

Industrial Outlook Survey: Q3: 2012-13 (Round 60)¹

The Industrial Outlook Survey conducted in **Q3:2012-13**, the 60th round in the series, gives **assessment** of business situation of companies in the manufacturing sector for **Q3:2012-13** and their **expectations** for the ensuing quarter **Q4:2012-13**. The survey elicited response from 1,388 (response rate about 70 per cent) manufacturing companies.

Highlights:

- The assessment of major demand side parameters, *viz:* [production](#), [capacity utilisation](#), [exports](#) and [imports](#) for Q3:2012-13, measured by net responses of the companies, remained positive but marginally lower as compared to those in the previous quarter.
- On the other hand, the outlook of demand conditions for Q4:2012-13 improved, with the exception of imports.
- Net response for [order books](#) improved marginally in Q3:2012-13 from a quarter ago, but remained lower as compared to the corresponding quarter of previous year.
- Majority of the respondents reported no change in the level of raw material and finished goods [inventories](#) in both the assessment and expectation quarters.
- The level of optimism on [overall financial situation](#) remained broadly the same as compared with the previous quarter.
- Net response on [availability of finance](#) moderated for both the quarters.
- Both [cost of external finance](#) and [cost of raw materials](#) were perceived to rise, but by a lower proportion of respondents as compared to a quarter and a year ago.
- The assessment and expectation on [profit margin](#) remained more or less balanced for Q3:2012-13 and Q4:2012-13, respectively.
- The [Business Expectation Index \(BEI\)](#), a measure that gives a single snapshot of the industrial outlook in each quarter, increased marginally to 104.5 for Q3:2012-13 from 103.8 in the previous quarter.
- The index, however, remained broadly at the same level for Q4:2012-13 (115.6 from 115.7).

¹ Prepared in the Division of Enterprise Surveys, Department of Statistics and Information Management. Data relating to the previous survey round were published in November 2012 issue of the RBI Bulletin. The survey results are based on the replies of the respondents and are not necessarily shared by the Reserve Bank of India.

- The BEI for both the assessment quarter and the expectation quarter have persisted in the growth terrain, i.e. above 100, which is the threshold separating contraction from expansion.
