# I. Monetary Policy

# Governor's Monetary Policy Statement on April 9, 2025

Shri Sanjay Malhotra, Governor on April 9, 2025 delivered the Monetary Policy Statement. In his opening remarks, Governor highlighted the volatile global environment marked by rising trade tensions, a weakening US dollar, falling crude prices and diverging monetary policies across economies. While remaining vigilant to these developments, the Reserve Bank of India (RBI) began the year celebrating its 90th anniversary, reflecting on its evolving role in India's economic journey. Domestically, India has made progress towards price stability and growth, with a notable decline in food inflation providing some relief. However, the RBI remains cautious due to global uncertainties and potential weather-related risks, even as growth shows signs of recovery from the previous year's slowdown.

#### Decisions and Deliberations of the Monetary Policy Committee (MPC)

The MPC decided to reduce the policy reporate by 25 bps from 6.25 per cent to 6.00 per cent, changing its stance to 'accommodative' to align inflation with the target while supporting growth. Consequently, the standing deposit facility (SDF) rate remains at 5.75 per cent and the marginal standing facility (MSF) rate and the Bank Rate at 6.25 per cent.

Commenting on the Assessment of Growth and Inflation, Governor mentioned that India's real GDP is estimated to grow at 6.5 per cent in 2024-25 on top of a 9.2 per cent growth rate observed in the previous year. In 2025-26, prospects of agriculture sector remain bright on the back of healthy reservoir levels and robust crop production. Manufacturing activity is showing signs of revival with business expectations remaining robust, while services sector activity continues to be resilient. Headline inflation moderated during January-February 2025 following a sharp correction in food inflation. The outlook for food inflation has turned decisively positive. The uncertainties regarding rabi crops have abated considerably and the second advance estimates point to a record wheat production and higher production of key pulses over that last year.

#### Liquidity and Financial Market Conditions

Speaking about the condition of liquidity and financial market, Governor mentioned that system liquidity was in deficit in January 2025 with net injection under the liquidity adjustment facility (LAF) scaling a peak of ₹3.1 lakh crore on 23rd January 2025. However, as a result of a slew of measures injecting liquidity of about 6.9 lakh crore rupees, the system liquidity deficit tapered during February-March 2025 and further turned into surplus on 29th March 2025. Coupled with government spending picking up pace during the latter half of March, system liquidity further improved and it stood at a surplus of ₹1.5 lakh crore as on 7th April, 2025.

#### Financial Stability

Governor stated that financial soundness parameters of the banking sector continue to be robust. The liquidity buffer in the banking system is well above the regulatory threshold. Profitability indicators are also healthy reflecting robust operational efficiency of the system. Similarly, the system-level parameters of NBFCs too are sound.

#### **External Sector**

Governor mentioned India's services exports remained resilient in January-February 2025, driven by software, business and transportation services. Going forward, net services and remittance receipts are expected to remain in large surplus, partly offsetting the trade deficit. The CAD for 2024-25 and 2025-26 are expected to remain well within the sustainable level. On the financing side, gross foreign direct investment (FDI) remained strong during the period of April 24 to January 25 in 2024-25 reflecting India's strong macroeconomic fundamentals. Net FDI however moderated sharply during this period due to higher repatriations and outward FDI. Net FPI inflows to India stood at 1.7 billion US dollars during 2024-25, supported by debt inflows as the equity segment recorded net outflows. External commercial borrowings and non-resident deposits, on the other hand, witnessed higher net inflows compared to that last year. To read the full statement, please click <u>here</u>.

### Resolution of MPC

On the basis of an assessment of the current and evolving macroeconomic situation, the MPC at its meeting on April 9, 2025 reduced the policy repo rate under the liquidity adjustment facility (LAF) by 25 basis points to 6.00 per cent with immediate effect; consequently, the standing deposit facility (SDF) rate shall stand adjusted to 5.75 per cent and the marginal standing facility (MSF) rate and the Bank Rate to 6.25 per cent;

The MPC also decided to change the stance from neutral to accommodative. However, it noted that the rapidly evolving situation requires continuous monitoring and assessment of the economic outlook. These decisions are in consonance with the objective of achieving the medium-term target for consumer price index (CPI) inflation of 4 per cent within a band of  $\pm$  2 per cent, while supporting growth. #### **Developmental and Regulatory Policies**

This Statement sets out various developmental and regulatory policy measures relating to (i) Regulations; (ii) Payment Systems; and (iii) Fintech.

#### i) Regulations

#### 1. Securitisation of Stressed Assets Framework

A prudentially structured securitisation transaction can be an enabler for resolution of stressed assets as it is expected to improve risk distribution and provide an exit route from such exposures for lenders. With this objective, RBI had released a discussion paper on Securitisation of Stressed Assets Framework in January 2023, to seek comments iii) Fintech from market participants on various aspects of the 6. 'On Tap' application facility under theme neutral framework. After factoring in the suggestions received from Regulatory Sandbox the stakeholders on the discussion paper, the draft framework for securitisation of stressed assets is being issued for public comments. The framework intends to enable securitisation of stressed assets through a marketbased mechanism, in addition to the existing ARC route cohorts was announced in October 2021. A fifth 'Theme under SARFAESI Act, 2002.

#### 2. Framework on Co-lending arrangements (CLA)

arrangements between banks and NBFCs for priority product or solution within the regulatory ambit of RBI sector loans. In light of the evolution of such lending could be tested if found eligible. Based on the experience practices and the potential of such lending arrangements gained and feedback received from stakeholders, it is now in catering to the credit needs of a wider segment in a proposed to make the Regulatory Sandbox 'Theme sustainable manner, it has been decided to expand the Neutral' and 'On Tap'. This initiative is expected to foster scope for co-lending and issue a generic regulatory continuous innovation and keep pace with the rapidly framework for all forms of co-lending arrangements evolving FinTech / regulatory landscape. Additional among REs. The draft guidelines are being issued for details in this regard will be communicated separately. public comments.

#### 3. Review of Guidelines for Lending against Gold Jewellerv

ornaments are extended by regulated entities (REs) for both India Act, 1934, was held during April 7 to 9, 2025. consumption and income-generation purposes. Prudential and conduct related regulations for such loans have been of India Act, 1934, the Reserve Bank published the issued from time to time and they vary for different minutes of the proceedings of the meeting on April 23, categories of REs. With a view to harmonising such 2025, i.e., the 14th day after meeting of the MPC. regulations across REs while keeping in view their risktaking capabilities and also to address a few concerns that Reserve Bank to gauge consumer confidence, households' have been observed, it has been decided to issue inflation expectations, corporate sector performance, comprehensive regulations, on prudential norms and credit conditions, the outlook for the industrial, services conduct related aspects, for such loans. The draft and infrastructure sectors and the projections of guidelines in this regard are being issued for public professional forecasters. To read more, please click here. comments.

#### 4. Review of Non-Fund Based Facilities

Non-fund based (NFB) facilities like Guarantees, Letters of Credit, Co-Acceptances etc. play a significant role in facilitating effective credit intermediation, besides enabling seamless business transactions, including trade transactions. It has now been decided to harmonise and consolidate guidelines covering these facilities across all REs. The revised guidelines include a review of instructions on issuance of partial credit enhancement by REs, with a view to, inter alia, broadening funding sources for infrastructure financing. Draft guidelines in this regard are being issued for public comments.

#### ii) Payment Systems

#### 5. Enhancing transaction limits in UPI

At present, the transaction amount for UPI, covering both Person to Person (P2P) and Person to Merchant payments (P2M), is capped at ₹1 lakh except for specific use cases of P2M payments which have higher limits, some at ₹2 lakh and others at ₹5 lakh. To enable the ecosystem to respond efficiently to new use cases, it is proposed that NPCI, in consultation with banks and other stakeholders of the UPI ecosystem, may announce and revise such limits based on evolving user needs. Appropriate safeguards will be put in place to mitigate risks associated with higher limits. Banks shall continue to have the discretion to decide their own internal limits within the limits announced by NPCI. P2P transactions on UPI shall continue to be capped at ₹1 lakh, as hitherto. NPCI will be advised accordingly.

The Reserve Bank has been operating the Regulatory Sandbox (RS) framework since 2019 and four specific thematic cohorts have been announced and completed till date. An 'On Tap' application facility for themes of closed Neutral' cohort with a specified time window for receiving applications was also announced in October 2023, which The extant guidelines on co-lending are applicable only to will close in May 2025. Under this cohort, any innovative
