**India's External Debt as at the end of March 2022**

The stock of external debt at end-March 2022 as well as revised data for earlier quarters are set out in [Statements I \(IMF format<sup>1</sup>\)](#) and [II \(old format\)](#). The major developments relating to India's external debt as at end-March 2022 are presented below.

**Highlights**

- At end-March 2022, India's external debt was placed at US\$ 620.7 billion, recording an increase of US\$ 47.1 billion over its level at end-March 2021 ([Table 1](#)).
- The external debt to GDP ratio declined to 19.9 per cent at end-March 2022 from 21.2 per cent at end-March 2021.
- Valuation gains due to the appreciation of the US dollar *vis-à-vis* Indian rupee and major currencies such as yen, SDR<sup>2</sup>, and euro were placed at US\$ 11.7 billion. Excluding the valuation effect, external debt would have increased by US\$ 58.8 billion instead of US\$ 47.1 billion at end-March 2022 over end-March 2021.
- At end-March 2022, long-term debt (with original maturity of above one year) was placed at US\$ 499.1 billion, recording an increase of US\$ 26.5 billion over its level at end-March 2021.
- The share of short-term debt (with original maturity of up to one year) in total external debt increased to 19.6 per cent at end-March 2022 from 17.6 per cent at end-March 2021. Similarly, the ratio of short-term debt (original maturity) to foreign exchange reserves increased to 20.0 per cent at end-March 2022 (17.5 per cent at end-March 2021).
- Short-term debt on residual maturity basis (*i.e.*, debt obligations that include long-term debt by original maturity falling due over the next twelve months and short-term debt by original maturity) constituted 43.1 per cent of total external debt at end-March 2022 (44.1 per cent at end-March 2021) and stood at 44.1 per cent of foreign exchange reserves (43.8 per cent at end-March 2021) ([Table 2](#)).

<sup>1</sup> The concepts set out in the IMF's 2013 *External Debt Statistics (EDS) Guide* are harmonized with those of the *System of National Accounts (SNA) 2008* and the sixth edition of the IMF's *Balance of Payments and International Investment Position Manual (BPM6)* published in 2009.

<sup>2</sup> SDR: Special Drawing Rights.

- US dollar denominated debt remained the largest component of India's external debt, with a share of 53.2 per cent at end-March 2022, followed by debt denominated in the Indian rupee (31.2 per cent), SDR (6.6 per cent), yen (5.4 per cent), and the euro (2.9 per cent).
- Outstanding debt of both government and non-government sectors increased during 2021-22 ([Table 3](#)).
- The share of outstanding debt of non-financial corporations in total external debt was the highest at 40.3 per cent, followed by deposit-taking corporations (except the central bank) (25.6 per cent), general government (21.1 per cent) and other financial corporations (8.6 per cent).
- Loans remained the largest component of external debt, with a share of 33.0 per cent, followed by currency and deposits (22.7 per cent), trade credit and advances (19.0 per cent) and debt securities (17.1 per cent) ([Table 4](#)).
- Debt service (*i.e.*, principal repayments and interest payments) declined to 5.2 per cent of current receipts at end-March 2022 as compared with 8.2 per cent at end-March 2021, reflecting lower repayments and higher current receipts ([Table 5](#)).
