Managing Director & CEO

Madam/Dear Sir,

Automated Data Extraction project – Reporting System

As you are aware that banks have been submitting data on priority sector advances and other credit portfolios (Government Sponsored Schemes and Kisan Credit Card, etc.) through a template, at quarterly and yearly intervals, as part of regulatory compliance.

2. Reserve Bank of India has developed Automated Data Extraction Project (ADEPT) which extracts credit data directly from the database server located at each bank for this project in order to get accurate data on time. The URL of the portal is <https://adept.rbi.org.in>. As ADEPT is ready for implementation, we request your bank to start generating Priority Sector Return through the portal from the quarter ending June 2019. Further, the present system of sending returns will continue till the new system stabilises.

3. In this regard, demonstration of the portal has already been given to officials of your bank and login credentials have been allocated to each bank for accessing the portal. The detailed User Manual for banks is enclosed for your information and reference.

Yours sincerely,

(Sonali Sen Gupta)
Chief General Manager
