Today, the Reserve Bank released the results of 46<sup>th</sup> round of its quarterly Services and Infrastructure Outlook Survey (SIOS) conducted during Q2:2025-26. This forward-looking survey¹ captures qualitative assessment and expectations of Indian companies engaged in the services and infrastructure sectors on a set of business parameters relating to demand conditions, price situation and other business conditions. In the latest round of the survey², 706 companies provided their assessment for Q2:2025-26 and expectations for Q3:2025-26 as well as outlook on key parameters for the subsequent two quarters.

 $<sup>^3</sup>$  Net Response (NR) is the difference between the percentage of respondents reporting optimism and those reporting pessimism. It ranges between -100 to 100. Positive value indicates expansion/optimism and negative value indicates contraction/pessimism. In other words, NR = (I – D); where, I is the percentage response of 'Increase/optimism', D is the percentage response of 'Decrease/pessimism' and E is the percentage response as 'no change/ equal' (*i.e.*, I+D+E=100). For example, increase in turnover is optimism whereas decrease in cost of inputs is optimism.
