Union Territory are members of the CSF scheme, while 17 States are members of the GRF scheme (Table II.11). Outstanding investment by States in the CSF and GRF stood at ₹1,27,208 crores and ₹8,405 crore, respectively, as at end-March 2021, as against ₹1,30,431 crore and ₹7,486 crore, respectively, as at end-March 2020.

## 9. Outstanding Liabilities

2.45 In recent years, States' outstanding debt has showed a gradual upward movement due to *inter alia* implementation of UDAY, farm loan waivers, and the growth slowdown in 2019-20. Pandemic-related revenue losses and additional expenditure increased the debt-GDP ratio in 2020-21 (RE) (Table II.12). The debt-GSDP ratio is expected to increase for 18 States and UTs during 2021-22 (Statement 20).

## Fiscal Position of State Governments

**Table II.12: Outstanding Liabilities of State Governments and UTs**

Year	Amount	Annual Growth	Debt /GDP
(End-March)	(₹ lakh crore)	(Per cent)	
1	2	3	4
2013	22.45	10.6	22.6
2014	25.10	11.8	22.3
2015	27.43	9.3	22.0
2016	32.59	18.8	23.7
2017	38.59	18.4	25.1
2018	42.92	11.2	25.1
2019	47.87	11.5	25.3
2020	53.51	11.8	26.3
2021 (RE)	61.49	14.9	31.1
2022 (BE)	69.47	13.0	31.2

RE: Revised Estimates. BE: Budget Estimates.

**Sources:** 1. Budget documents of State governments.  
2. Combined Finance and Revenue Accounts of the Union and the State Governments in India, Comptroller and Auditor General of India.  
3. Ministry of Finance, Government of India.  
4. Reserve Bank records.

2.46 The ratio of interest payment to revenue receipts has been increasing in recent years at a steady pace, indicating erosion of debt sustainability (Chart II.20).

### Composition of Debt

2.47 Market borrowing, the largest component of outstanding debt, is expected to reach 63 per cent at end-March 2022 (Table II.13). On the other hand, the shares of NSSF, loans from banks and financial institutions and public accounts in total outstanding liabilities of the States have declined over the years. The declining trend in borrowings

**Table II.13: Composition of Outstanding Liabilities of State Governments and UTs**  
(As at end-March)

Item	(Per cent)

from the Centre reversed in 2020-21 with GST compensation in the form of back-to-back loans from the Centre.

### Contingent Liabilities of States

2.48 After the implementation of UDAY, States could reduce their outstanding guarantees to 2 per cent of GDP in 2016-17 (Table II.14). In recent years, however, the guarantees have been rising again, reaching 2.9 per cent of GDP at end-March 2020, with implications for debt sustainability (Box II.5).

**Table II.14: Guarantees issued by State Governments**

Year (End-March)	Guarantees Outstanding	
	₹ lakh crore	Per cent of GDP
1	2	3
2014	3.79	3.4
2015	4.28	3.4
2016	3.64	2.6
2017	3.12	2.0
2018	4.30	2.5
2019	5.38	2.8
2020	5.94	2.9

### Box II.5:

#### Debt Decomposition and Stock-Flow Adjustments across States

Standard debt decomposition quantifies the extent to which the change in the stock of debt is explained by changes in overall deficits and how much remains unexplained. This can be numerically explained by the following formula:

$$\Delta b_t = gfd_t + e_t$$

Splitting the overall deficit into the primary deficit and interest expenditure,

$$\Delta b_t = b_{t-1}(r_t - g_t) / (1 + g_t) + pd_t + e_t \quad \dots(1)$$

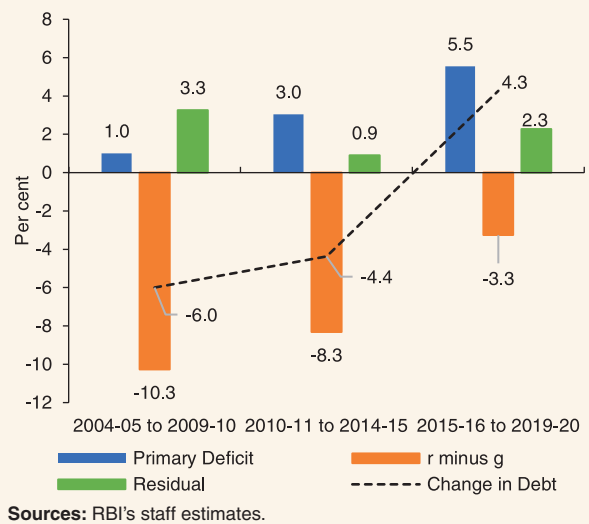

where  $\Delta b_t$  represents change in the debt-to-GDP ratio,  $gfd_t$  is the gross fiscal deficit-to-GDP;  $b_{t-1}$  is the previous year's debt-to-GDP;  $(r_t - g_t)$  is the nominal interest rate minus the nominal GDP growth rate;  $pd_t$  is the primary deficit-to-GDP ratio; and  $e_t$  is a residual that accounts for adjustments which are not fully captured by stock flow variations. Numerically it is calculated by taking the difference between the LHS and RHS of the debt-decomposition equation *i.e.*, '1'.

An analysis of annual debt accumulation for all Indian States over 2004-05 to 2009-10, 2010-11 to 2014-15, and 2015-16 to 2019-20 by using equation 1<sup>10</sup> reveals the following: (a) States' debt declined over 2004-05 to 2009-10 and 2010-11 to 2014-15, but increased by 4.3 per cent in 2015-16 to 2019-20; (b) debt decomposition shows that *r minus g* has contributed towards lowering the stock of debt accumulation *albeit* with a lower contribution in the recent period; (c) the contribution of primary deficits in raising States' debt has been persistent and has successively increased

across time periods; (d) after eliminating the effect of these two factors, the stock-flow component (residual<sup>11</sup> term which is not explained by these macroeconomic and fiscal variables) has been positive throughout, thus, indicating its importance as a source of debt accumulation (Chart 1).

The main determinants of stock-flow adjustments are valuation effects, below the line items like capital injections

**Chart 1: Decomposition of All-States Debt-to-GDP**

(Contd...)

<sup>10</sup> It may be noted that only actual data till 2019-20 prior to the pandemic has been used to undertake this analysis. Nominal effective interest rates are computed for States by taking the ratio of interest payment in current year to liabilities outstanding (or debt) at previous year.

<sup>11</sup> Residual is numerically calculated by taking the difference between the LHS and RHS of the debt-decomposition equation 1.

into public companies, debt forgiveness/reduction, fiscal costs of banking crises (mostly for advanced economies), and/or other contingent liabilities, along with less transparent practices, mostly by EMEs (Bouabdullah, 2017; Weber, 2012). For Indian States, increasing recourse to guarantees in this period could be a possible factor contributing to stock-flow discrepancies (Weber, 2012; Misra *et al*, 2021).

## 10. Conclusion

2.49 In 2020-21, the first wave of the pandemic posed States the critical challenge of declining revenue and the need for higher spending. To partially offset the revenue shortfall, the States hiked their duties on petrol, diesel and alcohol and focused on rationalising non-priority expenditures to make room for higher expenditure on healthcare and social services. While the GFD of the States overshot the 2020-21(BE) by a wide margin, this needs to be seen in the context of the concerted efforts taken by the Centre, States and the RBI to mitigate the impact of the pandemic on human life and the economy. These measures also helped in reducing fiscal stress on States.

2.50 The year 2021-22 started on a similar note, with the outbreak of the second wave. However,

the impact of the second wave on State finances is likely to be less severe than the first wave due to less stringent and localised restrictions imposed this time as opposed to the nationwide lockdown during the first wave of COVID-19. States' fiscal situation is buoyed by robust tax collection, expected higher tax devolution due to healthy tax collection by the Centre, ₹2.19 lakh crore GST compensation (both back to back loans and compensation cess), lower pressure from revenue spending and relatively lower yields on SDLs. Furthermore, the increased pace of vaccination, waning of the second wave and removal of restrictions are expected to put the economic recovery on a robust and sustainable path, setting the stage for States to map out a credible glide path for fiscal consolidation over the medium term.

# III

## Coping with the Pandemic: A Third-Tier Dimension

### 1. Introduction

3.1 The COVID-19 pandemic - a once-in-a-lifetime health crisis - is marked by heterogeneity in terms of its differentiated impact on health, economic and fiscal parameters across States, districts and cities. In response, all tiers of the government came together to work in coordination in order to contain its spread, mitigate its deleterious impact and alleviate the scars it left on lives and livelihoods. In this war effort against the pandemic, the role of local governments (LGs) has been pivotal, particularly from the point of view of mobilising a community-wide response. It is in this context that the theme “Coping with the Pandemic: A Third-Tier Dimension” has been chosen for this year’s report on State Finances, as a sequel to last year’s report which had adopted “Pandemic and its Spatial Dimensions in India” as its theme.

3.2 Like in the case of State governments, the finances of the third-tier governments were impacted severely during the pandemic. Restrictions on movement of people, goods and services, ramping up of health infrastructure, measures taken to protect livelihood and efforts taken to inoculate the citizens in a short span of time inflicted a heavy toll on their finances *via* a ‘scissor effect’ – an increase in expenditure due to a sharp rise in demand for public healthcare services with a simultaneous decrease in revenue resulting from the slowdown in economic activity. As local governments in India cannot run a deficit

by law<sup>1</sup>, the adoption of innovative strategies to cope with the fiscal pressure became an imperative. The Central and State governments also extended support and LGs coordinated with the private sector and civil society to share the financial burden of the crisis.

3.3 This chapter drills down into the fiscal aspects of the role of third-tier governments across various States in India in containing the pandemic and bringing succour to those affected by it. The focus is on urban local bodies (ULBs), particularly municipal corporations (MCs). Qualitative responses obtained from 141 MCs across all the States in India through a primary survey conducted by the Reserve Bank have been used in this analysis. In addition, available budgetary data on 20 largest MCs spread across various States in India, which together account for around 60 per cent of revenue and 55 per cent of expenditures of the entire population of MCs, have been used.

3.4 The chapter is organised into 6 sections. Section 2 presents stylised facts on the spread and intensity of COVID-19 at the third-tier level. Section 3 discusses the efforts of local governments in terms of containment, vaccination and treatment. Section 4 examines the impact of the pandemic on local government finances. Section 5 delves into the steps taken by MCs to fill resource gaps. Section 6 concludes with the key lessons from this experience.

## 2. Spread and Intensity of COVID-19 in India

3.5 The first wave of the pandemic began with a gradual spurt in new cases from March 2020 onwards, and peaked around mid-September 2020, before reaching its lowest point in mid-February 2021. The second wave started from around mid-March 2021 and reached its peak on May 6, 2021. In contrast to the first wave, the rise in new cases during the second wave was steep and reached a much higher peak, primarily

attributed to the significantly higher viral load of the Delta variant, rendering it more transmissible. Interestingly, the fall was equally sharp as cases reached about one-eighth of the peak by June 30, 2021. As regards concentration of cases, the share of top 20 districts<sup>2</sup> in new cases was high in lean periods of low infections compared to phases in which cases were spiking at the all-India level (Chart III.1a). Reflecting the steep rise in new cases, the doubling rate<sup>3</sup> declined sharply

Chart III.1: COVID-19 First Wave versus Second Wave - Stylised Evidence

**Note:** Case fatality rate is expressed as number of deaths as per cent of identified/diagnosed cases; Rural districts are defined as districts in which at least 70 per cent of population was categorized as rural in Census.

**Source:** api.covid19india.org.

<sup>2</sup> Top 20 districts with total confirmed cases (cumulative) as on October 31, 2021.

<sup>3</sup> Number of days in which total cases doubled.

during the second wave as against a consistent increase during the first wave. While the sharp rise in new cases during the second wave significantly increased the caseload<sup>4</sup>, the case fatality rate<sup>5</sup> remained stable (Chart III.1b).

3.6 Eight States accounted for close to 70 per cent of the total cases throughout and the relative share of each of these States remained broadly stable (Chart III.1c). Rural areas were relatively less affected as their share in new confirmed cases remained less than 40 per cent

even at the peak of the first and second waves (Chart III.1d). While the most urbanised States in India tend to have higher number of COVID-19 cases per million, the case fatality rate does not show any clear association between infections and urbanisation (Chart III.2).

3.7 Furthermore, the spatial spread of COVID-19 was asymmetric across districts within a State. At the beginning of the first wave (May 2020), cases were concentrated in only a handful of districts – Mumbai, Chennai, Thane, Pune and

Chart III.2: State/Union Territory-wise COVID-19 Impact and Vaccination Progress as on October 31, 2021

<sup>4</sup> Caseload is defined as total cases excluding those that have recovered or deceased, i.e., Caseload = total confirmed cases - (total recovered cases + total deceased cases).

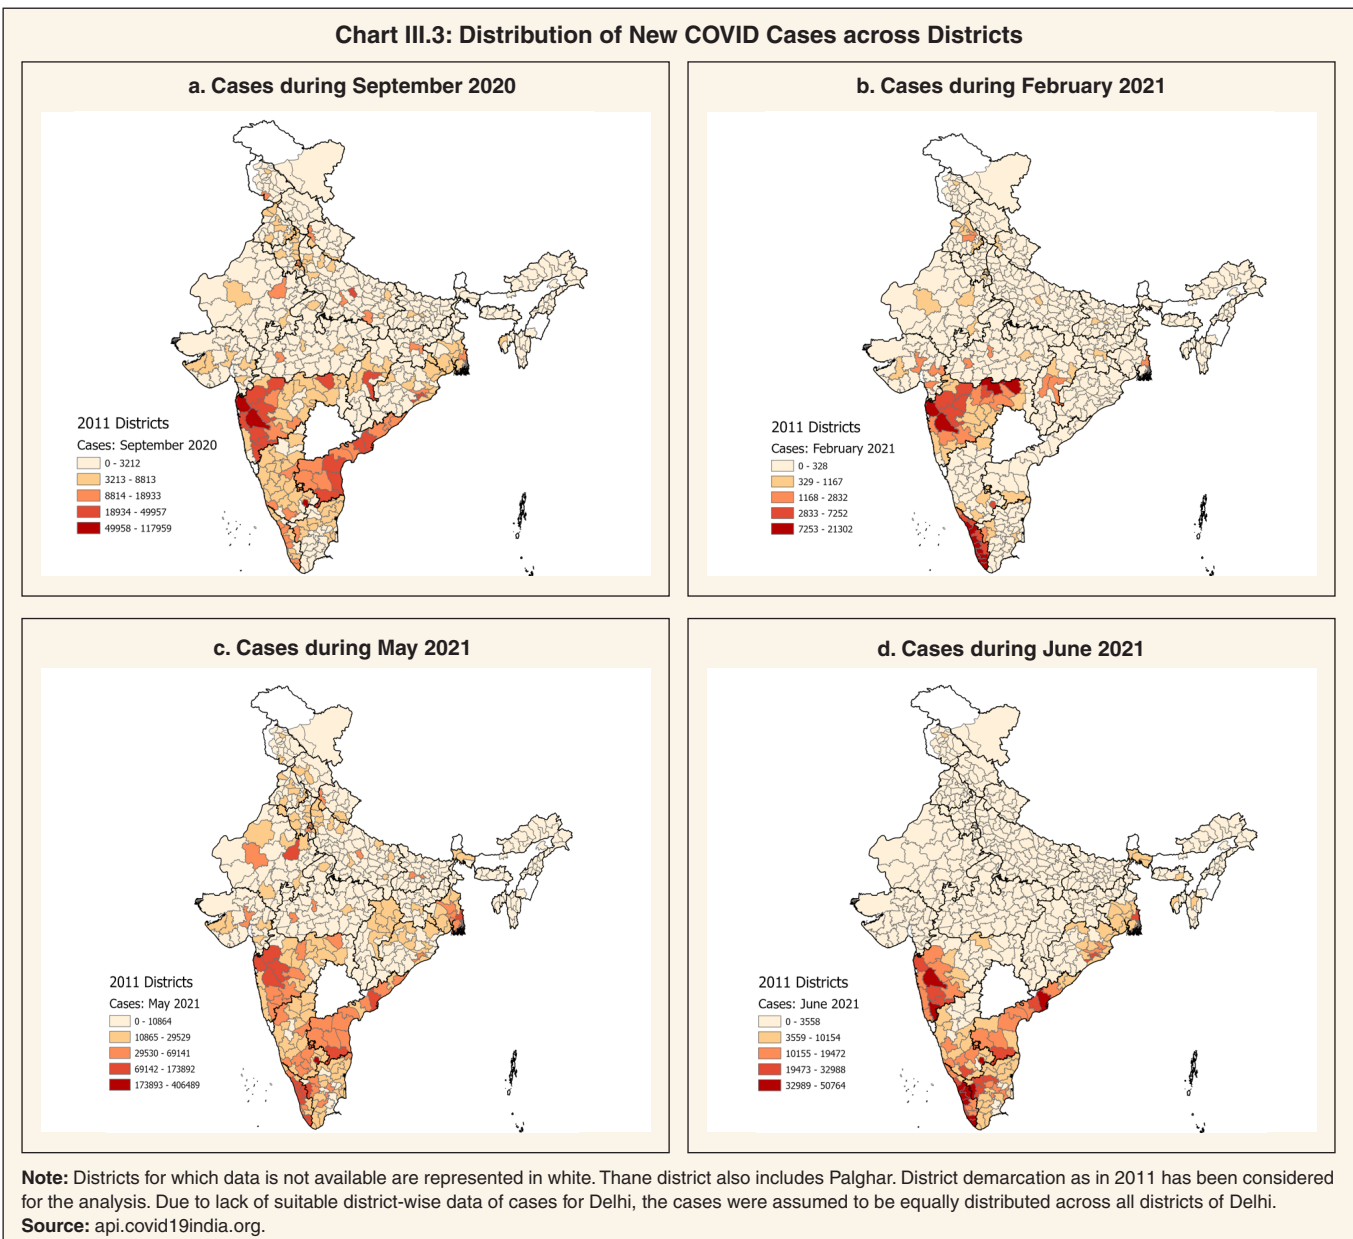

<sup>5</sup> Case fatality rate is defined as number of deaths as a per cent of identified/ diagnosed cases.

Ahmedabad – but by September 2020, infections had spread more widely, with the higher number of cases mostly in Maharashtra, Andhra Pradesh and Delhi. As cases receded and reached a trough in February 2021, pockets of high infections remained restricted to certain districts of Maharashtra and Kerala. In March 2021, cases were on the uptick again and Maharashtra continued to witness a high concentration of cases, particularly in Pune, Mumbai and

Thane districts. By May 2021, *i.e.*, at the peak of the second wave, contagion had spread through peninsular India and some districts in north-western and eastern India. While 40 districts accounted for around 70 per cent of infections in March 2021, nearly 150 districts accounted for two-third of the spread in May 2021. With cases dropping sharply in June, infections remained concentrated mostly in peninsular India (Chart III.3).

Chart III.3: Distribution of New COVID Cases across Districts

3.8 Spatial autocorrelation<sup>6</sup> measured by Global Moran's I<sup>7</sup> is found to be positive and statistically significant during all months from May 2020 to June 2021, denoting the presence of clusters (Chart III.4). The value of the statistic is, however, higher when infections are low (e.g., during November 2020-February 2021), suggesting a higher degree of clustering when the cases are low than otherwise.

3.9 In a cluster and outlier analysis, a district with high infections which is also surrounded by districts with high infections, is represented as a high-high cluster. A high-low outlier refers to a district that has a high cases but is surrounded

by districts with low cases. Likewise, low caseload districts that are surrounded by districts with high infections are denoted as low-high outliers and if the district as well as surrounding districts have low infections, it is represented as a low-low cluster. High-high clusters were mostly observed in Peninsular India. In contrast, districts in North-East India, Ladakh, and Uttar Pradesh were generally found to be low-low clusters. High-low outliers were mostly observed during the peak infection months of September 2020 and May 2021 in the districts of Ahmedabad, Surat, Bhopal, Jabalpur, Prayagraj, Ranchi, Kota, Patna, Vadodara, Gwalior, Lucknow and Gorakhpur. Only a few districts emerged as low-high outliers, majorly – Valsad, Krishnagiri, Malkangiri, Wardha, Balaghat (during peak of first wave) and Valsad, Chitradurg, Kodagu, Nilgiris (during peak of second wave) – pointing to successful mitigation strategies (e.g., strict checking at district entry points) or natural advantages (like low population density or better climatic conditions) in these districts (Chart III.5).

3.10 The identification of hotspots can help in devising control strategies to avoid the spread of infections. Accordingly, the Getis-Ord  $G_i^*$  statistic<sup>8</sup> identified statistically significant hotspots majorly in five districts – Mumbai, Pune, Thane, Raigad and Nellore – at the beginning of the outbreak in May 2020. By September 2020, however, hotspots covered much of Maharashtra, Andhra Pradesh,

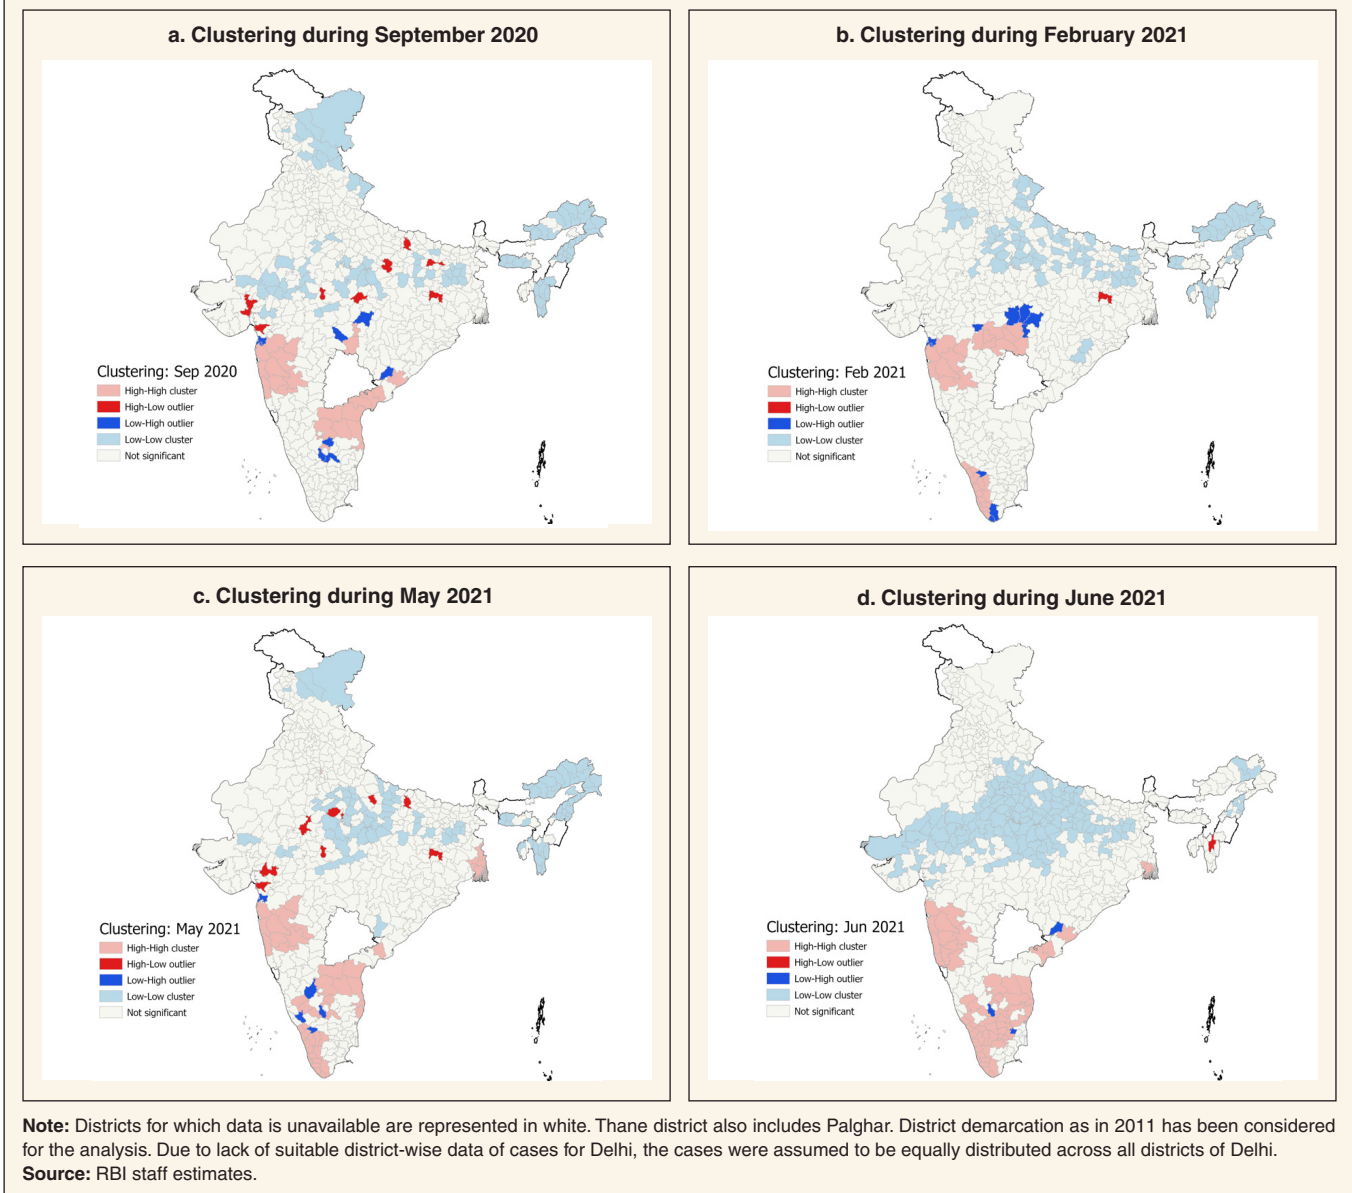

<sup>6</sup> Spatial autocorrelation refers to the presence of systematic spatial variation in a mapped variable.

<sup>7</sup> Global Moran's I statistic is asymptotically normal. Monte Carlo simulation of a stochastic permutation process computes the test statistic under the null hypothesis that attribute values are randomly distributed across the spatial area under study (Wang *et al.*, 2021). If the p-value is significant with a positive Moran's I statistic, it suggests spatial clustering (high values are clustered with other high values) and a significant p-value with a negative Moran's I statistic suggest spatial dispersion (high values repel other high values).

<sup>8</sup>  $G_i(d)$  measures the concentration or lack of concentration of the sum of values associated with a variable X in the region under study.  $G_i(d)$  is a proportion of the sum of all  $x_j$  values that are within  $d$  of  $i$ .  $G_i^*(d)$  is a related statistic which measures association in cases where the  $j$  is equal to  $i$  term is included in the statistic (Getis and Ord, 1992).

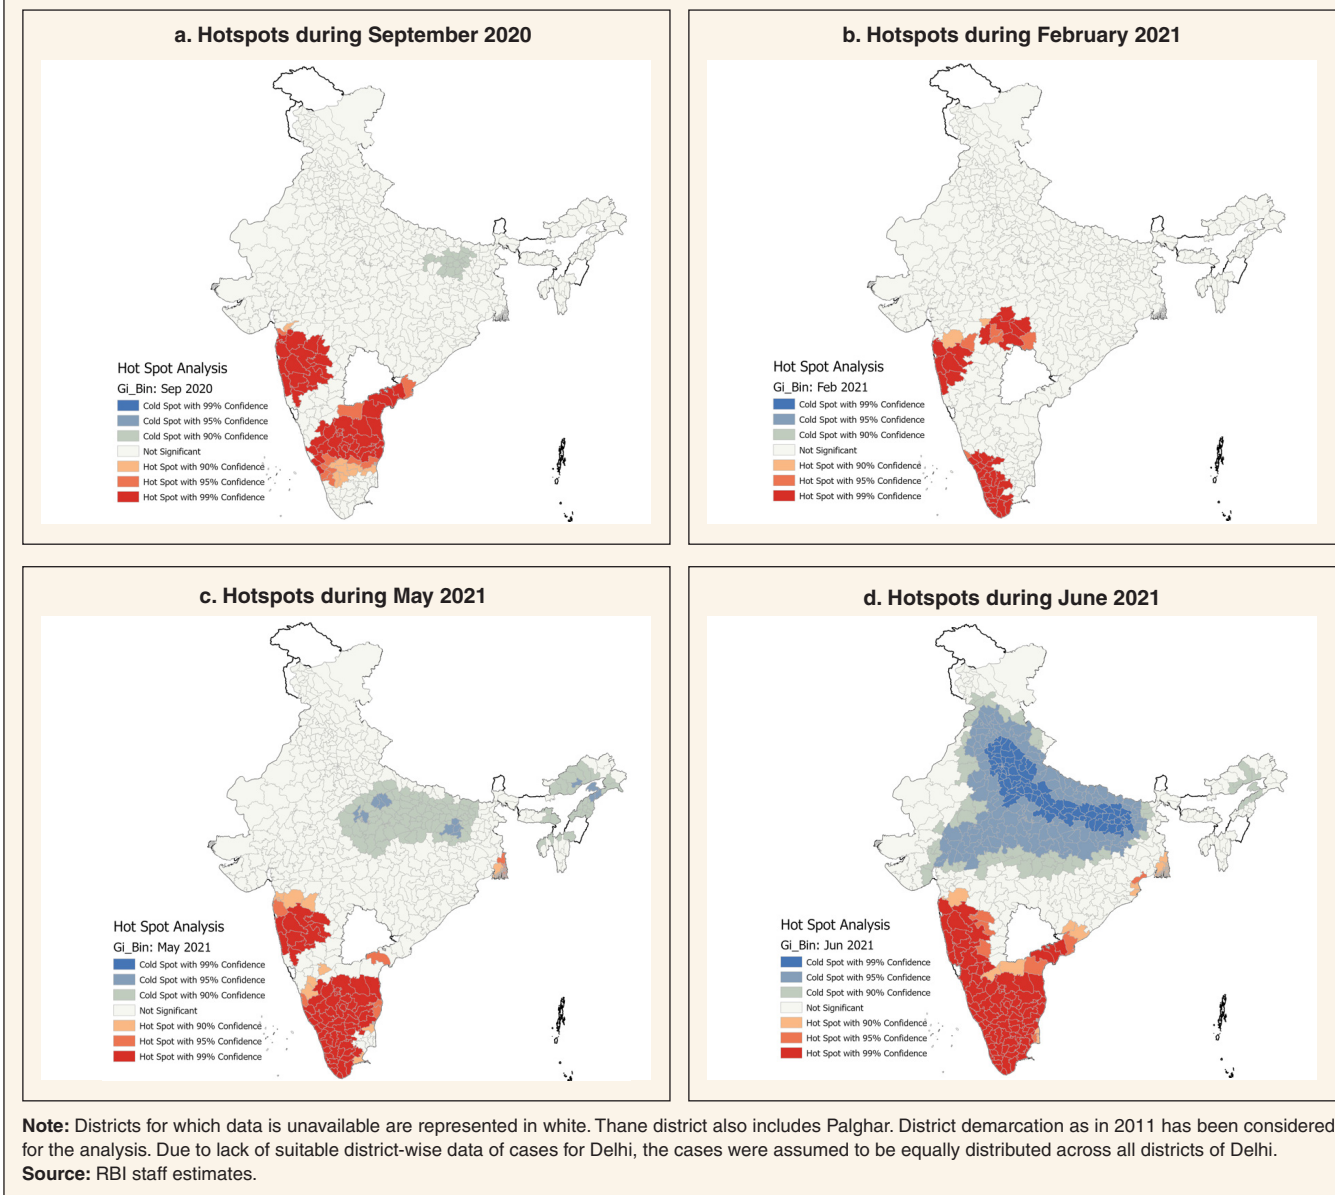

Chart III.5: Clustering during the Pandemic

and parts of Karnataka, Tamil Nadu and Kerala. By February 2021, the number of hotspots had narrowed down to majorly certain districts of Maharashtra and Kerala, and got further confined to primarily within Maharashtra by March 2021. Thereafter, as the COVID cases resurged with the advent of the second wave, Kerala, Tamil Nadu, parts of Maharashtra, Karnataka and Andhra

Pradesh, and few districts of West Bengal emerged as significant hotspots. Even when cases ebbed in June, these hotspots remained broadly unchanged (Chart III.6). There could be several factors, both natural (*e.g.*, climatic factors; population density) and social (*e.g.*, migration; severity of government response) that determine the spread of infections (Wang *et al.*, 2021).

Chart III.6: Identification of Hotspots

### 3. Role of Third-Tier Governments in the Pandemic

3.11 The core functions of local governments had to be scaled up rapidly during the pandemic to meet multiple objectives, viz., emergency healthcare need of the people, implementation

and enforcement of lockdown restrictions, and uninterrupted delivery of essential services.

#### 3.1 Strategies adopted by Urban Local Bodies

3.12 City government authorities in India<sup>9</sup> had to escalate public healthcare services by ramping up testing facilities; setting up makeshift

<sup>9</sup> Consisting of municipal corporations, municipalities and Nagar Panchayats.

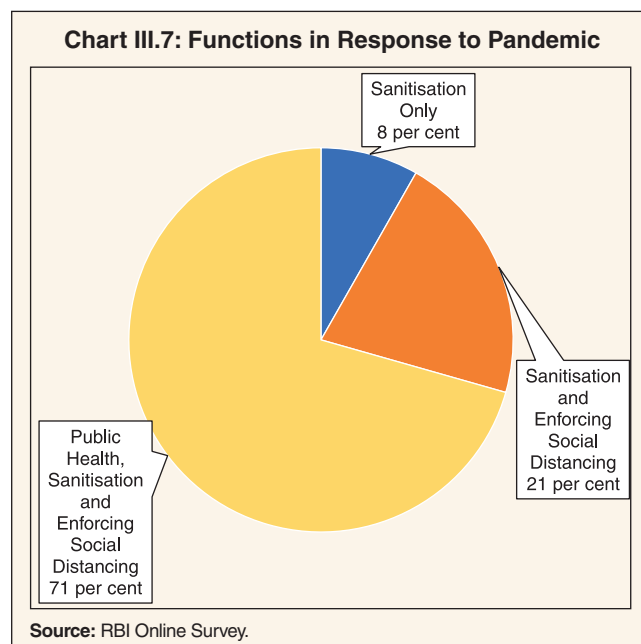

hospitals and quarantine centres; conducting door-to-door surveillance for tracking and contact-tracing; establishing COVID war rooms and 24\*7 COVID helplines for providing tele-counselling and tele medicines; containing infections through sanitisation and solid waste management; and augmenting frontline staff capacity. The functioning of administrative and police systems in cities had to be reoriented to enforce lockdown restrictions, night curfews, demarcation of containment zones and entry restrictions in public places. As a part of citizen-centric support, many cities made arrangements for providing shelter, essentials and free food to the poor *via* community kitchens, tie-ups with food delivery aggregators and other State-run programmes.

3.13 The strategies adopted by various city authorities also leveraged on technology-based smart solutions. For instance, several cities deployed all-in-one mobile COVID-19 tracking apps for tracking and monitoring of COVID-19 cases; used the global positioning system (GPS) and geo-fencing to track the movement of quarantined and health workers; and employed heat mapping technology to draw up containment plans (Annex III.1).

#### *Survey Responses*

3.14 Responses received from 141 MCs to an online qualitative survey show that some MCs responded in all the relevant areas of concern *viz.*, public health; sanitisation; and enforcing social distancing norms, while others were only required to sanitise public places or enforce social distancing/ activity restrictions (Chart III.7).

3.15 Under healthcare services, MCs made arrangements for COVID testing mainly through the MC-owned hospitals, public health centres and other government hospitals. Given the

inadequacy of public health infrastructure, some MCs also made testing arrangements through private hospitals (Chart III.8a). During the second wave of the pandemic, the MCs added hospital beds and created additional quarantine capacity (Chart III.8b).

3.16 MCs also took extensive support from private sector and non-governmental organisations (NGOs) to bridge the gap between the steep rise in demand for health and quarantine facilities and the existing infrastructure (Chart III.9).

### **3.2 Strategies adopted by Panchayati Raj Institutions**

3.17 Even though rural districts account for less than 30 per cent<sup>10</sup> of total COVID-19 cases in India, the caseload was huge in absolute terms *vis-à-vis* the medical facilities available in the hinterland. From time to time, the Union Ministry of Panchayati Raj issued advisories to State governments regarding preventive measures to be taken by Gram Panchayats (GPs) to curb

<sup>10</sup> Rural districts are defined as districts in which at least 70 per cent of population was categorized as rural in Census. Average from April 2020 till October 2021 has been considered.

**Chart III.8: Augmentation of Healthcare Infrastructure by the Municipal Corporations**

Source: RBI Online Survey.

**Chart III.9: Involvement of Private Sector and NGOs**

Source: RBI Online Survey.

the spread of COVID-19 in rural India.<sup>11</sup> Based on these guidelines and advisories the GPs undertook a host of measures which *inter alia* included lockdowns, entry restrictions, formation of Corona Monitoring Committees at the village level, free online medical consultation, awareness programmes, creation of migrants database and free food distribution (Annex III.2).

### 3.3 Progress of Vaccination Roll Out

3.18 With the ebbing of the second wave, the pace of vaccination has picked up across various States in India in recent months. As per information available up to November 27, 2021, 31.0 per cent of India's population has been fully vaccinated while 52.7 per cent received at least the first dose

<sup>11</sup> The Standard Operating Procedure (SoP) issued by the Ministry of Panchayati Raj to the State Governments on May 16, 2021, at the peak of COVID second wave, to be put in place in peri-urban, rural and tribal areas include: (i) surveillance, screening, isolation and referral; (ii) home and community based isolation; (iii) monitoring of active cases in home isolation; (iv) planning for health infrastructure for managing COVID at rural level; (v) post COVID management; (vi) community mobilisation and behaviour change communication; (vii) mental health support at community level; (viii) adequate provision of support services and intersectoral coordination; (ix) undertaking of public health functions by primary/ community health centres in COVID containment operations; (x) preparedness for rapid coverage with COVID vaccination; (xi) non-COVID essential healthcare delivery services; (xii) establishment of COVID-specific call centres at district levels; and (xiii) tribal COVID-care and response strategies for tribal areas.

(Chart III.10).<sup>12</sup> Local governments played an important role in the vaccination drive by making arrangements for inoculation in public and private hospitals; authorising and monitoring vaccination camps organised by civic and housing societies; making special transportation arrangement for senior citizens and differently abled people to vaccination centres; and spreading awareness to remove vaccine hesitancy among people.

#### 4. Fiscal Impact of COVID-19 on Third-Tier Government

3.19 In line with the global experience, the pandemic has worsened the finances of local governments in India substantially in 2020-21 and 2021-22. It is estimated that local authorities would lose around 15-25 per cent of their revenues in 2021, which may make the maintenance of the current level of service delivery difficult

to sustain (Wahba *et al.* 2021). In rural India, village panchayats struggled for funds during the pandemic (Gurusaravanan, 2021). Similar challenges were encountered by the ULBs. 98 per cent of the respondents to the Reserve Bank's qualitative survey<sup>13</sup> of MCs reported different financial challenges *viz.*, increase in expenditure; decline in revenue collection; and lack (or delayed release) of funds from the State governments during the second wave of the pandemic. 70 per cent of MCs reported a decline in revenue while 71 per cent reported an increase in expenditure (Chart III.11). Several MCs had to cut down expenditure on other areas to make available funds for the COVID response.

3.20 The loss of revenue by MCs seems to have been steeper during the second wave - 22 per cent of them reported revenue loss of more than 50 per cent during the second wave

<sup>12</sup> Around 41.9 per cent of India's adult population has been fully vaccinated while 74.2 per cent received at least the first dose as of November 23, 2021 (Source: RBI staff estimates using PIB release and Electors data of 2019 from Election Commission of India).

<sup>13</sup> An online qualitative survey was conducted during July and August 2021. Responses of around 141 municipal corporations were received from across all the states in India.

Chart III.11: Financial Challenges faced by MCs in 2020-21 and 2021-22

Note: Survey response totals do not add up to 100 as some MCs reported multiple financial challenges.  
Source: RBI online survey.

as against 16 per cent during the first wave (Chart III.12a and III.12b). Like in the case of

revenue, the impact on expenditure of MCs was

Chart III.12: Impact of COVID-19 on the Finances of the MCs in India

Source: RBI online survey.

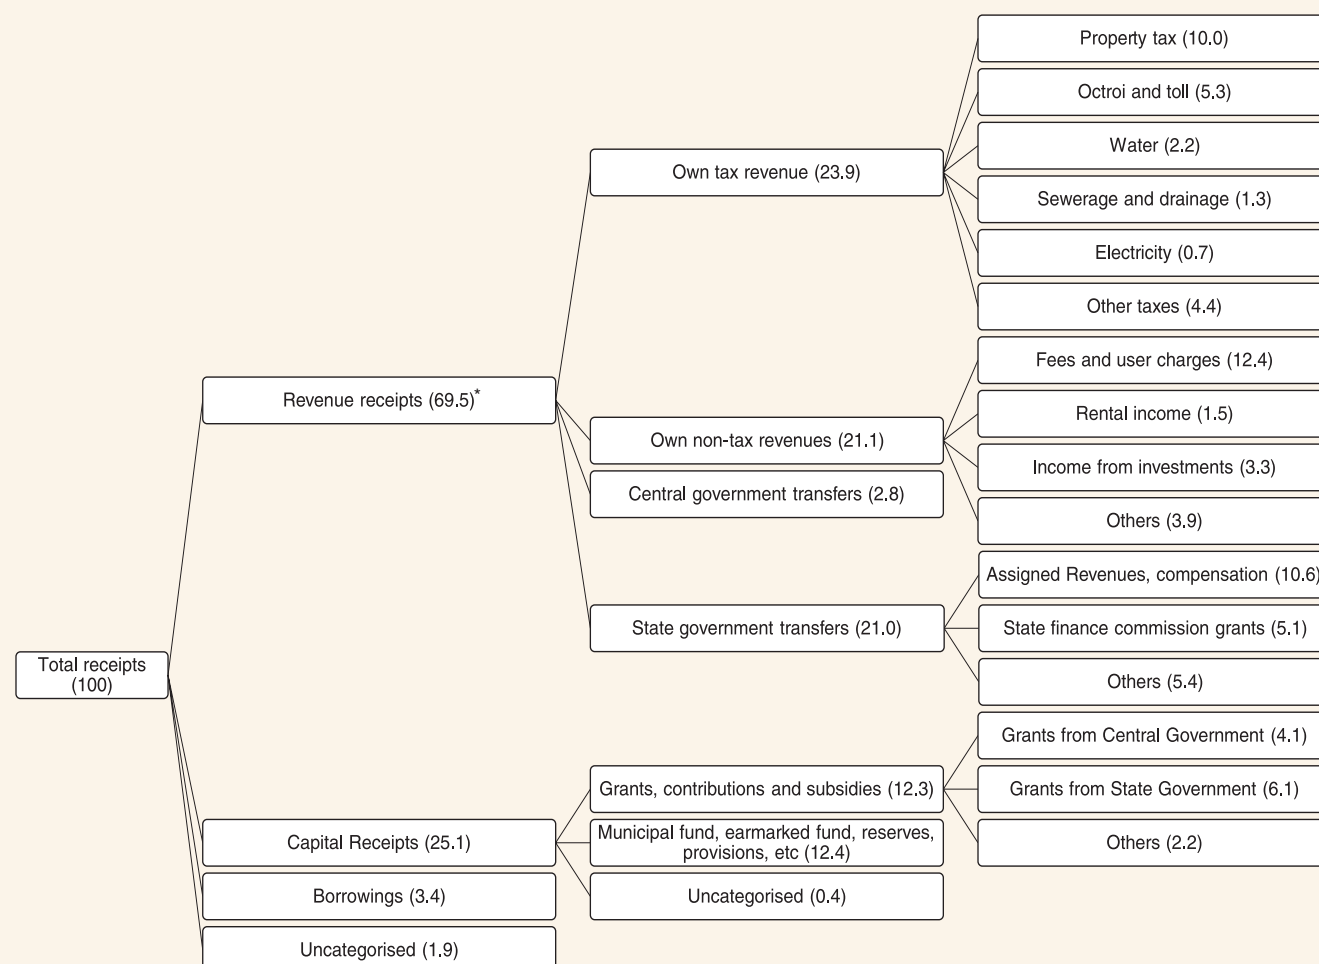

more pronounced during the second wave with 11 per cent of them reporting expenditure growth of more than 50 per cent during the second wave as against 6 per cent during the first wave (Chart III.12c and III.12d).

#### 4.1 Impact on Revenue

3.21 Revenue receipts account for around 70 per cent of total receipts of MCs in India whereas capital receipts account for about 30 per cent (Chart III.13). MCs' revenue receipts largely comprise own tax revenue; non-tax revenue; and transfers from the Central and the State

governments. Property tax is the dominant component of own tax revenue, whereas fees and user charges constitute the largest sub-component of non-tax revenue. The share of transfers, predominantly State government transfers, in revenue receipts is significant. The capital receipts of MCs mainly comprise grants, contributions and subsidies from central and State governments and transfers from funds maintained by municipal bodies. The share of borrowings in total receipts of municipal bodies is relatively low (less than 5 per cent).

Chart III.13: Breakdown of Receipts of Municipal Corporations in 2017-18

Note: The figures in the parentheses indicate per cent of total.

Sources: RBI online survey and budgetary data of the MCs.

\* The sub-components do not add up to 69.5 percentage points as 0.7 percentage points are uncategorised.

3.22 An analysis of budgetary data on 20 large municipal corporations<sup>14</sup> reveals that their tax revenue increased by 7.2 per cent during 2020-21 (revised estimates) over 2019-20 levels (Table III.1). The growth in tax revenue was mainly driven by property taxes whereas collections under water tax, sewerage/drainage tax and octroi and toll tax witnessed sharp declines. Collections under all components of tax revenue during 2020-21 (revised estimates) were significantly lower than the respective budget estimates. Assigned revenues, compensation from State governments and rental income from municipal properties recorded modest growth in 2020-21 (revised estimates) over 2019-20 but remained much lower than the budget estimates. Revenue grants, contributions and subsidies from

the Central and the State governments is the only component which overshoot the budget estimates, indicative of higher transfers from the upper tiers of the governments to support municipal finances during the first wave of the pandemic. The MCs have budgeted robust growth in almost all components of revenue in 2021-22.

#### 4.2 Impact on Expenditure

3.23 Revenue expenditure accounts for about two thirds of total disbursements of MCs (Chart III.14). Fixed overheads in the form of establishment expenditure (largely towards salaries, wages and bonus, and pensions) account for more than 50 per cent of revenue expenditure. The other large revenue expenditure categories are operational and maintenance expenses and

<sup>14</sup> The 20 large MCs include Ahmedabad, Bhavnagar, Chennai, Coimbatore, Greater Warangal, Hyderabad, Kochi, Kolkata, Mumbai, New Delhi, North Delhi, Patna, Rajkot, Shimla, South Delhi, Surat, Thrissur, Vadodara, Vijayawada and Vishakhapatnam, which accounted for around 60 per cent of total receipts and 55 per cent of total expenditure of all MCs in India in 2017-18.

Chart III.14: Breakdown of Disbursements of Municipal Corporations in 2017-18

**Note:** The figures in the parentheses indicate per cent of total.  
**Sources:** RBI online survey and budgetary data of the MCs.

administrative expenses. Capital expenditure accounts for around 30 per cent of total disbursements, and is largely spent on creation of fixed assets. Disbursement towards repayment of borrowings has a relatively low share of around 3 per cent (Chart III.14).

3.24 All the major components of revenue expenditure, viz., establishment expenses, administrative expenses, operation and maintenance expenses and interest and finance charges – most of which are committed in nature – witnessed an increase in 2020-21 (revised estimates) over 2019-20 (Table III.2).

Establishment expenses of the MCs (salaries, wages, bonus and pension), however, were lower than the budget estimates, reflecting efforts by MCs to cutback on expenses in view of the revenue shortfall. Capital expenditure of the MCs recorded robust growth in 2020-21 (revised estimates) *albeit* remaining lower than the budgeted amount. The MCs have budgeted modest growth in all components of revenue expenditure in 2021-22, and robust growth in capital expenditure.

3.25 The MCs' expenditure on public services, viz., health, sanitation, roads and education

have budgeted strong growth in expenditure under all major categories of public services in 2021-22, anticipating the need for continuance of COVID-19 related expenses. The MCs' inability to meet the budgetary target of expenditure on public services in 2020-21 even at the time of pandemic reflects their fiscal constraints arising out of revenue shortfalls and limited opportunities for

### Box III.1:

#### Fiscal Stress on Indian Municipal Corporations

Fiscal stress is a situation in which a government institution faces a growing imbalance between its receipts and expenditures (Premchand, 1993). Existing fiscal stress testing frameworks generally measure the impact of different factors which directly or indirectly affect the projected receipts and expenditures of the government. However, measuring fiscal stress of MCs in India using these traditional stress testing methods may not be efficient and may make model selection difficult, as the municipal finance data in India is characterised by a lack of uniform

accounting practices with differences in accounting classifications and presence of incomplete/missing data. The modern approach of maximum likelihood estimation (MLE) has weaker assumptions and provides improved statistical properties. The primary benefit of using MLE techniques for missing data is to produce estimates which are consistent, efficient, and asymptotically normal. Accordingly, a gradient boosting model based on the MLE technique has been used to assess fiscal stress of the MCs.

(Contd...)

In India, statutorily, the MCs cannot run a deficit and their revenue receipts must exceed revenue expenditure while presenting budgets. The MCs can resort to borrowings only after explicit approval from their respective State governments (ICRIER, 2019). Thus, the fiscal balance alone may not be a sufficient indicator of fiscal stress on MCs. In view of this, apart from fiscal balance, two more indicators of fiscal stress have been used for the analysis. On the revenue side, the MCs’ own revenue as a ratio of total revenue receipts has been used as an indicator of fiscal stress. A higher share of own revenue in total revenue receipts indicates greater autonomy or conversely lower dependence of the MCs on transfers from upper tiers of the government to meet their expenditure needs thus reducing

their fiscal stress. On the expenditure side, the share of committed expenditure<sup>15</sup> in total expenditure has been considered as a stress factor as a considerable amount of municipal expenditure is committed in nature and cannot be altered in the short run. The budgetary data of 221 MCs collected for the period 2017-18 to 2019-20 has been used for the analysis.

In the gradient boosting model, a higher probability score implies higher stress<sup>16</sup>. Probability scores presented as percentile plots in Chart I show that around 30 to 35 per cent of the MCs out of 221 are severely fiscally stressed<sup>17</sup> on account of either of the three parameters.

(Contd...)

<sup>15</sup> Establishment, administrative, ‘operational & maintenance’ expenses, and ‘interest and finance charges’ have been taken as committed expenditure.

<sup>16</sup> The model has been estimated using a boosting algorithm as it reduces the variance in the process of sequential trees and various budgetary heads under receipts and expenditure are taken as explanatory variables (Hellwig, 2021). The model predicts probabilities based on an input data  $(v_i, y_i)_{i=1}^d$  and loss function  $L = (y_i - F(v))$  using the relation,  $\log(p(y_i|y_i^*)) = [y_i * \log(p) + (1 - y_i * \log(1 - p))]$

where,  $y_i, y_i^*, p$  are observed values, predicted values and predicted probabilities, respectively. The final model in the boosted regression trees is a stage-wise additive model of  $n$  regression trees as (Hastie *et al.*, 2009),  $f(v) = \sum_{i=1}^n f^i(v)$ , where  $v$  is a set of features from the dataset (independent variables). The relationship between the estimates of performance and tuning parameters is evaluated and found to be robust.

<sup>17</sup> Severely stressed municipal corporations are classified as those having the probability scores of 0.8 or more.

A composite index of fiscal stress has been estimated by taking the average of three separate probability scores for fiscal balance, fiscal autonomy and committed expenditure. The overall fiscal stress index exhibits a bell-shaped distribution with almost half of the MCs having a moderate fiscal stress, with index values lying between

0.3 to 0.6. The composite fiscal stress index has identified 15 per cent of the MCs as severely stressed with index value above 0.8 in a scale of 0 to 1. For these MCs, the relatively higher share of committed expenditure (as per cent of total expenditure) is the primary contributor to fiscal stress (Chart II).

market borrowings, as statutorily they cannot run a deficit (Box III.1). Increasing fiscal stress of the

MCs may act as a hindrance to effective mitigation of future pandemic-type crises (Box III.2).

**Box III.2:**

**Does Fiscal Health Impact Vaccination Drive? Empirical Study of Select Municipal Corporations**

Municipal corporations (MCs) have been at the forefront of the vaccination drive in India. They have been running vaccination centres; dispersing information about vaccine availability and distribution through their websites and social media platforms; and undertaking awareness campaigns and public outreach programmes to sensitise people about the need for vaccination. Keeping in view the role of MCs in the vaccination programme, it is worthwhile to empirically examine if the fiscal health of the MCs influences progress in vaccination.

The empirical investigation is carried out through cross-sectional regression of district vaccination rates on municipal fiscal health for the period February-October 2021.<sup>18</sup> The fiscal health of a MC is proxied by its per capita total receipts<sup>19</sup>. Since vaccination rates<sup>20</sup> are likely to be influenced by the disease burden, district-wise infections (as per cent of district population) are included as a control variable.

(Contd...)

<sup>18</sup> District level vaccination is considered due to lack of suitable data on vaccination at municipal corporation level. The sample consists of around 150 districts with municipal corporations. For districts having more than one municipal corporation, the average fiscal health of the municipal corporations was considered.

<sup>19</sup> Data on total receipts pertains to 2019-20. Per capita total receipts is obtained by dividing by district population.

<sup>20</sup> Total doses administered as share of population.

**Table I: Regression Estimates (Dependent Variable: Vaccination Rates)**

	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct
	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)

adj. $R^2$	0.320	0.265	0.592	0.460	0.537	0.543	0.435	0.479	0.230
N	147	147	147	147	147	147	147	147	147

**Note:** Standard errors in parentheses; \*  $p < 0.10$ , \*\*  $p < 0.05$ , \*\*\*  $p < 0.01$ .

**Source:** RBI staff estimates.

The outcomes of the empirical estimation show that MCs with better fiscal health were able to achieve higher vaccination rates (Table I). Vaccination rates also depend on cases – higher infection rates are generally associated with higher vaccinations, barring the first few months when the vaccination strategy was focussed on vulnerable groups (healthcare and frontline workers) and during

September-October when all-India cases had come down substantially.

As MCs with higher per capita receipts could achieve a higher vaccination rate, strengthening local government finances is key to augment India's capacity to tackle future health crises successfully.

## 5. Steps taken by the Municipal Corporations to fill Resource Gaps

3.26 Before the onset of the pandemic, the consolidated revenue balance<sup>21</sup> of the MCs was in surplus. Budgetary data relating to 20 large MCs indicate that their combined revenue surplus<sup>22</sup> declined in 2020-21, with many of them recording either a fall in the revenue surplus or an increase in the revenue deficit (Chart III.15a). Segregating MCs into revenue surplus (group A) and revenue deficit (group B) categories, it is observed that the reduction in the surpluses of group A MCs was sharper than the increase in the revenue deficit of group B MCs (Chart III.15b).

3.27 MCs adopted a combination of measures to bridge COVID-19-induced resource gaps. The survey responses reveal that apart from reduction

of non-essential expenditure, the MCs also mobilised additional funding from multiple sources such as borrowing, grants from the States and the Centre, reserves, municipal funds, deposits in State Disaster Response Funds (SDRF), issuances of COVID bonds, donations and contribution (Chart III.16), which are discussed below.

### *Additional Funding Support from the Central and State Governments*

3.28 The international experience reveals that Central governments across the world announced fiscal measures to help sub-national governments cope with the fiscal shocks<sup>23</sup> imparted by the pandemic. For instance, two-thirds of the OECD countries have adopted funding measures in support of sub-national governments (OECD, 2020). In India, MCs receive grants from the States

<sup>21</sup> Revenue expenditure net of revenue receipts (as per the standard practice of this Report).

<sup>22</sup> Given the data constraint of capital receipts, we have covered only revenue balance in this section.

<sup>23</sup> A survey conducted by Emergency Governance Initiative (EGI) between November 5-December 7, 2020 encompassing 22 countries across all continents revealed that Central governments in countries like Austria, Brazil, Colombia, Estonia, Italy, Japan, Korea, Latvia, Norway, Slovenia, South Africa, Spain and the US have increased grant payments to sub-national governments.

Chart III.15: Resource Gaps

and the Centre to bridge their financial gaps. Revenue grants are given to run current expenses, while capital grants are disbursed to run project-specific expenses (which are long-term in nature). The FC XV recommended provision of grants amounting to ₹70,051 crore to strengthen and plug critical gaps in the healthcare system. Around 43 per cent of the respondents to the survey reported

use of grants from the State governments to meet pandemic-related needs of funding.

*Use of Reserve Funds*

3.29 Reserves held by the MCs proved to be the second important source of financing - 19 per cent of the survey respondents reported drawing from reserve funds to meet the resource gap. These

Chart III.16: Financing Pattern of MCs during 2020-21

a. Decline in Revenue Growth and Financing Pattern of MCs during 2020-21

reserves are linked to either the infrastructure sector or committed liabilities such as provident and pension funds. Ideally, the infrastructure-linked funds should be channelised towards capital expenditure with long-term growth prospects so as to form a source of future income. The fiscal stress caused by the pandemic forced MCs to withdraw from these reserves. 26 per cent of surveyed MCs indicated that they created special reserve funds to cope with higher spending.

### *Borrowings*

3.30 During the pandemic, MCs largely depended on transfer from upper tiers of the government and their accumulated reserves. Borrowing by MCs came into prominence, *albeit* in a supplemental role. About 6 per cent of surveyed MCs borrowed from State governments and another 2 per cent borrowed from banks to meet the additional need for funds during the pandemic. Another source of funds was Issuance of bonds. In the pre-COVID period, some MCs had issued municipal bonds at different points of time to finance their infrastructure. For instance, Ahmedabad Municipal Corporation issued a 'muni bond' worth ₹200 crore in 2019 (maturity of 5-years and 8.7 per cent coupon), to fund urban infrastructure development. Centre-driven schemes like AMRUT<sup>24</sup> were used to incentivise bond issuances by ULBs, resulting in fresh issuances of around ₹1,800 crore worth of municipal bonds by nine MCs<sup>25</sup>. During the COVID-19 period, Ghaziabad Municipal Corporation issued its first green bond<sup>26</sup> in India

on April 08, 2021 to raise ₹150 crore with a coupon rate of 8.10 per cent for a tertiary water treatment plant to benefit industries in Ghaziabad. Five MCs responding to the survey issued bonds to finance COVID-related expenditure.

### *Other Sources*

3.31 Private participation (including NGOs) in pandemic management also helped ease the MCs' financial burden. 22 per cent of surveyed MCs availed help from these institutions in different forms such as quarantining, treatment, ambulances, sanitisation, oxygen concentrators, food and shelter. Other sources of funding were District Mineral Funds (DMFs)<sup>27</sup>, SDRF, contributions from the public, municipal staff and other donations, and additional revenue generated through better tax compliance by providing incentives to taxpayers.

### *Reduction/Freezing of Non-essential/Discretionary Spending*

3.32 Among the surveyed MCs, 18 per cent reported expenditure cuts relating to non-essential areas. Guidelines were issued to head of departments to restrict expenditure to a certain proportion of budgeted allocations till a specific month or to incur only essential spending like establishment expenses, spending for COVID prevention, electric charges, payment of property tax, water tax, and urgent repair and maintenance works. Discretionary spending like expenditure on renovation and decoration of office premises, purchase and hiring of additional vehicles except

<sup>24</sup> Atal Mission for Rejuvenation and Urban Transformation.

<sup>25</sup> Pune, Hyderabad, Indore, Bhopal, Vishakhapatnam, Ahmedabad, Surat, Lucknow and Ghaziabad.

<sup>26</sup> A Green Bond is a type of bond issued to finance projects that generate environmental benefits, such as renewable energy, energy efficiency, clean transportation and sustainable water projects, among others.

<sup>27</sup> District Mineral Foundation (DMF) is meant for the welfare/development of mining-affected people and areas. The funds for DMF will be met from additional contributions of 30 per cent of royalty by existing miners and 10 per cent by miners granted mines after the Mines and Minerals (Development and Regulation) Amendment with effect from January 12, 2015.

for health/sanitation work/carrying emergency staff, and withdrawal from the general provident fund (GPF) except for urgent treatment, education, and marriage-related expenditure were restricted.

## 6. Lessons and Conclusions

3.33 The impact of the pandemic has been heterogeneous across time and space, warranting the adoption of localised approaches for crisis management rather than a centralised response. During the second wave, the third-tier echelons of government became frontline pandemic warriors. Their involvement in the COVID-19 response became the catalyst for forging vistas of cooperation with civil society, NGOs and the private sector in mitigating the pandemic's impact. It is in this context that a key lesson can be derived from the pandemic experience – the importance of strengthening local government finances.

3.34 Before the pandemic, local governments across the world suffered from insufficient budgets, over reliance on funds from upper tiers of government, lack of access to new sources of revenue, limited autonomy to change/introduce taxes, and low levels of taxpayer compliance. COVID-19 amplified these structural constraints on local government finances and brought to the fore new challenges such as revenue volatility and demand for public services and investments in areas which were not required earlier. In other words, COVID-19 has increased the responsibilities of local governments towards delivery of public services manifold.

3.35 In India, the role of MCs in cities that were the hotspots became pivotal. As a consequence, their budgets came under severe strain, forcing

them to cut down discretionary spending, use reserves and other contingency funds, including resources from funds linked to the infrastructure sector or committed liabilities. This diversion of funds may have serious consequences for the financial sustainability of cities in the short to medium term. On the positive side, many of the MCs in India have now created special reserve funds to cope with future pandemics. This imparts a degree of resilience to their finances.

3.36 Going forward, increasing the financial autonomy of civic bodies, strengthening their governance structures and financially empowering them *via* higher resource availability, including through own resource generation are critical for their effective intervention at the grassroots level.

3.37 Financial autonomy notwithstanding, the importance of transfers from upper tiers of the government during a crisis cannot be overemphasised. During the pandemic, inter-governmental transfers were among the least affected sources of revenue. Thus, strengthening and streamlining transfers from upper tiers of government through institutionally sound mechanisms can help fortify the financial stability of MCs.

3.38 There are several facets of municipal finances that merit reforms. Greater fiscal transparency, revitalising the municipal bond market, boosting developmental/infrastructure finance and green finance, exploiting land-based financing opportunities and developing partnerships with impact finance in the private space would all strengthen the third tier, and make it viable and effective, especially in managing and mitigating future crises.

# IV

## Way Forward

4.1 Last year's Report on State Finances addressed the role of the States in the context of the regional dimension of the pandemic and the implications for healthcare infrastructure, digitisation and public finances. In 2021-22, the second wave of the pandemic has further scarred the fiscal positions of States. In contrast to the first wave, the response to the second wave was multi-pronged and decentralised, with a relatively greater incidence of responsibilities on the third-tier of government, namely, municipal corporations (MCs). This has inspired the choice of the theme of this year's report – how this third-tier coped with the pandemic.

4.2 The first wave hit India at a time when majority of the States had already formulated their budgets for the year 2020-21. The severe economic consequences of the first wave took a grievous toll, especially during the first half of 2020-21. In the second half of the year however, with the fading away of infections and easing of restrictions, States could repair their finances on the back of a recovery in revenue collection and greater certainty on the GST compensation cess. In 2021-22 so far, revenue receipts of States have posted robust growth, led by their own tax revenue from State GST, excise duty and sales tax collections. Higher devolution and frontloading

of GST compensation by the Centre have also provided a cushion.

4.3 In 2020-21, the shortfall in States' revenue collections did not result into a concomitant fall in their capital outlay. This was mainly on account of the scheme of "Special Assistance to States for Capital Expenditure" announced by the Centre on October 12, 2020 as part of the *Atma Nirbhar Bharat Abhiyan*<sup>1</sup> as well as reallocation and reprioritisation of expenditure by the States themselves. In 2021-22, State governments' capital expenditure remains robust so far – the ratio of revenue spending to capital outlay (RECO) is budgeted to decline to 5.5 in 2021-22 from 6.7 in 2020-21.<sup>2</sup> Within capital outlay, it is important for the States to channelise expenditure to sectors that crowd in private investments and optimise multiplier effects and inter-temporal and inter-sectoral linkages that boost output, employment and productivity.

4.4 As the impact of the second wave wanes, State governments need to take credible steps to address debt sustainability concerns. The combined debt to GDP ratio of States which stood at 31 per cent at end-March 2021 and is expected to remain at that level by end-March 2022, is worryingly higher than the target of 20 per cent to be achieved by 2022-23<sup>3</sup>, as per the

<sup>1</sup> Under the scheme, financial assistance is provided to State governments in the form of 50-year interest free loan. An amount not exceeding ₹12,000 crore was earmarked for 2020-21 and an amount of ₹11,830.3 crore was released to the States in 2020-21. On April 29, 2021, the Centre announced the decision to provide an additional amount of upto ₹15,000 crore to States as interest-free 50-year loan for spending on capital projects. As of September 25, 2021, the Centre has approved capital projects of ₹2,903.8 crore in 8 States under the scheme entitled 'Special Assistance to States for Capital Expenditure for 2021-22'. The Ministry has also released an amount of ₹1,393.8 crore to these States, viz., Bihar, Chhattisgarh, Himachal Pradesh, Madhya Pradesh, Maharashtra, Punjab, Sikkim and Telangana.

<sup>2</sup> Capital expenditure undertaken by States accounts for more than 60 per cent of general government capital expenditure.

<sup>3</sup> The N.K. Singh panel to review India's existing Fiscal Responsibility and Budget Management (FRBM) rules (2017) has recommended a debt-to-GDP ratio of 40 per cent for the Central government and 20 per cent for the State governments together by the financial year 2022-23.

recommendations of the FRBM Review Committee (Chairman: N.K. Singh). In view of the pandemic induced slowdown, in its projections the FC-XV<sup>4</sup> (Chairman: N. K. Singh) expects the debt-GDP ratio to peak at 33.3 per cent in 2022-23 (in view of the higher deficits in 2020-21, 2021-22 and 2022-23), and gradually decline thereafter to reach 32.5 per cent by 2025-26. The budgeted GFD of 3.7 per cent of GDP for States for the year 2021-22 - lower than the 4 per cent level as recommended by the FC-XV – reflect the State governments' intent towards fiscal consolidation.

4.5 In 2021-22 so far (April-September, 2021), the gross and net market borrowings by State governments have been 13 per cent and 21 per cent lower than in the corresponding period of the previous year, respectively. States have preferred to borrow from financial accommodation provided by the RBI through short-term borrowing *via* the special drawing facility (SDF) and ways and means advances (WMA). Additionally, in recent years, the States have been accumulating sizeable cash surpluses in intermediate treasury bills (ITBs) and auction treasury bills (ATBs), although they involve a negative carry of interest rates for the States. This warrants improvements in cash management practices.

4.6 In the medium term, improvements in the fiscal position of State governments will be contingent upon reforms in the power sector as recommended by FC-XV and specified by the Centre<sup>5</sup> - creating transparent and hassle-free

provision of power subsidy to farmers; preventing leakages; and improving the health of the power distribution companies (DISCOMs) by alleviating their liquidity stress in a sustainable manner. Timely payments of State dues to DISCOMS and, in turn, by them to Generation Companies (GENCOS) hold the key to the sector's financial health. Undertaking power sector reforms will not only facilitate additional borrowings of 0.25 per cent of GSDP by the States but also reduce their contingent liabilities due to improvement in financial health of the DISCOMs.

4.7 On the third-tier front, increasing the functional autonomy of the civic bodies, strengthening their governance structure and financially empowering them *via* higher resource availability through self-resource generation and transfers are critical for building resilience and effective interventions at the grass-root level. State governments should set up State Finance Commissions (SFC) at regular intervals, in line with the recommendations of FC XV. States may also urge rural and urban local bodies to make audited accounts available online in a timely manner to access grants. In addition, States should undertake local body reforms as stipulated by the Centre<sup>6</sup> to improve the financial autonomy of third-tier governments.

4.8 Overall, sub-national fiscal positions are at an inflection point. Empowerment of the third-tier government presents an opportunity that can result in better and more effective pandemic crusaders in the future.

<sup>4</sup> The Report was presented to the Parliament on February 1, 2021.

<sup>5</sup> PIB Press Release dated February 19, 2021.

## Explanatory Note on Data Sources and Methodology

### Data Sources

This Report is based on the receipts and expenditure data presented in the budget documents of 31 State governments and Union Territories (UTs) with legislature. For accounts data, this has also been supplemented with the data taken from Finance Accounts of the States published by Comptroller and Auditor General (CAG) of India, wherever required. Data from 2017-18 onwards includes UTs with legislature. The analysis conforms to the data presented in State budgets and the accounting classification thereof. The detailed Appendices are based on the classification of receipts and expenditure of individual States/UTs into revenue and capital accounts. Some supplementary information regarding outstanding guarantees (contingent liabilities), expenditure on 'wages and salaries' and 'operations and maintenance' are obtained from State governments. Data on outstanding guarantees from 2006-07 to 2016-17 were obtained from the CAG.

Data on the outstanding state wise loans under the National Small Savings Fund have been obtained from the CAG. The outstanding State-wise central loans have been sourced from the Controller General of Accounts (CGA). Besides, several items of data including the avilment of ways and means advances (WMA)/overdraft (OD), market borrowings, investment of State governments in Union Government's treasury bills and the data on the State development loans (SDLs) have been taken from the Reserve Bank records. Data on gross domestic product (GDP)

and the State-wise gross state domestic product (GSDP) are at market (current) prices and have been sourced from the National Statistics Office (NSO). This is supplemented by information received from the respective State governments and GSDP estimates used in the budget documents of the State Governments. Wherever GSDP data are not available or not consistent with CSO's data, the data are estimated based on the previous three years' annual average growth rate or the growth rate projected by States. GSDP data prior to 2011-12 correspond to 2004-05 base and data from 2011-12 onwards correspond to 2011-12 base, as published by NSO. GDP data for the year 2021-22 (BE) is taken from the Union Budget 2021-22.

Jammu and Kashmir has not provided accounts data for 2019-20 in its budget for 2021-22. This has been the practice in the past also. Therefore, the RBI has been using audited accounts data released by CAG each year. For 2019-20, however, the data pertaining to J&K are provisional data as these are not yet approved. Furthermore, this data are available for 2019-20 in 2 parts – Accounts (1<sup>st</sup> April 2019 to 30<sup>th</sup> October 2019), and Accounts (31<sup>st</sup> October 2019 to 31<sup>st</sup> March 2020). For comparability with other states/UTs, actuals for J&K is taken by combining these two-period data.

The disaggregate of 'Discharge of Internal Debt' are not available for Arunachal Pradesh 2006-07 to 2016-17. Therefore, the whole amount was put under 'others'. The data are available from 2017-18 onwards.

## Methodology

The analysis of the expenditure data is disaggregated into development and non-development expenditure. All expenditures relating to revenue account, capital outlay and loans and advances are categorised into social services, economic services and general services. While social and economic services constitute development expenditure, expenditure on general services is treated as non-development expenditure. Thus, development expenditure includes the development components of revenue expenditure, capital outlay and loans and advances by State governments. Social sector expenditure includes expenditure on social services, rural development, and food storage and warehousing (given under revenue expenditure, capital outlay and loans and advances by State governments).

The term 'Aggregate Expenditure' used in Chapter II is defined as summation of revenue expenditure, capital outlay and loans and advances. The term 'Aggregate Disbursement' used in Appendix Tables and Statements is summation of aggregate expenditure and debt repayments. The capital receipts provided in Appendix Tables (consolidated) and Statements (State-wise) and used in the analysis include public account items on a net basis while these are excluded from the respective capital expenditure. Percentage variation worked out in Appendix Tables and Statements may differ due to rounding-off of figures.

The data provided in Appendix III (capital receipts) and Appendix IV (capital expenditure) are on a gross basis for all items, including public account items. Additionally, total capital receipts

taking public account items on a net basis are also given in Appendix III to have comparable data with those of the previous years. Total capital expenditure given in Appendix IV is exclusive of public account items. The 'overall deficit/surplus' in the appendices is equal to the sum of cash deficit/ surplus (difference between the closing balance and opening balance), increase/decrease in cash balance investment account and the increase/ decrease in WMA/ ODs extended by the Reserve Bank of India.

## Methodology for Debt Statistics

The Reserve Bank in its Report of 2005-06 budgets had compiled a data series on outstanding liabilities of State governments since 1990-91. In the 2006-07 Report, a revised series of outstanding liabilities was published by including data on reserve funds, deposits and advances and contingency funds of state governments. In the 2007-08 Report, a revised data series on outstanding liabilities of State governments was published from 2003-04 onwards based on the Combined Finance and Revenue Accounts of Union and State governments, Reserve Bank of India records, data received from the Ministry of Finance (Government of India), Union Finance Accounts (CGA) and the budget documents of State governments. The present Report follows the same methodology for compilation of outstanding liabilities as given in 2007-08 Report and uses the same data sources.

The outstanding liabilities of the State governments as at end-March 2020 have been directly taken from CAG of India's 'Combined Finance and Revenue Accounts of the Union and State Governments in India' (except for column nos. 2 to 4 and 15 in Statement 18).

The outstanding liabilities position for end-March 2021 and end-March 2022 have been derived by adding annual flows [2020-21 (RE) and 2021-22 (BE)] to the outstanding amounts for end-March 2020 and end-March 2021. This has been done in conformity with recommended methodology of 'Report of the Working Group on Compilation of State Government Liabilities', 2005. Based on the State-wise market loans (Statement 22), the maturity profile of outstanding state government securities is provided in

Statements 23 and 24. These Statements also incorporate the appropriation of liabilities of the four bifurcated states (Bihar, Madhya Pradesh, Uttar Pradesh and Andhra Pradesh) to their respective newly formed states (Jharkhand, Chhattisgarh, Uttarakhand and Telangana) on the basis of Government of India notifications.

#### **e-STATES Database**

Subsequent to the release of this Report, the [e-STATES data base](#) released by the Reserve Bank of India will stand-updated.

RE: Revised Estimates. BE: Budget Estimates. \$: Based on latest GDP. \*upto October 01, 2021 over March 31, 2021

**Notes:** 1. Negative (-) sign indicates surplus in deficit indicators.

2. Revenue deficit is the difference between revenue expenditure and revenue receipts.

3. Gross fiscal deficit is aggregate expenditure (aggregate disbursement net of debt repayments) minus revenue receipts, non-debt capital receipts.

4. Primary deficit is gross fiscal deficit less of interest payments.

5. Primary revenue deficit is revenue deficit less of interest payments.

6. Figures in parentheses are as percentage of GDP.

7. The net RBI credit to State governments refers to annual variations in loans and advances given to them by the RBI net of their incremental deposits with the RBI.

8. Data from 2017-18 onwards include Delhi and Puducherry also.

**Sources:** Budget documents of the State governments, CAG for 2019-20 in respect of Jammu & Kashmir and Reserve Bank Records. Details in methodology.

RE: Revised Estimates.

BE: Budget Estimates.

NSSF : National Small Savings Fund.

Avg.: Average.

Notes: 1. 'Others' is a residual item and includes, inter alia, Contingency Funds, appropriation to Contingency Funds, Inter-State Settlement, Land Compensation and Other Bonds and Loans from Financial Institutions other than mentioned in the Table.

2. Due to the change in the accounting procedure from 1999-2000, Loans from the Centre excludes States' share in small saving collections which is shown under Securities issued to the NSSF under Internal Debt. Accordingly, repayments of small saving collections included under repayments of Loans to Centre is now shown under discharge of Internal Debt to have consistent accounting for receipts and expenditure.

3. All figures are on a net basis.

4. Data from 2017-18 onwards include Delhi and Puducherry also.

Sources: Budget documents of the State governments, CAG for 2019-20 in respect of Jammu & Kashmir. Details in methodology.

@@ : Include outlay on Foreign Trade and Export Promotion Technology, other General Economic Services, Investments in General Financial and Trading Institutions, International Financial Institutions, etc.

**Note:** Data pertaining to Jammu and Kashmir for 2019-20 are taken from CAG and are provisional.

**Source:** Budget documents of state governments. Details in methodology.

## NOTES TO APPENDICES

### Appendix I:

1. Where details are not available in respect of one or several sub-groups under a major group, the relevant amount is shown against the sub-group 'Others' except for Sales Tax where the relevant amount is shown against the sub-group 'State Sales Tax'.
2. Where the break-up of grants for 'Central Plan Schemes' and 'Centrally Sponsored Schemes' are not available, the relevant amount is shown against 'Centrally Sponsored Schemes'.
3. The data are subject to rounding-off.

### Appendix II:

1. Where details are not available in respect of one or several sub-groups under major groups, the relevant amount is shown against the sub-group 'Others'.
2. The data are subject to rounding-off.

### Appendix III:

1. All figures are on a gross basis including those under 'Public Account'. Further, WMA from RBI is included under 'Internal Debt' while 'Cash Balance Investment Account' and 'Deposits with RBI' are included under 'Suspense and Miscellaneous'. Total capital receipts taking public accounts on a net basis are also given to provide comparable data with those of the previous years.
2. Sub-groups 'Small Savings, Provident Funds, etc.', 'Reserve Funds', 'Deposits and Advances', 'Suspense and Miscellaneous' and 'Remittances' pertain to the 'Public Account'.
3. Where details are not available in respect of one or several sub-groups under a major group, the relevant amount is shown against the sub-group 'Others'.
4. Where the break-up of loans for 'Central Plan Schemes', and 'Centrally Sponsored Schemes' are not available, the relevant amount is shown against 'Centrally Sponsored Schemes'.
5. The data are subject to rounding-off.

### Appendix IV:

1. All figures are on a gross basis including those under 'Public Account' and 'Contingency Fund'. Total capital expenditure exclusive of public accounts are also given to provide comparable data with those of the previous years.
2. Where details are not available in respect of one or several sub-groups under major groups, the relevant amount is shown against the sub-group 'Others'.
3. The data are subject to rounding-off.
