ANNEXURE I (para 1.8)

Sui	mmary of detailed events in the run up to the EMU and EURO
1000	
1988	ENU Committee established (Delors Committee)
1989	Stage I of EMU begins with the publication of the EMU Report.
1992	The Treaty of European Union is signed at Maastricht. Inter-alia the treaty lays down the convergence criteria for EU members to join the EMU
1993	Treaty on European Union (Maastricht Treaty) ratified by member states.
1994	Stage II of EMU begins with the establishment of the EMI in Frankfurt.
End of 1996	The Council reports that the convergence criteria have still not been achieved for January 1, 1997 to be the first possible date for January 1, 19
March 25, 1998	The European Commission and the EMI recommend an 11-member EMU launch at Stage III in view of the high degree of sustainable convergence achieved by these countries.
May 2, 1998	The council adopts recommendation for the 11-member EMU; appoints the ECB Executive Board and decides to adopt current central parities for fixing irrevocably, parities for the currencies of the EMU participants.
January 1, 1999	Stage III A of the EMU. Euro will become a legal currency of EMU countries. The exchange rates of the currencies of participating states will be irrevocably locked; the value of ECU will be determined and converted to euros at the rate of 1:1. The ECB and ESCB will take control of the monetary policy. Open market operations, new public debt issues and foreign exchange payments will be in euros. Stock exchange quotes will be in euros. Notionally, the interest rate differentials between the member countries will disappear. The TARGET payment system will become operational. Systems eligible as Securities Settlement Systems and approved by ECB will join ESCB's settlement systems. The principle of 'no compulsion-no prohibition' will apply for three years, implying that individuals, corporates and institutions will be free to decide whether to switch to euro immediately or any time later in the next three years.
January 1, 2002	Stage III B of the EMU. Euro bank notes and coins will be introduced. Retail payments will shift to euro. All accounting will be converted from old national currencies to euro. SSSs will have to meet intra-day DvP settlement facilities. It is also the likely date for the expansion of EMU.
July 1, 2002	Stage III C: Former national currencies cease to be legal tenders six months after the introduction of euro bank notes and coins. Single currency is achieved.

Annexure II

ERM bilateral central rates to be used in determining the irrevocable conversion rates for the Euro. (para 1.20)

Note:

10

(i) DM = Deutschemark; BEL/LUX = Belgium (Luxembourg) franc; ESP = Spanish peseta; FRF = French Franc; IEP = Irish punt; ITL = Italian lira; NLG = Dutch guilder; ATS = Austrian schilling; PTE = Portuguese escudo; FIM = Finnish markka.

(ii) In order to avoid minor arithmetical inconsistencies stemming from inverse calculations, only one bilateral rate for each pair of currencies as given in the Table will be used in conversion calculations.

Source : European Monetary Institute, Annual Report, 1997

Annexure III

Examples in Conversion and Rounding (Para 3.17)

The following are three **hypothetical** conversion rates :

1 EUR : 1.23456 DM 1 EUR : 12.3456 FRF 1 Eur : 123.456 ESP

/ 1

A. Conversion from EUR to NCU will involve multiplying by the fixed conversion rate :

EUR to FRF as an example

50.34 EUR * 12.3456 = 621.47<u>7</u>504 FRF rounded up = 621.48 FRF

40.05 EUR * 12.3456 = 494.44<u>1</u>280 FRF rounded up = 494.44 FRF

B. <u>Conversion from NCU to EUR will involve dividing by the fixed</u> <u>conversion rate :</u>

FRF to EUR as an example

1523.90 FRF / 12.3456 = 123.436690 EUR rounded up = 123.44 EUR

C. <u>Conversion from NCU to NCU will involve triangulation through</u> <u>the Euro</u>

FRF to DM as an example

14

Step 1 : 3841.50 FRF / 12.3456 = 282.003<u>3</u>05 EUR rounded to three decimal places = 282.003 EUR*

Step 2 : 282.003 EUR * 1.23456 = 348.14<u>9</u>624 DM Rounded up = 348.15

* It is permissible (but not compulsory) to round the intermediate euro amount to no fewer than three decimal places. It is not permissible to round the intimediate euro amount to fewer than 3 decimal places.

Source : Understanding the Euro and what it means for your business – ANZ Grindlays August 1998 **D.** Conversion from NCU to another foreign currency (not a NCU)

The following are two hypothetical conversion rates :

1 EUR : 0.6778 Pound Sterling 1 EUR : 1.96804 DM

To Convert DM 1000 into euro applying Article 235 Regulation

Step 1 :

DM 1000 = 1000/1.96804 = EUR 508.119753 (It may not be necessary to round the intermediate amount)

Step 2 :

EUR 508.12 = GBP 508.11973 * 0.6778 = GBP 344.40355 (No specific rounding convention at this step)

E. Conversion from foreign currency to a NCU (not a NCU)

To Convert Pound Sterling 1000 into DM applying Article 235 Regulation

Step 1 :

GBP 1000 = 100/0.6778 = EUR 1475.361463 (no specific rounding convention at this step)

Step 2:

15

EUR 1475.361463 = 1.96804 * 1475.361463 = DM 2903.57<u>0</u>373 rounded as per Article 235 Regulation = DM 2903.57

F. Conversion from NCU to US dollar (say from DM to USD)

The following are two hypothetical conversion rates :

1 EUR : 1.96804 DM 1 EUR : 1.1050 USD (market rate) Step 1 : DM 1000 = 1000/1.96804 = EUR 508.11975 Step 2 : EUR 508.11975 = USD 508.11975 * 1.1050 = USD 561.4723 = USD 561.47 G. Conversion from USD to DM Step 1 : USD 1000 = 1000/1.1050 = EUR 904.9774 Step 2 :

EUR 904.9774 = 904.9774 * 1.96804 = DM 1781.031722 = DM 1781.03

Summary Table of Conversion Methods: (Para 3.17)

	From NCU	From euro	From another currency
To NCU	Article 235 Regulation: Triangulation	Article 235 Regulation: fixed conversion rate	Via euro or cross rates
To euro	Article 235 Regulation: fixed conversion rate		Foreign Exchange: market exchange rate
To another currency	Via euro or cross rates	Foreign Exchange: market exchange rate	-

Annexure V

EURO LIBOR and EURIBOR

(para 3.24)

	EURO LIBOR	EURIBOR
Published by	British Bankers Association (BBA)	European Banking Federation (EBF)
Time for publication	11.00 a.m. London time, daily	11.00 a.m. Brussels time, daily
Days of publication	TARGET Calendar business days	TARGET Calendar business days
For value	Second TARGET day after fixing	Second TARGET day after fixing
Day Count Basis		Actual number of days/360
	Actual number of days/360	An equivalent in actual number of days/365 will also be published
Panel	16 major banks active in the euro	• 47 EMU banks
	market in London. The list of	• 4 non-EMU but EU banks
	banks contributing to the LIBOR will be established by BBA during the third quarter of 1998	• Upto 6 international banks located in the 'in' area
Determination of the panel	British Bankers Association	Regularly revised by EURIBOR
of contributors Coloulation		Selection committee
Calculation	• Elimination of the 4 highest and 4	• Discard top and bottom 15%
	lowest quotes	 Average of the remainder
	 Average of the remainder 	
Fixing periods	1 week, 1 month to 12 months	1 week, 1 month to 12 months

Annexure VI

15

Money, Foreign Exchange and Bond market Conventions (para 3.29)

i. Money Market :	
Day count basis	Actual/360 (expected)
Settlement basis	Spot (two days) standard
Fixing period for derivatives contracts	Two day rate fixing convention
Business days	Target operating days form the basis of euro business days
ii. Foreign Exchange Market :	
Settlement timing	Spot conventions, with interest accruals beginning on the
	second day after the transition has been executed.
Quotation	Certain for uncertain (i.e. ER 1 = X foreign currency units)
Reference rate	The ECB or NCBs would be responsible for the publication
	of daily closing reference rates
iii. Bond Markets :	
Day count basis	Actual/Actual
Quotation basis	Decimals rather than fractions
Business days	Target operating days will form the basis of euro business
	days
Coupon frequency	No standard practice recommended
Settlement dates	The standard for internationally traded cross-border
	transactions for euro should remain on a T+3 business days

Annexure VII

<u>EEFAS – European Bond Commission Recommendation</u> <u>on Euro Bond market Conventions</u> (para 3.37)

• Price – yield formula has been stipulated;

10

- When counting days between dates, the settlement date is excluded, while the distant date is included;
- For the purpose of calculating years and fraction of years, time should be counted backwards from the final contractual cash flow;
- Redemption of bonds as well as coupon payments on February 29, should be avoided;
- The last coupon period should not be irregular;
- Actual/actual day count convention means : actual number of days elapsed/actual number of days in the period;
- By definition fixed rate bonds have equal periodic payments. Thus semiannual coupons should be equal to half of the annual rate regardless of the number of days in the period; similarly quarterly coupons should be equal to quarter of the annual rate;
- Bond coupon rates and prices should be expressed in decimal format;
- Treasury bills and money market instruments should use actual/360 basis both for day count, and discounted yield, regardless of their effective maturity;
- Stripped bonds should be quoted on a yield basis, based on actual/actual day.

Annexure VIII

Documentary credits issued and payable on or after 1.1.2092 must be denominated in euro. 4. Documentary credits issued and payable on or after 1.1.2092 must be denominated in euro. 5. Documents of credit issued between 1.1.2002 in a national currency unit or in the currency of a particular EMU participating state by crediting an account located in such member state, payment may at the debtor's (issuing bank's) option be effected in euro. 5. Documents of credit issued between 1.1.2002 in a national currency unit of the beneficiary's place of business. However, where the currency of credit is nuch member state, payment may at the debtor's (issuing bank's) option be effected in euro. 5. Documentary Credits issued and payable on or after 1.1.2002 6. Documentary Credits issued and payable on or after 1.1.2002 7. Bank to bank reimbursements 7. Bank to bank reimbursements 	2.	Documentary credits issued before January 1, 1999 and payable between 1.1.99 and 1.1.2002 in a national currency unit	Payment in currency of credit Documents issued between 1.1.99 to 1.1.2002 may be presented either in the currency of the credit or in the euro equivalent or equivalent cross-value in the national currency unit of the beneficiary's place of business. However, if payment to be made in the currency of an EMU participating state, and by crediting an account located in such member state, payment may at the debtor's option (issuing bank's) be effected in euro equivalent.
 4. Documentary credits issued and payable on or after 1.1.1999 and before 1.1.2002 in a national currency unit or euro Payments in currency of credit Documents issued between 1.1.1999 to 1.1.2002 may be presented in the currency of credit or in euro equivalent or in the equivalent cross value in the national currency unit of the beneficiary's place of business. However, where the currency of credit is a national currency unit, and the payment is to be made in the currency of a particular EMU participating state by crediting an account located in such member state, payment may at the debtor's (issuing bank's) option be effected in euro. 5. Documents of credit issued between 1.1.99 and 1.1.2002 in a national currency unit or in euro, payable but after 1.1.2002 6. Documentary Credits issued and payable on or after 1.1.2002 6. Documentary Credits issued and payable on or after 1.1.2002 7. Bank to bank reimbursements 7. Bank to bank reimbursements 	3.	Documentary credits issued in a national currency unit before 1.1.1999 and payable on or after 1.1.2002	Payments to be made in euro. Documents issued between 1.1.1999 to 1.1.2002 may be presented either in the currency of credit or in euro equivalent, or equivalent cross value in national currency unit of beneficiary's place of business. Documents issued on or after 1.1.2002 must be denominated in euro.
 5. Documents of credit issued between 1.1.99 and 1.1.2002 in a national currency unit or in euro, payable but after 1.1.2002 of credit or as the case may be, in euro or in national currency unit of the beneficiary's place of business, provided always that the documents issued on or after January 1, 2002 must be denominated in euro. 6. Documentary Credits issued and payable on or after 1.1.2002 6. Documentary Credits issued and payable on or after 1.1.2002 7. Bank to bank reimbursements 7. Bank to bank reimbursements 	4.	Documentary credits issued and payable on or after 1.1.1999 and before 1.1.2002 in a national currency unit or euro	Payments in currency of credit Documents issued between 1.1.1999 to 1.1.2002 may be presented in the currency of credit or in euro equivalent or in the equivalent cross value in the national currency unit of the beneficiary's place of business. However, where the currency of credit is a national currency unit, and the payment is to be made in the currency of a particular EMU participating state by crediting an account located in such member state, payment may at the debtor's (issuing bank's) option be effected in euro.
 6. Documentary Credits issued and payable on or after 1.1.2002 7. Bank to bank reimbursements Credits cannot be issued in a national currency unit. They must be issued in euro, payments made and documents denominated in euro. Reimbursement claims to be made and honoured in the currency of the reimbursement 	5.	Documents of credit issued between 1.1.99 and 1.1.2002 in a national currency unit or in euro, payable but after 1.1.2002	Payment made in euro. Documents may be presented either in the currency of credit or as the case may be, in euro or in national currency unit of the beneficiary's place of business, provided always that the documents issued on or after January 1, 2002 must be denominated in euro.
7. Bank to bank reimbursements the currency of the reimbursement	6.	Documentary Credits issued and payable on or after 1.1.2002	Credits cannot be issued in a national currency unit. They must be issued in euro, payments made and documents denominated in euro.
	7.	Bank to bank reimbursements	Reimbursement claims to be made and honoured in the currency of the reimbursement

authorisation/undertaking. However if such currency is the national currency unit of an EMU participating state, from 1.1.1999, they <u>may</u> be made and honoured in the euro equivalent, and as from 1.1.2002 they <u>must</u> be made and honoured in euro equivalent.

- For 1 to 5 above, documents (including insurance documents mentioned in Uniform Customs and Practices 341) are not considered as being inconsistent with one another, if, in a single presentation of documents, any documents are denominated in the currency of credit/and or in euro and/or in the national currency unit of the beneficiary's place of business.
- The principles also apply to transferable credits. Transferable credits issued in a national currency unit, and to be transferred during the transitional period, the transferring bank may convert the currency and amount of the credit into the euro equivalent.
- The principles also apply to guarantees and bonds.
- Collections to be made in the currency stipulated in the collection instructions. However if the collection instrument stipulates a national currency unit of an EMU participating state, as of 1.1.99 payment may be made in euro equivalent, and as of January 1, 2002, payment must be made and accepted in euro equivalent.

Note: Developing countries include Hong Kong and Taiwan. Taiwan's disclosed currency share as of May 1997 is applied to end-1997 holdings. Euro-currencies include holdings of private ECUs. Dollar reserves of developing countries are reduced by the current value of the Brady bond collateral held at the Federal Reserve Bank of New York and by advance payments for US military exports as reported in the Treasury Bulletin. The reserve composition of Eastern European countries is estimated. The global total includes industrial countries.
