However, Micro and Small Enterprises (MSEs) are exempted from submission of Earnest Money Deposit (EMD) amount at the time of tendering subject to submission of Udyam Registration certificate (Udyog Aadhar Memorandum). However, they shall remit EMD in case the work is awarded to them. EMD submitted by the unsuccessful bidders will be returned by the Bank after awarding the work to successful bidder without any interest. EMD remitted by successful bidder will be returned by the Bank after submission of Final report without any interest.

5. The tenders for the above work shall be submitted in separate sealed covers addressed to The Regional Director, Reserve Bank of India, Estate Department, Fort Glacis-16, P.B.No.40, Rajaji Salai, Chennai -600001, so as to reach the office not later than **14.00 hours on August 08, 2025**. The envelopes shall be super-scribed "**Tender for Conducting Energy Audit in Bank's Office Building, Reserve Bank of India, Chennai**". Tenders will be opened on the same day at 15:00 hours.

6. Tenderers are advised to use only the forms supplied by the Bank and not to use any other forms. Incomplete tenders are liable for rejection. No terms and conditions or any other information/ enclosures shall be included in price bid.

7. The tenders shall be valid for acceptance by the Bank for a period of 90 days from the date of opening of tender and shall be extended by such period as may be mutually agreed to.

8. **Prices:** The price quoted for the work shall be firm till completion of the work and shall include GST and other applicable taxes, cost of transportation / accommodation etc. of the equipment's and persons deputed.

9. This contract is a fixed lump sum contract in respect of the entire energy auditing and to be paid for according to, at the rates contained in the schedule of rates and as provided in the said conditions.

10. The employer reserve to itself the right of altering the items to be executed by adding to or omitting any items without prejudice to this contract. However, the Auditor shall not be entitled to any payment for the works done exceeding the tender quantities unless specifically approved in writing by the Bank's engineer.

11. **Completion Period:** The time for completion of the entire work is six weeks from the 10th day of award of work. The site survey, data collection/measurements and draft report shall be completed in five weeks and the final report shall be submitted within one week thereafter.

12. **Terms of payment**

The following terms of payment, subject to statutory deductions shall be applicable for the work:

- a. 80% of the quoted amount shall be paid after completion of energy audit and submission of draft report to the Bank.
- b. 20 % of the quoted amount shall be paid on submission of the final report (3 copies) to the Bank.

13. All disputes arising out of or in way connected with this Agreement shall be deemed to have arisen at Chennai and only courts in Chennai shall have the jurisdiction to determine the same.

14. The Reserve Bank of India does not bind itself to accept the lowest or any tender and reserves to itself the right to accept or reject any or all the tenders, either in whole or in part, without assigning any reasons for doing so.

15. On receipt of intimation from the employer of the acceptance of his/ their tender, the successful tenderer shall be bound to sign a formal contract and within fourteen

days thereof or before commencement of the work, whichever is earlier, the successful tenderer shall sign an agreement in accordance with the draft agreement and the schedule of conditions but the written acceptance by the Reserve Bank of India of a tender will constitute a binding contract between the RBI and the person so tendering, whether such formal Agreement is or is not subsequently executed. The cost of necessary stamp paper for execution of the agreement shall be borne by the successful tenderer.

16. The successful tenderer shall obtain Workmen Compensation Policy (WCP) for the laborers working at the site, in joint names with Reserve Bank of India as the first name and the firm's name, at their cost valid till the virtual completion of works. The policy document and receipts for the premium paid shall be submitted to the employer before commencement of the works.

17. If the Auditor being an individual or a firm commits any act of insolvency or shall be adjudged an Insolvent or being an incorporated company shall have an order for compulsory winding up made against it or pass an effective resolution for winding up voluntarily or subject to supervision of the court and official Assignee or liquidator in such acts of solvency or winding up, as the case may be, shall be unable within seven days after notice of him requiring him to do so, to show to the reasonable satisfaction of the Bank's Engineer that he is able to carry out and fulfill the contract and to give security therefore, if so required by the Bank's Engineer. Or If the Bank's Engineer shall clarify in writing to the employer that the Auditor.

Section IV

Technical specifications

1. Introduction

Reserve Bank of India is desirous of undertaking Energy audit of the Electrical / Electromechanical installations provided in the office building at Chennai. The office building receives power supply at 11 KV from the Electricity supply authorities. In addition, diesel generator sets of suitable capacities have been installed to meet critical applications during power outages.

2. Objective

- a. The objective of energy audit is to have Energy Performance Assessment of equipment and utilities in the electrical sub-station, Electric power distribution network, HVAC systems, Electric motors and drives, Fans and blowers, Water pumping systems, UPS systems, lighting systems, Diesel generator sets etc. including study of energy consumption pattern and management of power demand in the building.
- b. Based on the above observations, to identify opportunities for energy saving and to have recommendations for the same along with cost benefit analysis.

3. Terms & conditions

A. Equipment / measuring instruments

i) All the equipment/instruments required for site measurements for carrying out the energy audit will have to be arranged by the firm without any extra payment to the Bank. The firm should have the following minimum equipment/instruments for energy audit:

1. Three-phase Power analyzer
2. Ultra sonic flow meter
3. Pressure gauges
4. Thermometers
5. Anemometers
6. Thermography camera
7. Harmonic Analyzer.

ii) All testing instruments/meters shall be accompanied with valid calibration certificate.

iii) The site measurements should be recorded in the presence of Bank's personnel.

Please note that the Bank will not provide any kind of assistance in the form of men/material and the firm will have to make their own arrangement for all assistance.

B. Work at site

The firm may visit the premises and ascertain site conditions. The work has to be carried out in a working office building without causing inconvenience to the normal working of the Bank. No power shut down will be provided during office hours. Power shut down required for the work will be given on holidays and after office hours at the discretion of

the Bank. No extra claims will be admissible later on these grounds.

The firm should deploy only qualified and experienced Engineers/Technician having requisite licenses to carry out such works. Utmost care shall be exercised by the firm in carrying out the work to ensure that no damage is caused to persons and properties. The Bank will not be liable for any injury or damage to persons and any such happening will be entirely the responsibility of the firm

Scope of Work:

A. Methodology:

Energy audit activities shall include the following:

1. **Pre Audit:** Meeting with Bank's technical team, Visual inspection of the site & verification of various documents regarding energy consumption and electrical installation.
2. **Audit:** Auditing and performance analysis to determine the condition of electrical installation as detailed below.
3. Submission of **Draft report** to Bank and discuss the report with Bank's representative.
4. Submission of **Final report** to Bank after incorporating the changes as per discussions with the Bank.

B. Equipment details

The energy audit of the electrical I electromechanical installation as detailed in **annexure-I** shall be conducted. The major list of equipment is as under:

1. Electricity Supply and Distribution
2. Air Conditioning System
3. Air Handling Units
4. Split I Package Air Conditioners
5. UPS
6. Lighting
7. Kitchen Equipment's
8. Water Pumps, Fire Pumps
9. Lifts,
10. DG sets
11. Any other existing electrical system not mentioned above

C. The energy audit of the electrical installation shall cover the following activities:

i) Building Energy Bills Analysis

Analysis of energy consumption pattern in the building with respect to peak demand, load pattern, power factor for the last 3 years

ii) Electricity Supply and Distribution network- Distribution Transformer(s)

Study and analysis of the utility pattern of transformer(s), checking no load loss of the transformers, measuring all Day Efficiency for each transformer etc.

LT Distribution Panels

1. General inspection of the LT distribution panel(s) for its maintenance and working including checking all the meters mounted on it.
2. Performing thermography for the cable termination wherever required and analysis of the observations
3. Measurement and analysis of demand and power factor, suggestions to reduce the demand and improve the power factor.
4. Study on Metering system and suggestion for improvement.
5. Study on V, I, KW fluctuation and profiling, V & I imbalances in the network.
6. Detailed examination of the existing energy use of the facility with break up.
7. Study and examination of use of electric energy, cost balance with break up.
8. Performance evaluation of installed capacitors to ensure deliverance of desired output, level of losses, management of system power factor and operation of capacitors.

iii) Air Conditioning Systems

Centralized Air Conditioning System

1. Performance evaluation of existing central air conditioning system(s) in all the areas, measurement and analysis of indoor temperatures and suggest to optimize the energy utilization.

Chillers -

1. Measuring all the operating parameters such as water flow (If the actual flow found to be in variation with the designed flow, the same needs to be adjusted to match designed flow before taking observations) inlet & out water temperatures, gas suction & discharge pressure, Power Consumption etc. after stabilizing the parameters.
2. Calculation of operating Input KW per TR (IKW / TR) of Chiller(s) at minimum three different available load conditions for each chiller.
3. Comparison of actual parameter with the design values, and suggestion for corrective actions to be implemented.

Pumps-

1. Measuring all the operating parameter such as water flow, suction & discharge head, power consumption etc.
2. Performance Evaluation of chilled water & Condenser water pumps and compare the same with the design or generally expected efficiency of such pumps.

Cooling Towers -

1. Measurement of various parameters for cooling tower fans, water flow rate, air flow rate, dry bulb temperature (DBT) wet bulb temperature (WBT) sump temperature, relative humidity etc.
2. Evaluation of cooling tower performance (Range, approach, and effectiveness) and

comparing it with designed data.

Air Handling Units

1. Measurement of airflow, Relative Humidity(RH), Supply air temperature (Tsa), Return air temperature (Tra), Chilled Water Inlet and outlet temperature i.e. Tin, Tout through cooling coil and energy consumption of Air Handling Units (AHUs).
2. Examination of Air Handling Units for air delivery capacity, capacity utilization, temperature pattern, pressure drop and operational pattern with respect to time to identify potential energy saving measures.
3. Calculation of actual tonnage of AHUs and Measurement of operating zone temperatures under each unit. Comparison of actual parameters with the design values.

Package/ precision Air Conditioners I Split or window air conditioners

1. Evaluation of operating Coefficient of Performance (COP) of Precision and package air Conditioner. Identification and suggestions for performance improvement and energy saving potential.
2. Calculation of actual tonnage and comparison of actual parameters with the design values and corrective actions.

iv) UPS

1. Measurement and analysis UPS loading, redundancy, operating efficiency, load pattern to suggest measures for energy cost reduction, Measurement and analysis of Harmonics as per standards.

v) Lighting

1. Examination of the performance of existing lighting system in all the areas, measurement of illumination levels, etc
2. To look possibilities to reduce energy use by incorporating energy efficient lighting system.
3. Study of operating electrical parameters like voltage, current etc in the lighting circuits.

vi) Diesel generator sets

1. General Inspection of DG set.
2. The DG sets are to be tested for operational performance and parameters including fuel consumption, power generated, Voltage, Ampere, KW, KWh, KVA should be recorded during the audit.

vii) Kitchen equipment

1. Examination of the performance of the existing kitchen equipment, measurement of power consumption etc to improve efficiency and optimizing power consumption.
2. To look possibilities to reduce energy use by incorporating energy efficient equipment.

viii) Fire Hydrant Pumps and Domestic Water Pumps

1. Performance analysis of all major motors (above 10 HP) needs to be studied for possible energy savings opportunities by the application of following items.

- a. Possibility of on /off control
- b. Interlocking
- c. Downsizing motors etc.

D. Energy Audit Report

The report shall contain complete building information, inventory of all equipment. It should include the log sheet data collected/measured at site, analysis of data (Log sheet and actual measured), observations of operational performance of various equipment, findings and recommendations for achieving energy and cost saving.

The recommended energy saving measures shall be categorized as (i) short term, (ii) medium term and (iii) long term measures for energy conservation. The report should also include energy use indices and comparison with industry averages.

The report should provide the estimated cost, estimated savings and simple pay back for each recommended energy saving measures in a chart. A detailed description of each energy conservation measure and supporting calculation with energy use and savings calculations, economic analysis and any assumptions that are made regarding operation or equipment efficiency shall be included. The recommendations for energy efficiency shall include the technical particulars of the equipment, life expectancy and details of manufacturer etc.
